NEW CLIMBING ROSE, BLAZE

See Description and Price on Page 22

STATE NURSERY & SEED CO.
HELENA Established in 1890 MONTANA

New Hardy Rugosa Rose Vanguard

This is a new color in the Rugosa tribe. Orange salmon and gold with flowers much like those of a hybrid Tea rose. It is a hybrid Rugosa. A very strong and vigorous grower and very hardy as are all the Rugosa roses. They are among the few that will endure our Northwest climate without protection. We are always on the lookout for new ornamentals that will prove hardy in the Northwest and are pleased to be able to introduce to this section this rose and the one on the front cover. We wish to remind you that these roses will be shipped with a ball of earth insuring growth and that they are delivered prepaid to you.

A Birdseye View of Our Mammoth Nursery and Greenhouses Only a Few Miles from the Continental Divide, Over 4,000 Feet Above the Sea. This picture does not include the hundreds of acres of land where our Registered and Standard Seed Grains are grown.

You Are Interested In What Grows Best In Montana and the Rocky Mountain Region

Our forty-three years' experience in Montana has enabled us to grow and select for you, varieties and strains of Field, Vegetable and Flower Seeds, Trees, Shrubs and Plants that are hardy and adaptable to conditions in Montana and the Northwest.

A Page of Information on How to Order from this Year Book

OUR TERMS—With customers not having established credit are strictly cash. Goods will not be sent C. O. D. unless a deposit of one-fourth of the amount is paid in cash with order.

WE PAY DELIVERY charges on all Plants, Trees, Shrubs, Bulbs and Roots except Evergreens, when purchased at Year Book price, unless, as in a few instances, items are marked not prepaid.

HOW TO SEND MONEY—Remittances should be made by Postoffice or Express Money Orders, Bank Drafts, or cash can be sent in a registered letter. Personal checks are accepted and stamps can be sent for small amounts.

USE ORDER SHEET—Enclosed in this Yearbook you will find them. Instructions for their use are printed on them; they simplify ordering. Keep a copy of your order.

ORDERS ARE PROMPTLY FILLED and as far as practicable in rotation. Order early. All orders not shipped on day of receipt are acknowledged by a postcard giving the number of the order on our files. Refer to this number in writing about your order.

SPECIAL PREMIUM * * *

For Early Orders Received Before April 1st

Free * * *

with every cash Flower or Vegetable Seed order of \$1.00 to \$5.00 we will send you a collection of Flower Seeds (value 25c), and all cash orders over \$5.00 a collection of Seeds (value 50c).

Free * * *

with every cash order for Plants, Trees and Shrubs amounting to over \$5.00 we will include one Villosa Lilac (value \$1.00) (a Lilac which has created unlimited enthusiasm).

These Free Premium Offers apply only to orders of Flower and Vegetable Seeds and Plants and Nursery Stock as a reward for EARLY ORDERS.

YOUR NAME AND ADDRESS—Write your name, postoffice and state and nearest express station plainly; give complete directions as to nearest express station, postoffice or freight depot. Where none are given we route goods at buyer's risk.

PARCEL POST—Most Plants, Seeds, Bulbs and smaller Trees and Shrubs can be sent by parcel post. All poisonous insecticides are unmailable. We cannot, however, be held responsible after delivery to the postoffice or express office. If Plants are desired sent by parcel post in pots extra cost must be allowed for packing and postage. Table of postage rates given in back of book.

IN COMMON WITH ALL AMERICAN SEED HOUSES

WE DO NOT WARRANT, in any way, expressed or implied, the contents or the description, quality, productiveness or any other matter of any Seeds, Bulbs, Plants, Shrubs, Trees or Vines sold by us, and will not, in any way, be responsible for the crop. If the customer does not accept these goods on the above terms, no sale is made thereof, and he must return them at once and money will be refunded. Subject to the above conditions, we make this sale at the new low prices herein quoted.

PLANTS FOR THE HOME AND GARDEN

Our 43 years' experience of dealing with plant life in the Northwest has enabled us to select for you types of plants that will thrive under conditions found in Montana and the Northwest.

HOW WE SELECT AND FILL YOUR ORDER

We use every care and precaution to select only plants that are in the best of condition and to pack them so that they are certain to arrive safely at their destination. Our various growing ranges, Nursery plots and packing sheds are in charge of experts in their lines and our patrons may be assured that every effort will be made to make their dealings with us both pleasant and satisfactory. The size named in plants, such as 3 inch and 4 inch, etc., refers to the size of the pot in which the plant is growing at the time. Plants are generally taken from their earthen pots and packed in paper pots for shipment.

OUR GUARANTEE ON POTTED PLANTS

All shipments of plants from this department are guaranteed to reach their destination in good condition. Our customers should advise us if delivery is not made within a short time after our notification card of shipment has reached you. Examine all plants carefully upon arrival and report immediately any that are damaged or in poor condition. After safe delivery in good condition we do not assume responsibility for future growth or failure.

Abutilon or Flowering Maple

Popular house plants, flowering profusely during the winter and early spring months.

Splendens—A handsome rose color. Pink Beauty—Pale pink.
Savitzi—A variegated foliage.
Golden Fleece—Pure yellow.
Crusader—A brilliant red.

Snowdrift—A beautiful pure white sort.

Any of the above varieties, each, 3-inch, 30c; 4-inch, 40c; entire collection of 6 varieties, \$1.50.

Agathea

Coelestis (Blue Daisy)-A beautiful plant with dainty sky-blue flowers with a yellow disk. A house plant flower lovers will want. Each, 3-inch pots, 25c; 4-inch pots, 40c.

Ageratum

This is a Mexican flower. An excellent potted plant and fine for bedding, having large clusters of beautiful blue flowers. Each, 15c; 3 for 40c.

Aloysia (Lippia) Citriodora

Lemon Verbena—An old favorite and should be in every garden. Lemon scented foliage. Each, 25c and 35c.

Alyssum (Ready about May 1)

Alyssum, Double-An excellent variety for borders, window boxes, and urns. Each, 10c; doz., \$1.00.

Anthurium Andreanum

The very peculiar flowers of this choice house plant never fail to attract attention. Price, from 4-inch pots. \$1.25 each.

Amaryllis—Hybrids

These plants produce blossoms which are wonderfully varied and of brilliant colorings.

Strong growing plants, each, \$1.00.

Amaryllis

Antirrhinum or Snapdragon

(Ready April to July)

The Snapdragon is well adapted for beds or borders and the flower spikes are fine for cutting. They may be grown from seed, but it is much more satisfactory to get plants that are already started.

Pot plants, ready to bloom, furnished in fiery red, rose pink, light pink, orange, scarlet, yellow and white.

Each, 20c; doz., \$2.00.

Transplanted seedlings, mixed selection of the above colors, fine for bedding.

Per doz., 60c.

Aspidistra

Aspidistra Lurida—One of the easiest decorative plants to grow. A most useful house plant having large green leaves and thriving in a hallway or a comparatively dark place in the room where nothing else will succeed. Each, \$1.00.

Aspidistra Lurida Variegata—Similar to the preceding variety but with beautifully striped leaves of white and green. Each, \$1.00.

REMEMBER

that we prepay delivery on all Plants. Trees and Shrubs except Evergreens unless marked otherwise to your nearest Express Station or Postoffice.

Snapdragons in One of Our Greenhouses

Asparagus Plumosus

(Ready in May)

Our strains of Asters are unsurpassed by any and are prize-winners wherever exhibited. While the early varieties may be grown successfully from seed, it has been found to be much more satisfactory to use plants that have been started inside. Care should be taken in setting out the young plants as the roots are tender and easily broken.

plants as the roots are tender and easily broken.
We offer sturdy transplanted plants of the early,
mid-season and late-branching varieties. Colors,
Pink, Shell-pink, Red, White, Lavender, and Purple. Per doz., 50c.

Pot Grown Aster Plants

In addition to the plants listed we are again featuring pot-grown stock in the same colors. These plants will be of sturdy growth and will produce earlier flowers, a distinct advantage in districts subject to early frost. Per doz., \$1.00.

Begonia, Rex or Painted Leaf Begonia

Their wonderfully colored foliage never fails to awaken admiration, and they are of easy house culture. The varieties listed below are selected from the finest sorts known.

Vesandii—Very showy variety, thick velvety foliage, beautifully marked with bright green and silver with crimson stems.

Mrs. A. G. Shepard—Silver leaves marked with other pretty shades.

Walter Lamb—Rich green and silvery white. Louis Closson—A beautiful bronze.

L'Enfent De Nancy—The same as Magnifica leaves, somewhat lighter in ground color and of a silvery white tone.

Robert George—A beautiful variety with finely cut leaves having a silvery green center with the outside edge margined a green and bronze. Each of above varieties, 3-inch, 35c; 4-inch, 50c.

Baby Tears or Irish Moss

Dwarf growing plant with a clustering, trailing habit. Foliage small and compact. Ideal for fern dishes and miniature gardens. Each, 25c; 3 for 65c.

Begonia—Everblooming Type

This type of Begonia produces the greatest profusion of bloom of any in its family. They are of easy culture and make fine house plants.

Fire Sea—An exceedingly floriferous variety with very large dark fiery red flowers. The foliage is reddish green.

Rex Begonias

Asparagus Plumosus

Owing to its graceful foliage and ease of culture, this is perhaps more in demand than any other house plant.

Each, from 3-inch pots, 25c; 4-inch pots, 50c; 5-inch pots, \$1.00.

Asparagus Sprengeri

Fern

(Emerald Feather)

Of great value for hanging baskets and for cutting. One of the best plants for window-boxes.

Of very easy culture. Requires only good soil and plentiful watering.

Prices: 3-inch, 25c; 4-inch, 50c; 5-inch, \$1.00.

Asparagus Sprengeri

BEGONIA—Everblooming—(Continued)

Chatelaine Hybrids—Very similar to the well known Chatelaine, with very large flowers of a brilliant rose color.

Albert Martin—A well known variety with bronze foliage.

Pink Profusion—A new introduction with slender growth, and small foliage of a light green tinted with brown. Flowers of rich rose borne in wonderful profusion.

Prima Donna—Beautiful rose colored blooms, shading to a carmine at the center.

Lucernc—One of the finest Begonias known. Foliage bronze, crimson reversed. Has immense trusses of salmon colored blossoms.

Wellingtoniensis—An old variety which is again becoming in great demand, with beautiful dark green foliage and pink flowers.

Sandersonii-Scarlet, a winter bloomer.

Argenta—Guttata—Brilliant bronze green foliage spotted with white with white flowers.

Thurstonii—A great favorite with red veined foliage on under side of leaves. Flowers a bright shell pink.

Rubra—Deep coral pink flowers, foliage green.

Any of the above varieties, each, 25c, 35c and 50c.

Everblooming Begonia

Begonia—Tuberous Rooted

Our display of Tuberous Rooted Begonias has created quite a sensation each year during the summer season when the plants are in full bloom. With their giant and somewhat delicate blossoms ranging in colors of red, pink, white, yellow, orange and salmon, they are indeed an ideal house plant. We offer the tubers at 25c each; 3 for 65c.

Campanula Isophila or Star of Bethlehem

Beautiful star-shaped white flowering plants of a trailing habit. The plant is practically covered with blossoms all summer. Fine for hanging baskets, vases, etc. Each, 25c and 50c.

Cannas

No other bedding plant is as showy as the Canna. It is very easily grown and attains large size in ordinary soil. For best results obtain started plants from our greenhouses and set out when all danger from frost is past, thus gaining additional time for their growth. Set the plants about 18 inches apart in a sunny location and supply with plenty of water and well rotted manure. Take them up immediately after frost kills back the tops and treat as you would Dahlia tubers.

Ambassador-Bronze foliage-color poppy red. Flowers brilliant and borne in immense trusses on strong stalks well above the foliage.

Nokomis-Large, vivid crimson flowers with a rich silky sheen on the petals. Bronze foliage.

Mrs. Pierre S. Du Pont—This new Canna surpasses all other pink varieties. Color a vivid watermelon pink. The wavy or crinkled edge on the petal is a new departure in Cannas.

The President-A rich scarlet flower with green foliage. One of the best reds yet introduced.

Duke of Marlborough—Green foliage. Flowers a bright crimson maroon.

King Humbert-The best of the bronze leafed type with scarlet flowers and beautiful rich bronze foliage.

Yellow King Humbert-Flowers a golden yellow spotted with red and green foliage.

PRICE—Fine large, 4-inch potted plants, each, 35c; 6 for \$1.70.

Carex Japonica

A very colorful grasslike plant of bushy growth having narrow and rather thick leaves which are dark green with a fine white border. Very suitable for fern dishes and for aquariums. Each, 3-inch pots, 20c; 3 for 55c.

Bed of Cannas

Carnation—Senator

Carnations

To meet our steadily increasing demand, we have devoted an entire range, consisting of fourteen houses each 250 feet long, in which to grow our gigantic stock of 50,000 plants. We have listed the varieties which are leaders in the Carnation world, and young plants of the following varieties can be supplied from March 15th to July 15th.

STANDARD VARIETIES

Arctic-A glistening white - large flowered and sweet scented.

Betty Lou-A very attractive deep pink of fine size and form.

Belle Washburn-A red of extreme brilliance.

Hilda-The most wonderful pink Carnation of a decade. Awarded certificate of merit at the recent American Carnation Society's show.

Laddie—A variety of extreme size, 3½ to 4½ inches in diameter. Color, a beautiful warm salmon pink. Has long, strong stems. The Carnation "De Luxe."

Mrs. C. W. Ward—A very attractive deep pink of fine size and form. Free bloomer and strongly scented.

Mrs. C. W. Ward—(Variegated) — Another variegated variety, attractively blotched and striped with a deep pink on white ground.

Matchless-A large pure white, long stemmed and a free bloomer. The petals are attractively fringed and the perfume delightful.

Peerless Pink—A very deep pink, flowers large and well shaped. Free bloomer.

Pink Abundance—A new beautiful deep pink, rapidly becoming a favorite.

Pink Spectrum—A fine new pink which has proved very popular.

Senator-One of the newest of the new varieties. A very prolific bloomer bearing glistening white flowers which are exceedingly fragrant.

Spectrum-One of the very best reds on the market, having large well shaped blossoms on long

The varieties listed above—each, 20c; 3 for 55c.

SPECIAL CARNATION BARGAIN

5 Named Varieties Our Selection Postpaid to You for Only 75e

Centaurea (Gymnocarpa) or Dusty Miller

One of the white-leaved Centaureas. Fine for bedding, for vases, hanging baskets and pots; also used extensively for borders. Each, 20c; dozen, \$2.00.

Calceolaria

Calceolaria

The Calceolaria, more commonly known as the "Fisherman's Basket," is rapidly becoming one of the most popular plants for Mother's Day on the market. With its multitude of vari-colored velvet-like flowers it makes a most acceptable present. The season of the Calceolaria extends from early spring until summer, though the plants are at their best in May.

In bloom, each, depending on size, \$1.00 to \$3.00.

Chrysanthemums

THE CHRYSANTHEMUM is, without doubt, the queen of Autumn flowers. Owing to the early frosts of this section, it is impractical to grow these most beautiful Fall plants to maturity in the open ground. They can, however, be successfully grown in the garden until September when they should be lifted and potted. Then in the house they will give a wealth of blooms and beauty.

LARGE FLOWERING VARIETIES

Betsy Ross—A grand, early mid-season white, one of the finest yet introduced. Golden Mistletoe—A beautiful Mum with the incurve a deep golden yellow.

One of Our Houses of Chrysanthemums

A House of Our Cinerarias

Gladys Pearson-A prolific bloomer, upper surface of petals apricot, underside a distinct buff.

J. W. Prince - A leader of the Dark

Maj. Bonnaffon — A beautiful incurved glossy yellow. One of the best.

White Chieftain-Large incurved white. November.

Pompon Chrysanthemums

The flowers vary in size from ½ to 2 inches in diameter, small petaled, very compact and formal. They are usually in clusters so that when cut one spray forms a bouquet in itself. Very dainty for table decoration. Pompons make ideal house plants.

New York-Yellow tinge, with a decided henna center.

Golden Climax-A very pleasing shade of bright yellow, medium size and height.

Veta—An early white, exhibits a yellow center when it first opens but becomes pure white when fully developed.

Yuletide—The latest and best white Pompon known at the present time. Its color is of the purest paper white.

Mrs. Frank Beu—The favorite of all the Pompons, color a reddish yellow.

Lillian Doty-Large pink, a splendid sort. Dorothy Turner-A fine dark bronze.

FANCY SINGLE VARIETIES

These have beautiful Daisy-like flow-

Mensa—Purest white, a splendid variety. Golden Mensa-New and proving popu-

Prices for Chrysanthemums — Plants ready March to July only: Each, 15c; 3 for 40c.

Cineraria

Cineraria Hybrids Grandiflora-Cinerarias are magnificent and truly beautiful plants with their rich colorings and deficate fragrance. Our strain is noted for its large flowers of exceptional beauty. The plants are of sturdy and bushy growth covered by massive flower heads in a variety of bright colors. Fine blossoming specimens, 75c, \$1.00, \$1.50 and \$2.00.

Cereus - Night Blooming

Nocturno-Greggii—Often called "Queen of the Night." A very fine, very rare, night blooming cactus variety. The flower opens after sundown and closes before sunrise. It resembles a water lily somewhat and is a pure white in color, is of very delicate structure and emits a most delightful odor. Water plants only once a week and expose them to full sunshine as much as possible. Price, each, from 35c to \$1.50.

Unless Otherwise Directed We Shall Ship All Plants for Outside Planting at

What We Think the Proper Time to Set Out

One of Our Houses of Cyclamen

Cyclamen

Without doubt the Cyclamen, because of its clean growth, its picturesque appearance and its easy culture, has become the most treasured of winter blooming plants. We have some excellent specimens ranging in color from the purest white to white tipped with pink, through the various shades of pink to the We can supply these plants from November 1st to March 1st and for gift purposes hey cannot be excelled. We have selected for seed purposes the finest n color and size of bloom and the most free flowering specimens. Nice blossoming specimens sent any-where for \$1.00, \$2.00 and \$2.50. The larger sizes are better shipped wherever by express possible.

Cuphea or Cigar Plant

This plant is covered with bright scarlet flowers and makes a very attractive house plant. They are especially useful for vases or basket decorations. Each, 25c; 3 for 65c.

Cyperus Alternifolius or Umbrella Plant

An unusually fine plant for decorative purposes of extremely easy culture. Requires plenty of water and may be grown as a semi-aquatic. A splendid plant for aquariums and lily pools. Each, 25c and 50c.

Christmas Gem—A beautiful variety with red and maroon-colored foliage and producing enormous leaves, often 5 to 7 inches in length. It attains its full beauty in winter—thus differing from

Trailing Queen-A beautiful trailing variety, highly colored and very suitable for hanging baskets. Dazzling Gem-Rose pink center, margin of chocolate green, dwarf compact grower, stocky pot plant

variety. Lord Palmerston-An excellent beautiful dark velvety maroon center with dark crimson ribs, commanding admiration.

Queen Victoria-Remarkably handsome, bright cardinal red with distinct bright golden border.

Verschaffeltii-The standard crimson bedding variety.

Crimson King—Strikingly handsome, velvet blood red, robust grower, splendid both as pot plant and bedder, does fine in winter boxes placed in sunny locations. Any of above varieties, each, 25c; 3 for 65c; larger sizes, 50c.

DORMANT CYCLAMEN BULBS We can supply the above from March to July 1st at 3 for 65c 25c each

Umbrella Plant

Coleus-Xmas Gem

Our Peerless Montana Grown High Altitude Dahlias

Our stock of "Adapted to the Northwest" Dahlias is better than ever before. Our list contains many of the newer favorites along with the select older varieties. Our Dahlia collections have been chosen with care and our patrons are assured of the highest satisfaction from the efforts of our Famous Blue Blooded Stocks.

CULTURE

The beds should be in a fully exposed, sunny position, and should be well enriched with rotted manure dug deeply into the soil. After frost danger is past, plant the tubers about two feet apart in holes about four inches deep, laying the tubers flat on their sides. Cultivate regularly and apply a good plant food.

NOTE—POTTED TUBERS In some varieties we may have exhausted our supply of tubers and in this case we reserve the right to send Potted Tubers from 4-inch pots. Dahlias grown from cuttings in the spring, potted and planted out in June or July, flower earlier and just as freely as those grown from tubers.

Margaret Woodrow Wilson

NINE NEW ARISTOCRAT SPECIALS

- Glory of Monmouth—A beautiful pastel salmon pink. A most unusual Dahlia. Potted Tubers, each, \$1.00.
- Peter Pan—A wonderful new Dahlia, a bright rich luminous lavender pink color, flowers borne on long strong stiff stems. Fine for exhibition, cut or commercial variety. Plants only, each, \$1.50.
- Marie—This is a magnificent new Dahlia with a freshness and brilliancy greater than most pink Dahlias. Its color is a luminous pink. Exhibiting large flowers, strong stiff stems and wonderful keeping qualities. Each, 75c.
- Ty Cobb-It is a wonderful hybrid decorative type, with large flowers. A strong early free and continuous bloomer. Brilliant glowing garnet, shading deeper with a most lustrous sheen; the reflex is a luminous crimson purple. Potted Tubers, each, \$1.00.
- King Midas—Rated as one of the six greatest of all exhibition Dahlias. Form is perfect, stems long, stiff and straight, holding up giant golden yellow flowers. An extra fine new Dahlia. Potted Tubers, each, \$1.75.
- Jane Cowl—A deep massive bloom of bronzy buff and old gold. A stem of unusual length and seldom bothered by insects. Potted Tubers, each, \$1.00.
- Peacock—A fine formal decorative type, color a dark purplish red, shaded maroon, tipped white. Like all variegated flowers, occasionally a flower will come solid color. Potted Tubers, each, \$1.50.
- Pop Stewart—Beautiful rose and lilac blooms produced on strong stems. Potted Tubers, each, 60c.
- Treasure Island-A striking Dahlia of exquisite petal formation. The color is apricot and gold and it attains a wonderful size. Potted Tubers, only \$1.50.

COLLECTION OF ABOVE 9 VARIETIES Value \$10.60-For \$9.00 Prepaid

OUR UP-TO-DATE COLLECTION

Bonnie Brae—One of the finest decorative types and of intense size. Flowers are a cream shaded blush pink. An exceptionally good exhibition variety. Each, 50c.

Ellinor Vanderveer-One of the most admired Dahlias, color lavender-pink, flowers large size, and long stiff stems. Good bloomer and keeps well when cut. Decorative Dahlia. Each, 50c.

Jersey's Beacon—Decorative. This Dahlia has become a universal favorite. Some splendid blooms of this variety have been shown the past season. As an exhibition flower it has few equals in its color, but as a garden variety it is even more spectacular. The color is Chinese scarlet, with a paler reverse, giving it a two-toned effect. The flowers are large and globular in shape. Plants only. Each, 50c.

Cambria—A very fine all around decorative Dahlia, massive, full of large flowers held erect on long stiff stems, flowers have broad petals of rich rose pink, lighter towards the center. Each, 50c.

Sanhicans Queen-A splendid formal decorative color, apricot suffused with carmine. Each, 50c.

Margaret Woodrow Wilson-Decorative. This variety is an exhibition type of large size and great beauty. Color is opalescent pink. Face of petals creamy white; reverse, phlox-pink. Medium height. Each, 50c.

Pride of California-Without doubt the best of the red decoratives. A vigorous grower and a very free bloomer. The large deep crimson red flowers are borne high above the foliage. The stems are rigid and long and the flowers keep exceptionally well when cut. Each, 50c.

Value \$3.50—Special Price as a Collection, \$2.95 postpaid. (May Be Purchased Singly or as a Collection)

COLOR PLATE OFFER

Mrs. I. De Ver Warner—Decorative. A blossom of soft orchid coloring seldom appearing in the Dahlia family. A charming color, large blossoms and very long strong wiry stems. Very free bloomer. Each, 35c.

Jersey's Beauty—One of the finest of the pink sorts having large.

of the pink sorts, having large perfect flowers of erosine pink, carried high above the foliage on long straight stiff stems. Under Montana conditions we consider this to be the perfect Dahlia. Price, each, 45c.

These two fine varieties for 65c prepaid.

Ellinor Vanderveer

the thread winds the

Jessie K. Prescott

Jessie K. Prescott—Decorative. The color is a deep orange at the center, gradually shading to a creamy orange on the rows of outer petals. The formation is unusual as the long narrow petals have an inclination to roll backward. The tall bushes are branching and productive of masses of splendid flowers with exceptionally long good stems. Plants only. Each, 50c.

Miss Bridgeton—Decorative. Deep pink enormous flower, with a suffusion of violet. Vigorous grower; long stiff stem. Has been awarded many prizes. This Dahlia should be grown in every garden. One of the best for general use. Plants only. Each, 50c.

Margaret Masson—Decorative. Color a beautiful silvery rose-pink. Flowers of great depth and size held erect on long stiff stems. Wonderful exhibition variety. Plants only. Each, 75c.

Hercules—A Dahlia of enormous size. Color is a tangerine and deep yellow. The reverse of the petals is shaded tangerine and they are so placed that they blend in a most attractive way with the deep yellow of the flower. Plants only. Each, 50c.

Maude Adams—An early and free blooming sort, white effectively overlaid by delicate pink, undoubtedly one of the finest of the type. Price, each, 50c.

WE DO NOT SACRIFICE QUALITY IN ANY WAY ON OUR FAMOUS MONTANA GROWN DAHLIAS AT OUR NEW LOW PRICES

Our Northwestern Gems

— ns —— ns —— ns —— ps —— ps —— ps —— ns —— ps —— ns —

Ballet Girl—Very large cactus with long, very finely quilled petals. Color orange, tipped white; some flowers solid orange on some plants. Each, 35c.

Bashful Giant—Decorative. A gigantic bloom where size is one of the requisites for exhibition. Also of great merit for its beautiful colorings—being apricot with golden shadings—flowers produced on good stout stems. Each, 35c.

Beatrice Slocombe—Decorative. A very well built flower of large size. It is an early, continuous and abundant bloomer which makes an ideal garden variety and is highly recommended. The combination of color is very attractive, being a very rich carmine red, blending to old gold and yellow, each petal tipped with gold, making it a most unique and attractive color combination. Each, 40c.

Jersey's Beacon

TWO DAHLIAS THAT SHOULD BE IN EVERY GARDEN

Elizabeth Slocombe—Decorative. The largest and very best of its color. Its gigantic flowers are produced on exceptionally long stems as stiff as canes, making it a much desired exhibition variety. Very vigorous in growth. In color a rich, brilliant purplish garnet in opening, and as the flower matures it fades to an exquisite shade of garnet. Each, 30c; 3 for 75c.

Jack Rose—A fine dark red. Very free bloomer and good for cut flowers. Each, 25c.

BOTH SENT TO YOU PREPAID FOR 45c

A BOOK EVERY DAHLIA LOVER SHOULD HAVE DAHLIAS, by F. F. Rockwell

Learn to know the different types of Dahlias and their uses in your garden, how to plant and grow them, what fertilizers to use, how to control pests, how to harvest and store the tubers, grow for exhibition, and how to propagate and hybridize. Brief and practical. 65 illustrations, 80 pages—\$1.00.

Remember-Our Dahlias Are Sent Prepaid

Dahlia-Unwins Dwarf Hybrids

REFER TO INDEX FOR DAHLIA SEED

Dahlia Unwins, Dwarf Hybrids

These bedding hybrids are the outcome of ten years' hybridization and selection. Their freedom of flowering is remarkable; they are semi-double, require no stakes, may be planted 18 to 20 inches apart and average between 18 and 24 inches in height. Excellent for Rock Gardens. Wonderful color shades. Price, each, 20c; 3 for 55c.

DAHLIAS NOT CATA-LOGUED

We have a large list of Dahlias being tested in our fields before cataloguing. Should you have a variety in mind which is not listed we shall esteem it a favor if you will write us regarding it, as we may be able to supply it and quote prices.

Dahlia Seed

Dahlias are more frequently raised from tubers than from seed. Yet it is very interesting to grow them from seedlings for there is always the chance of getting something novel and distinct among them. Seeds may be sown outdoors in May.

If you are contemplating starting a Dahlia garden we shall appreciate your putting confidence in our Mr. Eger, our Dahlia expert, who will select suitable varietics true to name and give you a collection of which you will be proud and which will be a credit to ourselves. Just state the amount you wish to spend and we will do the rest.

Show and Decorative Types

Judge Marean—Decorative; very large flowers of perfect type and difficult to describe, produced on strong stiff stems, a blending of glowing salmon pink, red, iridescent orange, yellow, and pure gold. Each, 40c.

Paul Michael or California Gold—A pure gold or deep orange buff colored decorative of immense size. Each, 40c.

The Grizzly—Decorative. The richest deep velvety maroon Dahlia yet produced. Each, 35c.

Elsie Burgess—One of the very best. Free flowering, producing great masses of blooms on stiff stems.

Color delicate white tipped with bayender Fach 20c. Color delicate white tipped with lavender. Each, 30c.

Le Grand Manitou—A gigantic flower of white, striped and splashed with reddish violet. The largest decorative Dahlia. Each, 35c.

Lucy Fawcett (Fancy Show)—Large, full, heavy, with well-opened quills. Pale straw color, indefinitely dusted and splashed with tender rose to carmine. Each, 25c.

Purple Maniton—A very fine well-shaped flower with good stems and an excellent bloomer. Each, 35c. Stradella—Rich deep purple crimson. Very free flow-

ering with long stems. Each, 25c. A. D. Livoni—Warm rose-pink, perfect flowers, with quilled petals which nearly overlap at the ends. Each, 25c.

Collection of one of each of the above 9 varieties for \$2.50

Cactus Dahlias

Ballet Girl-Very large cactus with long, very finely quilled petals. Color orange, tipped white; some flowers solid orange on some plants. Each, 35c.

Countess of Lonsdale - A very popular variety. Longest season and freest bloom of any Cactus type; flowers very large, complete and perfect. Color exquisite blending of amber and salmon-pink. Each, 25c.

Pompon Dahlias

The Pompon Dahlias are small flowered Dahlias, usually of the show type of flower, and are exceedingly floriferous.

"Japanese Tub"

Decorated Japanese Tubs

Our decorated Japanese Tubs are becoming more popular each year. They are filled with combinations of plants, ferns and vines to your instructions or left to our judgment. A beautiful all-season decoration in the cemetery and fine for porch pillars. Two beautiful arrangements \$5.00 and \$7.50 F. O. B. Helena. Empty Japanese Tubs at \$1.50 each F. O. B. Helena.

Ferns /

We devote two entire houses to the growing of Ferns and have at all times a good stock of the very finest. We make a specialty of these plants in suitable gift sizes and annually send out thousands to our patrons. If you are planning on a Fern for a friend just tell us the amount you wish to spend and you can rely on our sending a plant that will be a joy to them and a credit to ourselves.

Boston Ferns

The New Colorado Boston Fern-This new creation originated in Denver, Colorado, and is rapidly mounting to fame throughout the country. Price, each, 4-inch pots only, 75c.

Nephrolepsis Bostoniansis—(Boston Fern)—This is the general favorite with all lovers of house Ferns. To meet the constant demand for plants suitable for presentation to friends, we have a "SPECIAL" in this type at \$1.00.

Prices: 3-inch pot, 30c; 4-inch pot, 50c; 5-inch pot, \$1.00; 6-inch pot, \$1.75. In addition to the above we have some exceptional plants suitable for gift purposes at \$2.00, \$2.50 and \$5.00.

Fancy Bostons

Nephrolepsis Elegantissima (The Tarrytown)—One of the family of fancy Bostons. Grows very compact with fronds wider at the base than the regular Bostons.

Nephrolepsis Whitmani—(Ostrich Plume Fern)—Unquestionably a valuable Fern of its type. They are graceful beyond description, feathery, plumy and nothing describes them better than Ostrich Plume.

Prices of the Above Two Ferns: 3-inch pot, 35c; 4-inch pot, 50c; 5-inch pot, \$1.25.

Pteris Tremula—Commonly called "Lace Fern." This is one of the best known of the family, and the strongest grower, the fronds on a well-developed specimen often attaining a length of three feet. Each, from 2½-inch pots, 30c; from 3-inch pots, 45c; from 5-inch pots, \$1.00; from 6-inch pots, \$1.75.

Holly, Ferns

Cyrtomium Falcatum—Very suitable for Fern Dishes and makes a perfect specimen plant. The leaves are thick and a beautiful holly-green color. Each, 25c, 45c, \$1.00, \$1.50.

Crytomium Rockfordianum—The Improved Holly Fern. The leaves are pointed and notched, resembling Holly leaves. A splendid Fern for the house. Each, 25c, 45c, \$1.00 and \$1.50.

Dracenas - Commence of the Com Indivisa-This variety is used extensively as a center plant for vases, porch and window boxes, etc. Each, 50c and \$1.00. E () 1 1 1 1 2 -

Wolsley-One of the very finest highly colored varieties, having deep bronze and red broad foliage. Each, \$1.50. TOTAL CONTRACTOR OF THE PARTY O

Terminalis-Ribbon-like leaves of richest shades and colors. Enjoys the sun and excellent for baskets, vases and boxes. Each, \$1.00.

English Daisies

Bellis Perennis—Like Pansies, the Daisies for beds or borders in the garden or cemetery are very much in demand. Blooming plants in pink or white ready May 1st. Dozen, 60c.

Maiden Hair Ferns This species requires more exact atmospheric conditions than other Ferns, but is one of the daintiest. Adiantum Hybridium-One of the more recent Maiden Hair Ferns, having large fine fronds and is a

strong grower. Adiantum Conicum—One of the strongest and largest of the Maiden Hair family. Splendid habit. Either of the above, each, 25c and 50c. Larger plants 75c and \$1.00.

English Daisy

Tarrytown Fern (Fancy Boston)

One of Our Table or Dish Ferns

Ferns For Dishes

We have a good stock of all of the following list of Ferns for fern dishes, jardinieres, etc., and which are adaptable for the home and most easily grown. Pteris Alexandrae—A very handsome variegated Pteris, of dwarf habit.

Pteris Rivertoniana—A very distinct and valuable type of crested Pteris.

Pteris Wilsonii-A beautiful variety of dwarf habit, bearing crested fronds. Very compact growth.

Pteris Mayii-A peculiar variegated dwarf type with large pinnae and green foliage.

Pteris Wimsettii-A very pretty green foliage and crested Pteris.

Pteris Argyrea-The Pteris are among the easiest grown house Ferns, and the wonderful range of variegated foliage and form render them invaluable.
Pteris Argyrea is of a dwarf habit with fronds prettily decorated with white.

Pteris Victoriae—This is considered by many to be the handsomest of the Pteris.
The fronds are rich deep green. It is a vigorous and healthy grower.

Pteris Hastata—A very unique and pretty variety of this popular Fern family.

Pteris Multiceps—One of the most strikingly variegated forms of the Pteris

Prices of Above Ferns: From 3-inch pots, 30c; from 4-inch pots, 65c.

Feverfew

Dainty milk-white double spherical flowers. Very free flowering and blooms from Spring until Fall. Excellent as a bedding plant and good for cutting. An old-time favorite. Each, 20c; 3 for 50c. Aureum or Golden Feather-A fine sort with golden yellow foliage. Each, 20c; 3 for 50c.

Ficus or Rubber Plant

Elastica (India Rubber Tree)—This is the old reliable thick leaved variety—the substantial house plant. Its foliage of a beautiful dark green, shiny appearance, being always handsome and striking. Each, 50c and \$1.00.

Repens—Directly opposed in character to the upright growing varieties, being really a creeping or trailing vine. It is extremely useful and ornamental for covering stone or wooden conservatory walls which it will do in a short space of time. Each, 50c; 3 for \$1.25.

Forget-Me-Not or Myosotis

Susanne—Of recent introduction. A great improvement on the older varieties, being earlier and a very prolific bloomer. Each, 25c; doz., \$2.00.

Genista Racemosa

Flowers are very small, pea shaped, borne in close racemes. When in full bloom the entire plant is a solid ball of the brightest yellow, emitting a delicious lemon fragrance. Very popular for Easter decorations, and will continue in bloom about four weeks. 3-inch pot plants, each, 30c; 4-inch pot plants, each, 50c.

Grevillea or Silk Oak

A beautiful plant for decorative purposes of quick growth and easy culture. Foliage fern-like and graceful. Each, 25c; 3 for 65c.

Fuchsias

A favorite with our grandmothers and a favorite still. Their color combinations are wonderful, and their easy culture and free flowering proclivities make them exceptional sellers both for Summer and Winter blooming. We can highly recommend all of the following listed below.

New Black Prince—This is an improvement on the famous Black Prince. The flowers are much larger, having the same color markings. The plant is stockier. This is perhaps the most beautiful of the Fuchsias. Price, each, 3-inch pots, 50c; 4-inch pots, 75c.

Trailing Queen—A handsome trailing type exceedingly floriferous with purple corolla and flesh-colored tube and sepals. A most effective plant for hanging baskets and window boxes.

Phenomenal-The largest flowering Fuchsia, with long stems, petals red and center bright purple. Black Prince-Red, single. A fine variety.

Little Beauty-Beautiful red sepals with purple corolla, single.

Pride of Orion-A fine new Fuchsia. Strong vigorous upright grower, flowers are white and extremely double. The blossoms do not drop and it is a very early bloomer.

Wonder Strapp - A new superior white and pink Fuchsia.

Prices, except New Black Prince, 3-inch pots, 25c; 3 for 65c; 4-inch pots, 40c; larger plants, 75c.

Fuchsia

Our collection of Geraninms is the largest in the Northwest. We devote several greenhouses to the culture of their many types and add new varieties as we find them worthy.

A Glimpse Into One of Our Geranium Houses

GERANIUMS

These old-time favorites offer an uninterrupted display of bloom over an extended period. Their ease of culture and clean growth holds them in the front rank among house plants and for cemetery decoration. We are listing some fine new sorts as well as the standard varieties which we have found adaptable to Northwest conditions.

OUR DE LUXE HOME GERANIUM OFFER

1 Michell's Sensation	strong 4-inch Pot Plant
1 Pink Barney	strong 4-inch Pot Plant
1 Red Barney	strong 4-inch Pot Plant
1 La Favorite	strong 4-inch Pot Plant

Value \$1.85—Sent Postpaid to You for \$1.40

Three Geranium Aristocrats

Michell's Sensation—A new scarlet Geranium, an improvement on the famous Helen Mitchell. Flowers are double and of the clearest possible shade of scarlet. A wonderfully heavy bloomer and it has no equal as a pot plant or bedding plant. Price, each, 3-inch pot, 30c; 4-inch, 50c.

Louisa—A darker crimson than Michell's Sensation; large double flowers, stocky plants. The foliage is extremely beautiful on this variety. A fine new improved Geranium. Price, each, 3inch pot, 30c; 4-inch pot, 50c.

Anna Jelenick—This is by far the best winter bloomer that we have seen. The flowers are a rich rose color and are double. The foliage is marked very prettily. A fine type. Price, each, 3-inch pot, 30c; 4-inch pot, 50c.

Special Collection of the Above 3 Varieties from 3-inch pots, 80c; from 4-inch pots, \$1.25.

SINGLE VARIETIES

Mme. P. Morlan—Rosy salmon, free bloomer. Sentinel—Dark crimson, round flowers. Scaramouche—Salmon, shading to white at top of petals.

Vera Onlianesk—White, clear, perfect flowers. Yvette Prost—Rosy pink, fine for window boxes.

IVY LEAVED GERANIUMS

This class of Geraniums is rapidly growing in popularity. They are very free bloomers, and lend themselves splendidly to house culture. James Atfield—Large pink double flowers.

Leopard—Lavender pink dotted with crimson.

Souvenir de Chas. Turner—Deep bright pink.

Achievement—Rose with white eye.

Wm. Tracy—Double, light pink, a rather short habit of growth, very fine.

La Eleganta—Beautiful variegated foliage, white

and green at first; later the white spots turn to scarlet.

VARIEGATED GERANIUMS

Happy Thought - Leaves yellow, center bordered with green, flowers rose.

Specimen of 3 and 4-inch Pot Geranium

Madame Salleroi—Bushy variety, used for borders, fine with Lobelia. Foliage green and white.

Mountain of Snow—Fine foliage variety, silver edge, flowers red.

Mrs. Pollock-Foliage yellow, green and red variegation; flowers red.

SCENTED GERANIUMS

Balm—Well known, large foliaged, rose scented.

Lemon—The small foliaged old-fashioned Lemon
Geranium. Very fragrant.

Rose-Scented—Very popular. Flowers pink.

Apple Blossom Geranium—A variety in great de-

mand for its refreshing apple blossom perfume.
PRICES OF GERANIUMS—SINGLE OR

DOUBLE-PREPAID

Strong 3-inch Pot Plants, each, 25c; 3 for 65c; doz., \$2.50. Strong 4-inch Pot Plants, each. 45c; 3 for \$1.20; doz., \$4.50.

Strong 5-inch Pot Plants, each, 70c; 3 for \$1.90.

6 at dozen rate. Extra large plants from 5 and 6-inch Pots, \$1.00 and \$1.25 prepaid.

STANDARD VARIETIES (Double)

Helen Michell-A fine semi-double type of a clear scarlet color, with very large florets and truss. Foliage a lustrous green, bushy and compact, early and free bloomer.

a Favorite—White, one of the best Louis Madeline—A deep pleasing rose color. Marquis de Castellaine—Crimson, with immense trusses of bloom.

Jean Viaud—Grand pink bedder.

Madonna—Snow white, good bedder.
M. Paul Blondeau—Bright rose, very large

flower.

Mrs. R. Gloide — A semi-double—with bright deep pink flowers. The trusses and florets are very large, and very free flowering.

Red Barney—This variety stands out in bold relief among red Geraniums. It has broad, velvety, distinct foliage and vigorous habit—a full large round truss of double petals—a brilliant crimson red brilliant crimson red.

Pink Barney—An excellent pink having all the outstanding features of the Red Barney.

Beautie Poitevine—A beautiful type of semidouble Geranium. Exquisite salmon pink flowers, the very best of its color.

OUR MAIL BAG SPECIAL -Strong 3-inch Pot Geraniums-All Different—Our Selection Delivered Prepaid to You for Only 75c

Pelargoniums or Martha Washington Geraniums

Our stock of Pelargoniums is beyond reproach and like our Geraniums we devote several houses to their culture and careful selection.

Mons Herzog—This has proved to be the most popular Pelargonium. Beautiful reddish salmon pink flowers borne freely and it retains its blossoms longer than any other variety and is a strong sturdy grower.

Easter Greeting — Its flowers, which are borne in great profusion from March until late Fall, are a fiery amaranth red, each petal bearing a blotch of deep brown or black and very large. It is of a very compact and bushy habit, and of easy house culture.

Gardeners' Joy-Nearly white, with an apple blossom pink at base of flower, the two upper petals blotched with deep brown. Produces one of the largest clusters of bloom of any known variety.

A Glimpse in One of Our Pelargonium Houses

Wolfgang Goethe-Flowers large and slightly crimped, ground color dark red, with five well defined violet black spots. Considered the best dark variety.

1. 15-1 170 1 150 1

Wilhelm Hauff-Flowers and clusters very large and strongly crimped. Ground color a purplish pink, with large brownish blotches on the upper petals. A profuse bloomer.

German Glory-Ground color an apple blossom pink with large dark brown blotches on upper petals; flowers and clusters are large; free bloomer and dwarf, robust branching habit,

Eastern Star-A light salmon color, with five large reddish brown spots. Has a long period of bloom, and is a dwarf compact grower.

W. C. Boyce—A beautiful shade of salmon.

Madam Layal—(The Pansy Geranium)—Small delicate pansy-like blossoms. Of easy house culture and a most profuse bloomer.

California Hybrids-Fine stocky plants in this class with mixed colors involving all shades except those of the famous Easter Greeting.

Springtime—An improved beautiful very light pink.

Prices of Pelargoniums-Each, from 3-inch pots, 25c; each, from 4-inch pots, 45c; each, from 5-inch and 6-inch pots, 75c and \$1.00. Specimen plants, large, \$1.50 and \$2.00.

Princess May

YOU WILL WANT PLANTS THAT GROW IN MONTANA AND THE NORTHWEST WE OFFER YOU OUR 43 YEARS' EXPERIENCE IN MONTANA

You will want a hanging basket or perhaps two for your porch or entrance at the prices we are able to offer them for this year. Our baskets can be filled with your choice of color scheme or left to our judgment. Prices range depending on the size of the basket and the number of plants used. Prices, each, \$1.25, \$2.00, \$3.00 and \$4.50. Not prepaid.

Porous Pottery Hanging Baskets

Hanging porous pottery baskets are rapidly becoming more popular, owing to the fact that they hold moisture much longer than the moss-lined wire baskets, and are much more durable. We can supply these in 8-inch and 10-inch sizes. These pottery baskets are supplied with attached saucers to eliminate dripping.

Empty, each, 8-inch, \$1.50; 10-inch, \$1.75.

Filled, each, 8-inch, \$3.50; 10-inch, \$4.50. Express extra.

Heliotrope

Heliotrope will succeed in or out of doors. Their exquisite perfume makes them a favorite everywhere. Centifleur-One of the newer forms of medium lavender

color, with enormous heads of bloom.

Elizabeth Dennison — A very compact large flowered form, almost violet in color. Florence Nightingale — A lavender colored type, very floriferous. Prices, each, 30c, 40c, 60c.

Hydrangea

A wonderful plant for Easter decoration, but they are becoming more popular each year for use on porch, lawn, or garden during the Summer. Our Hydrangeas are of

the new French types and of easy culture.

During the Winter the plants should be kept in a cool light cellar without freezing. Only enough water supplied to keep the roots from drying out.

Colors are pink, blue and white. Season is April to

Prices, fine plants in blossom, \$1.00 to \$3.00.

Specimen Wire Hanging Basket Filled

Hepatica

Hepatica Triloba-Leopard Plant-Also called Liver Leaf. A novel plant with handsome foliage having bright yellow spots. A sturdy grower and of easy culture. Each, from 3-inch pots, 30c; 3 for 75c.

Hibiscus

Well known Evergreen tender shrub which may be grown either in a pot or tub, or planted out during the Summer. In salmon, light rose, scarlet and soft pink. Each, 50c.

Set of four, all different, \$1.50. Special larger sizes at \$1.00.

Hoya Carnosa or Wax Plant

An old-time favorite indoor climber, bearing trusses of flesh colored, star shaped, wax-like flowers. Rich green foliage. Each, 30c; 3 for 75c.

Porous Pottery Hanging Basket

Impatiens Sultani

The everblooming Sultani should be in everybody's collection. The dainty little flowers which cover the plant in a mass are a bright pink or red in color. It makes an ideal house plant and is popular as a bedding plant, especially for shady nooks. Price, each, 3-inch pot plants, 25c; 3 for 65c; 4-inch pot plants, 40c; 3 for 90c.

OUR FAMOUS NEW PANSIES

Swiss Giant Pansy

Golden Gleam Nasturtium DOUBLE FLOWERS

A remarkable development in this popular and easily grown species. The flowers are sweetscented and are double in their nature, very large and a beautiful golden yellow. The plant is of semi-trailing habit and bears the blooms well above the foliage on strong stiff stems; fine for cut flowers. This new race is as distinct an advance over the old type of Nasturtiums as the Dahlia flowered Zinnia is over the original type. We again are offering strong started plants of this fine new novelty at 20e each; 3 for 55c.

SPECIAL NOVELTY COLLECTION.

- 1 Plant Golden Gleam Nasturtium
- Plant New Japanese Petunia 6 Plants New Swiss Giant Pansy
 - Delivered Prepaid to You for

"Golden Gleam" Nasturtiums Growing in One of Our Greenhouses

There is scarcely a garden without its bed of Pansies and rightly so for the "little flower faces" have inspired all flower lovers.

We are the most extensive growers of Pansies in this section and specialize only in the finest strains obtainable. The new Swiss Giants which we are offering this year are particularly fine. All our plants are clean and hardy and of vigorous growth. Plants are either in bud or bloom by May 1st and are packed in such a way that the root system is undisturbed and the plant receives no setback in its growth, despite the fact that this practice costs us more in shipping the plants. We use five large greenhouses for our Pansy stock as well as nearly an acre in our Nursery.

Prices of Pansies (our Giant Flowcring Premium Strain), mixed, per dozen, 75 cents prepaid.

Pansies can be supplied in separate colors: Light blue, pure yellow, black, red shade, dark purple, golden bronze, pure white and henna or tango red and mixed.

Giant one-year-old Pansies: Clumps taken from the field, very large. Price per doz., \$2.00.

Can also be supplied in separate colors the same as above.

Improved Swiss Giants—A new strain that is rare with some beautiful new shades. The flowers are larger and the stems strong. Every Pansy lover will want some of the new Swiss Giants in the garden. They have gained the reputation of the world's most brilliant and magnificent of all Pansies. Mixed only, 90c per doz. prepaid.

Petunias

No bedding plants can make a more pleasing display than Petunias and none are freer blooming nor give a more continuous succession of blossoms than do these plants.

DOUBLE PETUNIAS

Edna—Pink mottled white. Guy—A beautiful light pink. Jerome—Purple with white edge. Snowball—Finely fringed white. Talma—Clear pink.

Double Rosy Morn—A new Petunia that has surpassed all expectations. The flower is deep pink and the plant is very bushy and stocky.

SINGLE PETUNIAS

Ruffled Monsters-Prized for their exquisite markings and colorings. Greatly improved type.

Giant Fringed-Mixed colors.

Diener's Pink Glory-One of the most handsome Petunias for porch boxes and bedding purposes. Rosy Morn-(Single)-A splendid and favorite bedding variety.

Blue Jay-A real Royal Purple of recent introduction. A good companion to Rosy Morn.

PRICES OF PETUNIAS-Each, 3-inch, 25c; doz., \$2.50. Each, 4-inch, 40c; doz., \$3.75.

New Japanese Petunia—Sakatas—This is a new fine all double variety of a giant fringed type coming in colors of light pink, and lavender and white and pink.

PRICE—3-inch pot plants, 35c; 3 for 90e; 4-inch pot plants, 65c; 3 for \$1.65 prepaid.

New All Double Japanese Petunia

Passion Flower

StimUplanT Makes a Wonder Garden

A highly deco-

green

attain a

margined

Tradescantia

Primula Malacoides

New Baby Primrose-Ericksonii-A distinctly better lavender than ever before in this class. Plants have a very vigorous and bushy growth with masses of bloom. Each, from 4-inch pots, 65c; from 5-inch pots, \$1.00.

Tradescantia or Wandering Jew

Beautiful trailing vines. One of the most used plants for hanging baskets and window boxes.

Three varieties:

Green foliage—very rapid grower.
 Green foliage—striped with gold.
 Green foliage—striped silver and red.

Each, 20c; doz., \$2.00. One each of the three varieties, 50c.

luberoses

One of the most delightfully fragrant and exquisite of all Summer blooming plants. Plant the bulbs as soon as the ground becomes warm. Our specialty is the Excelsior Double Pearl variety. Each, 15c; 3 for 35c.

Wallflowers or "Goldlack"

Our plants of this old favorite are raised from the finest strains which have been developed by European specialists.

Wallflower—Blood Red—A very robust and sturdy grower, with fine foliage, producing enormous spikes of bloom of a reddish brown.

Wallflower-Paris Market - A beautiful variety which may be treated as an annual. Set out early in the Spring and you will have flowers all Summer. Either variety from 3-inch pots, 25c; 3 for 65c.

Salvia Scarlet Sage

Harbinger—One of our most valuable Summer bedding plants. The flowers are larger and more profuse with their long erect spikes of most brilliant scarlet flowers. Plant in a sunny location. Each, 25c; doz., \$2.50.

Blue Salvia—A very handsome plant of the same type, but having beautiful blue flowers. Price, each, 25c; doz., \$2.50.

Saxafraga Saramentosa

Aaron's Beard—Mother of Thousands—or Strawberry Geranium— This is a handsome plant of a wonderful trailing habit, with brightly variegated foliage. It will thrive under most adverse conditions. Each, 20c; 3 for 55c.

Sanseveria Zeylanica

Commonly called "Zebra Plant," of very easy culture and a plant that will withstand dust and dry weather without injury. Its tall, fleshy leaves are alternately barred green and white. Each. 50c; larger plants, 75c, \$1.00 and \$3.00.

Laurenti—A recent introduction, the variegation of the foliage being a rich yellowish golden cream instead of white. Each, \$1.00 and \$2.00.

Shamrock

The true small-leaved Irish variety. Pot plants, each, 20c; 3 for 50c (in season).

Verbenas

The Verbena without doubt is one of the most valuable bedding plants for use in the Northwest. They bloom continuously through the Summer. Their free flowering proclivities and brilliant shades of coloring render them attractive to every lover of flowers.

Verbena—Oxford Beauty-This is a very large flowered clear pink variety.

Other colors: Scarlet. pink, white, blue shades, purple, white and striped. Each, 20c; doz., \$2.00.

Our Famous Helena Violets

Violets

We have found that Violets under proper cultivation can be grown in Montana that are the equal of any in the entire country. As an evidence of this fact, the demand for our famous Helena Violets has increased so rapidly that it now requires seven of our largest greenhouses to satisfy the demands for them. We might add that our Violets won the silver medal at the National Flower Show at Detroit in 1927. We offer strong, vigorous plants, free from disease.

Governor Herrick-Flowers of rich purple borne

on good stems and very prolific.

Princess of Wales — One of the best varieties grown. Flowers very large, long stems, a very profuse bloomer, and extremely fragrant.

Price of above two Violet varieties, each, strong 3-inch pot plants, 30c; 3 for 75c.

Vinca

(See Japanese Tubs, Page 11)

This is without a peer as a decorative vine for porch boxes and hanging baskets. The demand for it in the United States runs into the millions each year, and is steadily growing.

Either in green foliage or variegated. Each, 3inch pots, 20e; 6 for \$1.00. Each, 4-inch pots, 40c; 6 for \$2.00.

"Temple" Dahlia-Flowered Zinnia

Our Wonderful Temple Zinnias

Giant Dahlia Flowered

The largest and most beautiful strain of these fine annuals and in a variety of gorgeous colors. The plants we offer are all of the standard and novelty shades, healthy, strong and vigorous. To insure good plants for extra early flowering we are growing quantities in 3-inch pots. Prices from pots, per doz., \$1.25; bench grown, per doz., 50c.

PALMS

No collection of plants is complete without Palms. Our Palm house receives most enthusiastic attention from our many visitors. The varieties listed below are the best for house culture in the Northwest.

CULTURE—Water the soil about twice a week and sponge the leaves frequently with tepid water, to preserve health and discourage the accumulation of dust or marauding pests.

Phoenix Roebelenii—A very dainty and graceful Palm, having a dense growth of light and feathery foliage. Hardy and very easy to care for. Price, each, 4-inch pots, \$1.00; 5-inch pots, \$1.50 up to \$2.50.

Kentia Belmoreana-One of the most graceful varieties of Palms on the market. Their long arching stems and fan-like canopy of richest green make them general favorites. They are very hardy and can be grown in the house for years with wonderful success. Each, \$1.00, \$1.50, \$2.00, \$4.50.

OUR SPECIAL PALM OFFER

- 1 Fine Strong Phoenix Palm
- 1 Fine Strong Kentia Palm

Both sent prepaid to you for \$1.50

One of Our Fine Kentia Palms

ROSES

Our Peerless large one and two-year-old Roses that grow in Montana and the Northwest. All of our Roses listed on this page come to you dug with a ball of earth at the roots. Thus the root systems are undisturbed and growth is unchecked.

Our Rose Plants

Our prices are prepaid. Notwithstanding the fact that the practice adds materially to the cost of delivery, we ship only Rose plants which retain the ball of earth in which the plants were grown. This is of great value to our customers because it practically eliminates the danger of slow starting or loss of plant due to drying out or other injury to the delicate root system of the plants. The only care necessary in planting our Roses is to set them out as soon as practicable after delivery, firming the earth tightly around the roots and soaking thoroughly and to take care not to disturb the ball of earth around the roots.

Because of this method of handling our Roses should not be confused or compared with those from most firms, since it is a general practice with most nurseries to ship plants from which all earth has been washed, greatly increasing the danger of the roots drying out in transit and of other injuries to the plants.

Fr. Karl Druschki

American Beauty—One of the largest, sweetest and best of all hardy Roses.

It is a quick grower, constant bloomer; color, rich rosy crimson, shaded and veined in the most charming manner. One of the finest Summer Roses.

Briarcliff—Bud one-third longer than Columbia, very large, long pointed flower, lasting, moderate fragrance, deep rose-pink at center, passing to lighter on outer petals, with a touch of citron-green at base, borne singly on long, strong stem.

Commonwealth—A deep pink, of medium strong stems, of moderate fragrance. Buds large, long and pointed, the open flowers being double and very lasting.

Frau Karl Druschki—Commonly known as the Snow Queen or White American Beauty. One of the purest white Roses known. Very large blossoms with immense petals of splendid substance.

General Jacqueminot—"General Jack"—A celebrated Rose with shapely buds and handsome flowers of brilliant velvety crimson. Very fragrant.

Kaiserin Augusta Victoria—One of the best white Roses ever introduced. A most sturdy grower with large perfectly formed and fragrant flowers.

Hermosa—A dandy for Montana; introduced in 1840, but still retains its popularity. While it is of the Bourbon type, it is of a free-blooming nature, with finely formed flowers of a soft deep pink.

Clothilde Soupert—Often called the Cemetery Rose, as it will bloom and thrive with so little care. It is a cluster bloomer, white, shading to a light pink, of dwarf growth and very fragrant.

Sunburst—A splendid Rose of vigorous habit and one of the largest of the H. T. type. The color is an orange-copper or golden orange, very intense, giving a most brilliant effect. It has proven a fine garden Rose for the Northwest.

Gruss an Teplitz—or Prairie King — A dazzling, fiery crimson Rose, one of the best for the Northwest.

Legion—A lasting cerise-red which produces well-shaped globular, fragrant buds. One of the finest cut flower varieties.

Los Angeles—One of the finest Roses ever introduced. The growth is vigorous and produces a long-stemmed flower of a luminous flame-pink, toned with coral and tinged with gold at the base of the petals.

Mrs. F. R. Pierson—A rich deep red, of fine foliage and very few thorns, very fragrant and free flowering. It is the red Rose of the season.

Mme. Caroline Testout—Clear, bright satiny pink; flowers very large and extremely showy. The famous Rose of the City of Portland.

Premier—Dark pink flowers of full size. Very fine form and pleasing fragrance, borne singly on stiff, almost thornless stems.

Rose Hill—A new sport from Columbia, color a brilliant pink. Fine bud and flower. A good Summer Rose and destined to be the most popular pink Rose ever introduced.

Rapture — A second generation sport of Ophelia through Butterfly. It is intensely brilliant in its vivid coloring of bright apricot, coral, rose and gold; it has more petals than its parent, and produces more blooms per plant than the Butterfly.

Talisman—One of the most astounding novelty Roses produced in many a year. Its brilliant orange red buds open to a large fragrant, highpointed bloom of glowing golden yellow, stained with copper red and orange rose on the inside of the petal.

Templar—Clear, even shade of red of exceeding double form and strongly perfumed. Vigorous, upright, abundant and continuous bloomer.

Pink Radiance—Flowers are a beautiful shade of the richest tone of pink. Darker on the inner surface of the petals than on the margins. The buds are exceptionally large and fine.

Red Radiance—Stands among red Roses without a superior. It is a remarkable bloomer.

OUR PRICES—PREPAID

Large 2-year-old plants, \$1.50 each; 6 for \$7.50. One-year-old plants, 50c each, 10 for \$4.20.

SPECIAL OFFER—A

Talisman

CLIMBING, RAMBLER AND RUGOSA ROSES

Climbing Roses

THE SENSATIONAL NEW HARDY CLIMBING ROSE Blaze

Introduced for the First Time

(See Front Cover)

Blaze—(Everblooming Paul's Scarlet Climber)—Plant Patent No. 10. A seedling of Paul's Scarlet Climber and Gruss an Teplitz or Prairie King. A marvelous, hardy, everblooming scarlet red rose, combining the bloom and growth of Paul's Scarlet Climber with the everblooming habit of the Gruss an Teplitz. Very vigorous and seldom out of bloom. Can be pruned very low for bedding; medium for shrub use; or trained as a climber. Price, each, \$3.00 prepaid.

Paul's Scarlet Climber—One of the hardiest and best of the climbing Roses, bearing large semi-double scarlet shaded crimson flowers, long blooming and holding flowers long after many June bloomers have dropped their petals.

Climbing American Beauty—This is one of the best of the climbing Roses and a very strong, vigorous grower. It is a seedling from the well known American Beauty. Almost a continuous bloomer, a vigorous climber and is extremely hardy. The flowers are a rich rosy crimson.

Dorothy Perkins-Shell pink, very fragrant, blooms in clusters, vigorous climber.

Crimson Rambler—This Rose is of vigorous growth. It flowers in clusters forming a mass of vivid crimson beauty. Prices of Climbing Roses except Blaze, 1-year-old, 75c; 2year-old, \$1.50 prepaid.

Baby Ramblers

Crimson Baby Rambler—(Erna Teschendorf)—A dwarf form of the Crimson Rambler, with deep crimson clusters of bloom flushed with carmine.

Pink Baby Rambler—(Le Marne)—A dwarf type of bushy habit, producing beautiful panicles of bloom the whole Summer. Semi-double flowers, bright rose at the edges, rosy-blush inside.

Golden Salmon—The newest Polyantha and one of the best. The blossoms are borne in thick clus-ters and are semi-double. Their color is a beau-tiful red salmon overlaid with a sheen of orange and gold.

PRICES OF ABOVE RAMBLER ROSES-1-yearold, 75c; 2-year-old, \$1.50.

YOU WILL WANT ROSES THAT ARE ADAPTED TO THE NORTHWEST

Golden Salmon Rambler

and the same to be a second track to the same of the s

Hardy Rugosa Roses

A very hardy type that will winter over without covering. and the second testings

A Fine New Hardy

Rugosa Rose VANGUARD

(See Inside Front Cover)

Vanguard—A brand new Hybrid Rugosa. A new color for the Rugosa tribe. A beautiful orange, salmon and gold. Combining some of the beautiful characteristics of the beautiful Tea Rose with the orthogonal bandings and wigon and bloom with the orthogonal bandings. with the extreme hardiness and vigor and blooming qualities of the Rugosa. Splendid as a specimen bush. Each, \$2.50 prepaid.

F. J. Grootendorst—A cross between the Rugosa Rubra and the Crimson Baby Rambler. Flowers are small, double and borne in great profusion in clusters and are a bright crimson in color. The foliage is exceptionally beautiful.

Pink Grootendorst—A charming shell pink form of the F. J. Grootendorst with the same true Rugosa growth. Blooms profusely throughout the Summer season. A splendid hedging Rose or Shrub for massing.

Hansa—A very hardy variety with dark purple red flowers. Excellent for foundation plantings.

Sir Thomas Lipton-A fine vigorous grower with large double white flowers. A really remarkable white Rose.

Belle Poitevine-A fine Rose of this type with brilliant magenta-purple flowers, produced unceasingly on vigorous plants. A splendid variety for landscape use.

Blanc De Coubert—Another fine double white sort which has gained rapid favor.

Amelie Gravereaux-A very vigorous and productive grower, producing flowers of a bright pur-ple red, very fragrant. It is almost a climber and makes a wonderful pillar.

Prices of Rugosa Roses (except Vanguard): Strong 2-year-old bushes, shipped without ball of earth, each, 75c, 3 for \$1.75; shipped with ball of earth, each, \$1.50, 3 for \$3.75.

BRIAR ROSES

Rosa Hugonis

Rosa Hugonis—This Rose has surpassed all our expectations both in growth and beauty. For hedge purposes it cannot be equalled and it is also ideal for foundation plantings for specimen purposes. Matured bushes attain a height of six feet, with corresponding spread. The flowers are single, flat to cup shaped, set singly the full length of the arching canes. Color very noticeable and varying in shades of yellow from deep gold to canary. Extra large nice bushes, \$2.50; smaller, each, \$1.00; 3 for \$2.75 without ball of earth.

Harrison Yellow—A fine hardy Rose of single free flowering proclivities. This type of Rose does not as a rule require very much pruning, only to remove the dead and superfluous wood. The bushes make fine specimens for lawn and garden and need very little protection if any to stand our severe winters. The bush bears its flowers profusely and they are a rich golden yellow in color. Field grown plants, each, \$1.25, shipped without ball.

the state of the s

Persian Yellow—A large and very fine double Rose, which flowers most freely. The blossoms are of a deep golden color, being borne with great intensity with little or no pruning. This Rose is also very hardy and a very vigorous grower. Field grown plants, each, \$1.25, shipped without ball. (It is the Harrison and Persian Yellow Roses which are seen blooming so profusely around the vicinity of Mammoth Hot Springs in Yellowstone Park.)

HARDY PERENNIALS

We are the largest growers of Perennials in the Northwest. Our collection, which affords such a wonderful and colorful display every Summer and Fall, is the largest and best in this section and we are continually adding to our stock. With no other class of plant is it possible to have as continuous a display of bloom and beauty, with as little effort, from early Spring to the killing frosts of Fall, as with Hardy Perennials. For our climate in the Northwest there is no question but that they are by far the best class of plants for those who desire a profusion of bloom for the garden with the least expenditure of effort. Give them ordinary good soil enriched occasionally with well rotted manure or Vigoro and keep them watered at proper intervals, or just simply water when you can see they are dry. As soon as the first killing frosts in the Fall have killed the top growth, remove the dead tops and cover the plants with a mulch of dead leaves or straw. In the Spring when growth has started add a little of a good commercial fertilizer and cultivate lightly into the soil; this will furnish them the food and stimulus to bring out their best growth efforts.

Achillea

The Pearl—A well known form of this flower, with handsome white double flowers. Height 2 feet. Strong plants, each, 25c; doz., \$2.50. Large field grown clumps, each, \$1.00.

Anthemis or Hardy Marguerite

Kelwayii (Improved)—Daisy-like yellow blossoms produced all Summer. Finely cut foliage. Excellent for cut flowers. Each, 25c; 3 for 65c.

Arabis Alpina or Rock Cress

A very early low flowering plant valuable for rockery and edging. It forms a dense carpet, and is literally covered with white flowers. Each, 25c; 6 for \$1.25.

Hardy Asters or Michaelmas Daisies

These beautiful Hardy Perennials grow from 2 to 3 feet high. They are covered late in the Fall with myriads of single blooms, and are exceedingly useful for cut flowers.

Perry's White-One of the finest whites on the market.

Lillian Fardell—Rosy pink.

Lady Lloyd-A very fine clear rose pink.

Climax—A fine deep blue.

Feltham Blue-Considered one of the best.

Praecox—Rosy purple.

F. W. Raynor-Fine pink; growing about 2 feet high, very bushy habit.

Each of the above, 25c; 3 for 65c. Large field grown clumps, each,

Collection of above 7 varieties for \$1.35

Alyssum Saxatile or Gold Tuft

One of the most useful plants either for rockery or border. Produces large flat heads of yellow flowers. Early, strong young plants, each, 25c; per doz., \$2.50.

Anchusa in Our Nursery

Aquilegia—Columbine

Aquilegia or Columbine

Our New Long Spurred Hybrids We have been selecting flowers of the long spurred varieties until we believe we have some of the very best of this class of flower. Our strain contains the following shades: white, blue, blue and lavender, scarlet and red, and pink and rose shades. Strong young plants rose shades. Strong young plants, each, 25c; 6 for \$1.25. Large field grown clumps, each, \$1.00.

Anchusa Italica

Dropmore Variety—Very free flow-ering plants of a branching habit, with flowers of a gentian blue, and very attractive. Almost continuous bloomer in this section after June. Height 3 feet. Strong plants, each, 25c; 3 for 65c.

Arenaria

Caespitosa—Plants form a dense velvety green carpet and very much in demand for planting between flagstones and cavities in the rockery. Each, 30c; 3 for 75c.

Artemisia

Lactiflora—A very effective and most desirable plant either for the border or as a plant among shrubbery. Height about 4½ feet. Fine foliage and large panicles of Hawthorne-scented creamy white flowers. A splendid cut flower. Each, 25c: 3 for 65c.

Armeria—Sea Pink or Thrift

Very attractive dwarf plants that thrive in any fairly good soil. Very useful in the rockery and for the border.

Formosa—This is a splendid variety having heads of rosy pink flowers; is a vigorous grower and hardy. Each, 25c; 6 for \$1.25.

Aubretia or Rainbow Rock Cress

Very pretty dwarf growing plants suitable for the rockery or for edging. They form masses of silvery green foliage and masses of flowers in Spring and Summer. Each, 25c; doz., \$2.50.

Bougainvillei—A real gem for the rockery with flowers of light violet purple. Strong plants, each, 30c; 3 for 75c.

Hardy Asters

Campanula Media

Cerastium Tomentosum or Snow in Summer

A very desirable plant for covering as with a white carpet dry, sunny places. Low growing with white foliage and flowers. Very fine for planting on graves. Strong plants, each, 25c; 6 for \$1.25.

Campanula or Canterbury Bell

Our Campanulas during the past four seasons were exceptionally fine and were greatly admired by nurserymen from far and near. Campanulas love rich soil and a half shady location. Stake the taller varieties.

Media—Single in colors of dark blue, white, light blue and rose. Each, 40c; 6 for \$2.00.

Calycanthema (Cup and Saucer Canterbury Bells)
—In this variety the calyx is the same color as the flower, giving it the appearance of the cup and saucer. We offer them in the following shades: rosy pink, dark blue and pure white. The above in 4-inch stock—all extra quality, 40c; 6 for \$2.00.

Carpatica (Carpathian Harebell)—A pretty species growing in compact tufts, flowers clear blue. Blooms all Summer; excellent for the rockery. Each, 30c; 3 for 75c.

Pyramidalis (The Chimney Bell Flower) — Blue salver-shaped flowers, 3 to 5 feet. Each, 25c; doz., \$2.50.

Chrysanthemum Maximum or Shasta Daisy

A few Shasta and Elders Daisies should be in every garden. Fine for cut flowers and garden contrast.

C. Maximum King Edward VII—A splendid Daisy. Beautiful for cut blooms, two or two and a half feet high.

C. Shasta Daisy—"Alaska"—(Burbank's Improved)
—Something new in Shasta, and very fine.

HARTJE AND ELDER'S HARDY DAISIES

A very useful early form of the Shasta Daisy. Very free flowering Hardy Perennial.

Prices of Shasta and Elder's Daisies: Each, 25c; 6 for \$1.25. Large field grown clumps, each, \$1.00.

Cress—Water

Cress (Water). While this Hardy Perennial aquatic plant really thrives the best along a running stream, it will prove a sturdy and successful grower if kept in very moist soil. Try a plant or so in your Lily Pool, where they will thrive perfection. Potted plants, each 25c; 3 for 65c.

New White Double Giant Shasta Daisy

DOUBLE SHASTA DAISY—This new creation bears an immense double flower which resembles a giant aster very closely. The flower is white with a small double disk in the center which is hardly noticeable. The plants are extremely free flowering and the flowers are borne on strong stems. All Daisy lovers will want this fine new Daisy. Strong plants, each, 50c; 3 for \$1.25.

Bleeding Heart—(See Dielytra page 26)

Boltonia or False Chamomile

Among the most showy of our Hardy Perennial plants, with large single flowers, resembling a single Aster.

B. Asteroides—Pure white.

B. Latisquama—Pink tinged, lavender, each. 25c; 3 for 65c.

Candytuft, Hardy (See Iberis, page 27)

Centaurea

Centaurea Montana—The Perennial Cornflower. A very handsome Hardy Perennial, bearing blue and white flowers, growing about 18 to 24 inches. Mixed—blue and white, each, 25c; 6 for \$1.25.

Cheirianthus

Cheirianthus Allioni (Siberian Wallflower) — A beautiful rock plant, dazzling fiery orange flowers on stems about a foot high. Best used as a biennial. Each, 25c; 3 for 65c.

Columbine (See Aquilegia, page 24)

Coreopsis

C. Lanceolata Grandiflora—It bears golden yellow blooms in great profusion and lasting well into Fall. Two feet.

C. Lanceolata Grandiflora Fl. Pl.—Semi-double—A fine addition to the herbaceous Perennials. Bears rich golden flowers on wiry stems in great profusion. Streng plants, each, 25c; doz., \$2.50. Field grown clumps, each, \$1.00.

Dianthus Barbatus or Sweet William

One of the most popular of outdoor bedding plants, throwing strong stems of brilliantly colored blossoms.

D. Latifolious Atracoccineus—(Everblooming Hybrid Sweet William)—A brilliant Summer bedding variety producing masses of brilliant fiery crimson flowers.

Holborn Glory—This is a large flowered selection of the auricul-eyed section, a most beautiful Sweet William.

Searlet Beauty-A very effective rich deep scarlet.

Pink Beauty — One of the prettiest among the Sweet Williams. Each, 25c; 6 for \$1.25.

Dianthus "Red Montana"

Dianthus or Hardy Pinks

Deltoides—A beautiful little plant with narrow leaves and bearing a profusion of small, crimson flowers early in the Summer. A gem for the rock garden (see color plate). Each, 35c; 3 for 90c.

Red Montana—A beautiful example of type, flowers large and borne in clusters, deep red in color. A very vigorous grower and the stems are long, making excellent cut flowers. Each, 30c; 3 for 75c.

Hardy Grenadine Carnations or Hardy Old Fashioned Pinks—
Beautiful shades of red and white. Prolific bloomers. Each, 25c; extra large plants, 75c.

Plumarius (Clove Pinks) — Flowers are pink, purplish and white and very fragrant; they are borne on long spikes. The plants are fine for border work or rock gardens, blooming continuously throughout the Summer. Each, 25c; 6 for \$1.25.

Highland Queen—The most brilliant single Perennial Dianthus in cultivation, bearing lustrous scarlet vermillion flowers. Ideal for bedding, borders or rock gardens. Each, 25c; 6 for \$1.25.

Cheddar Pink—A very compact grower, makes a cushion of glaucous

Cheddar Pink—A very compact grower, makes a cushion of glaucous leaves. Bears in profusion sweet scented rose-colored flowers. Ideal for the rock garden. Each, 25c; 6 for \$1.25.

(See Color Plate)

Few plants are as stately and decorative in the garden as the Perennial Larkspur. Our stock is from world famous strains and we have selected and re-selected our plants for type, vigor, style and decorative value. They thrive under any of the climatic conditions found in the Northwest and in any of the natural soils. The flowers should be removed before the seed pods form and the plants will bloom later in the season again.

Bellamosum—Dark blue form of Bella Donna. Very free from mildew.

W. S. McClellan-Tall, with semi-double flowers, very dark violet, shaded white in center.

Geraldine Kelway—A tall variety with pale azureblue flowers, single.

Strong plants, each, 25c; 6 for \$1.25. Large field grown clumps, each, \$1.00.

Chinense—Blue Butterfly — Improved. This is a fine new variety of the Chinense type. The plants average 12 inches in height, and bear rich aquamarine blue flowers and the foliage is delicate and feathery. Fine strong plants, each, 30c; 3 for 75c.

An old-fashioned favorite. Its long racemes of graceful heart-shaped pink flowers are always attractive. It is especially useful for planting in the shade. Each, 60c. Extra large field grown clumps, each, \$1.50.

Doronicum Excelsium (Leopard's Bane)

Splendid for cut flowers, having a good long stem. Will thrive almost anywhere. Pretty orange yellow. Very early. Strong young plants, each, 25c; 6 for \$1.25.

S. N. & S. CO.'S MIXED DELPHINIUM HYBRIDS After several years of selecting and re-selecting we have obtained some really exceptional varieties. Strong young plants, each, 25c; doz., \$2.50. Field grown clumps, each, \$1.00.

Bees New Hybrid Delphiniums Growing in Our Nursery

FEATURING OUR NEW BEES HYBRID DELPHINIUMS

This new strain develops the largest and most beautiful spikes of flowers we have seen. The colors are improved shades of blue, purple, turquoise blues, etc. The individual flowers on the spikes are immense with long stems. These new hybrids will be the show of your garden. (See color plate). Strong 3-inch pot plants, each, 35c; 3 for 90c. Field grown clumps, \$1.50.

Digitalis or Fox Glove

Gloxinaeflora—A beautiful strain of finelyspotted varieties in colors of white, purple, rose and lilac.

Giant Shirley—This variety is of extraordinary size and vigor, growing from 5 to 6 feet tall. Colors range from white and shell pink to deepest rose.

Prices of the above: Large 4-inch pot plants, each, 40c; 6 for \$2.00.

Dielytra-Bleeding Heart

Digitalis—Foxglove

Gaillardia or Portola Hybrids

One of the most beautiful of Perennial plants. The center of the blossom is a dark reddish brown with beautiful markings of brilliant crimson, orange and vermillion, and occasionally a combination of all. Each, 25c; 6 for \$1.25.

Mrs. Bradshaw-18 inches high. A splendid new variety with large double flowers of a fiery red, blooming nearly all Summer. Fine rock garden

Lady Stratheden-A new introduction of great merit, rich golden yellow blossoms; fine for hardy garden and the rock garden. Either variety, each, 25c; 3 for 65c.

Gypsophila or Baby's Breath

The Gypsophilas with their attractively arranged masses of minute flowers should be in every garden. If cut and dried will retain its beauty for months.

Paniculata—The popular old-time Gypsophila much admired for its feathery appearance. Price, each, 25c; 3 for 65c. Large field grown clumps, each. \$1.00.

Bristol Fairy—A wonderful new introduction; produces much larger panicles of flowers in which the individual blossom is larger and much purer white. Blooms continuously through the Sumner. Plants, each, 50c; 3 for \$1.25. Field grown clumps, \$1.50.

Helenium or Sneeze Wort

Riverton Beauty-Striking colored blooms, lemon yellow and purplish black. Each, 25c; 3 for 65c. Riverton Gem—Old Gold, changing to wallflower red. Price, each, 25c; 3 for 65c.

Helianthemum, Rock or Sun Rose

Low-growing evergreen plants, forming broad clumps, and which during their flowering season, July to September, are hidden by a mass of bloom: excellent for border plants or for the rockery. Each, 25c; 3 for 65c.

Heliopsis or Orange Sunflower

A valuable addition to the hardy border, blooming earlier than the sunflowers, and rarely exceeding three feet.

H. Pitcheriana--Flowers about two inches in diameter, double, of a deep golden yellow. Continuously in bloom all Summer. A splendid cut flower. Each, 25c; 6 for \$1.25.

Heuchera or Coral Bells

A splendid Hardy Perennial, with flowers of a bright red coral color. Excellent for cutting. Each, 25c; 3 for 65c.

Iberis or Candytuft

A most desirable hardy dwarf evergreen plant

flowering very early in the Spring.

Iberis Sempervirens—Pure white, innumerable flat heads of bloom. Each, 25c; 6 for \$1.25.

Iberis Gibraltarica—A very free flowering variety

with white flowers shading to lilac. Each, 25c; 6 for \$1.25.

Gypsophila—Bristol Fairy

Hollyhocks

Imperator-Hollyhock—A striking departure from the type in this splendid new Hollyhock. Outer petals elegantly fringed; in the center is a very double rosette about two inches across. Many charming color combinations. Strong 4-inch potted plants, each, 35c; 6 for \$1.85; doz., \$3.50.

Standard Varieties

The strain we offer must be seen to be appreciated, for the flowers are exceptionally large. Give them a well fertilized soil with well rotted manure deeply spaded, sufficient drainage together with plentiful supplies of water during the growing season, and success is assured in any location.

All plants come with a ball of earth from 4-inch pots and are good, strong stock that will give excellent results. The following colors:

WHITE DEEP ROSE CRIMSON MAROON

BLOOD RED SALMON YELLOW

From 4-inch pots, each, 35c; 6 for \$1.75

Hardy Ferns

Fine strong hardy plants. Just the thing for that shady nook in the garden or for the rockery. Two sizes, 35c each, 3 for 90c, and 65c each, 2 for \$1.15.

Lathyrus or Everlasting Sweet Pea

This is a Hardy Perennial Vine, growing to a height of about 3 to 4 feet, and after it once becomes established makes a thick screen or hedge if given support. They are very free bloomers, bearing flowers much resembling Sweet Peas. Of very easy culture and will succeed anywhere. In colors of red, white and pink. Each, 1-year-old plants, 25c; 3 for 65c.

Lysimachia or Loose Strife

(Creeping Jenny or Moneywort) A well known evergreen trailer bearing yellow flowers from June to August. Used for planting spots under trees, etc., where grass will not grow. Thrives anywhere, and is very hardy. Each, 25c: 6 for \$1.25.

Lysimachia—Moneywort

IRIS

The improvements that are being made in the The improvements that are being made in the Iris from year to year are so remarkable that if you have not seen the introductions of the past few, years you have no conception of what the modern Iris is like. Our Iris must not be confused with the old types and our list below contains a choice selection of beautiful and adapted types. Plant in a well drained sunny location and place the roots two or three inches under the ground with about an inch of soil over the rhizome where the roots start. The size of rhizomes varies greatly with different varieties. In the deries greatly with different varieties. In the descriptions that follow "S" indicates the standards or upper petals and "F" the falls or lower petals. Plant in Fall or Spring.

OUR HIGH ALTITUDE IRIS COLLECTION 8—Choice Named Varieties—8 Selected by Us Delivered Prepaid to You FOR ONLY \$1.00

- L. Candidum—Madonna or Annunciation Lily. Large white, fragrant and perfectly hardy. Each, 35c; 3 for 90c.
- L. Rubrum—Rosy pink with Amaranth spots and reflected petals. Each, 35c; 3 for 90c.
- L. Auratum—Golden banded Japanese Lily. Each, 35c; 3 for 90c.
- Easter Lily—Has proved hardy, with protection, in our gardens. Each, 35c; 3 for 90c.
- Lilium Regale—A magnificent Lily bearing pro-fusely white fragrant flowers; slightly shaded pink outside and the lower inner surface primrose-yellow. Flowering size bulb, each, 25c; 3 for 65c. (See Color Plate.)
- Lily of the Valley—Roots (pips) of this great favorite, three for 25c; doz., 75c.

Funkia or Plantain Lily

Variegata—Plants easy to manage, having broad, massive variegated foliage, blue flowers; fine for edging or borders. Each, 30c; doz., \$2.75.

Lythrum Roseum or Loosestrife

A very pretty Hardy Perennial, from 2 to 3 feet high, bearing spikes of rosy-pink flowers in great profusion from July to September. Each, 25c; 3 for 65c.

Lychnis

101/01 00-71 00

- Lychnis—Arkwright—A new introduction, 1 foot high, large orange, red, scarlet or crimson flowers. Ideal for rock gardens. Each, 35c; doz., **\$3.00.**
- Lychnis Chalcedonica—A fine old-fashioned flower bearing large heads of brilliantly colored flowers that give color to the hardy border during Summer and Autumn. Very hardy. Each, 25c; 3 for 65c. Field grown clumps, each, \$1.00.
- Lychnis Alba—A beautiful pure white form of the above, and a splendid companion to it. Each, 25c; 3 for 65c.

Myosotis or Forget-me-not

A wonderful type for the rockery and for damp places. Large rich blue flowers with yellow eye, profuse bloomer. Each, 30c; 3 for 75c.

Monarda or Bergamot

- Didyma Rosea—(Bee Balm)—Showy plants growing 2-3 feet high. Rose colored flowers. Aromatic foliage. Each, 25c; 3 for 65c.
- Didyma Cambridge Scarlet-A brilliant crimson scarlet. Each, 25c; 3 for 65c.

Nepeta

Mussini—It is of compact habit, forming dense tufts about 12 inches high with masses of light violet blue flowers. Each, 25c; 3 for 65c.

Nervosa—A superior variety to Mussini with flowers a clear light A fine subject for the rockery. Each, 30c; 3 for 75c.

Old Man

Old Man or Southern Wood - Dark green finely cut foliage with pleasant aromatic odor. Two feet high. Each, 25c; 3 for 65c.

Our Hardy Perennial Phlox

For years have specialized in the new and improved types with the result we have today a collection that has no equal in the Northwest. As a general rule they may be kept undisturbed for three or four years, after which time the clumps should be divided and reset. For growth and vitality our Northern grown stock can not be surpassed.

Africa — Brilliant carmine red with blood red eye. One of the best new dark red varieties grown.

Phlox-Thor

- Beacon—An outstanding variety. Excellent size and habit. Color an unmixed ripe cherry red.
- B. Comte-Brilliant, rich and highly pleasing to the eye. French purple, amaranth red, or wine
- Bridesmaid—A pure white with large crimson-carmine eye. A beauty.
- Elizabeth Campbell—The peer of all pink Phlox. Soft rose pink with lighter shadings and with a dark rose colored eye. The individual florets are immense in size.
- Ethel Pritchard-A beautiful rose mauve and one of the extra fine new sorts.
- Firebrand—One of the newest varieties. Very bright red with deeper center. Trusses large. Very strong and robust habit. One of the best.
- Jules Sandeau—A magnificent variety, of moderate height. Flowers are extremely large and are a soft lilac pink color.
- J. G. Von Lassburg—Splendid pure white, very free bloomer and medium early. The purest and largest white on the market.
- Milly—(Miss Milly Van Hoboken)—A gem with immense trusses of large flowers. Color a good bright pink with soft mauve suffusion.
- Miss Lingard—One of the easiest to grow and still one of the very best whites on the market. The flowers are borne in large trusses—blooms two weeks ahead of other varieties. Exceptionally good for cut flowers.
- Thor—A splendid grower, never giving trouble, always full of bloom. It is one of the best of the salmon pink sorts.
- R. P. Struthers-Bright rosy-carmine, with claret-
- Rheinlauder—One of the newer varieties of great beauty. A rare shade of salmon pink intensified by a distinct claret-red eye.
- Von Hindenburg—This is a comparatively new variety. Creates a great many spikes and grows from 24 to 30 inches high. Its color is a brilliant deep crimson red with slightly darker eye.
- Any one of the above varieties, each, 25c; 6 for \$1.25. Large two-year-old clumps from the field, each, \$1.00.
- Phlox Subulata "Mountain Pinks" An early flowering type with pretty moss-like evergreen foliage, which during May and June is hidden under the masses of pink bloom. Unexcelled for the rockery. Each, 25c; 3 for 65c.

SPECIAL PHLOX OFFER 1 Thor, 1 Elizabeth Campbell, 1 Miss Lingard and 1 Subulata-All for 75c Postpaid

Penstemon

The stock we list is Watkins & Simpson's Excelsior strain of world-wide reputation. grow from eighteen inches to two feet high, bearing gloxinia-like flowers. The colors come in a variety of shades. Each, 35c; 3 for 75c.

Barbatus Torreyi—Spikes 2 feet long of bright scarlet flowers. Very effective for the perennial border. Each, 25c; 3 for 65c.

Blue Gem—A fine hardy variety with flowers of a bright blue. Particularly fine for rock gardens. Each, 30c; 3 for 75c.

Physalis or Chinese Lantern Plant

Francheti—An ornamental variety of the Winter Cherry, forming dense bushes about two feet high, producing freely its bright orange-scarlet lantern-like fruits, which can be cut and dried. Each, 25c; 3 for 65c.

Physostegia, False Dragon or Virginia Heather

A beautiful Hardy Perennial, forming dense clumps four or five feet high, with long spikes of tubular pink flowers like a gigantic Heather and very valuable for cut flowers. Each, 25c; 3

Oriental Poppies

These really wonderful Perennial Poppies with their rich and gorgeous coloring stand out during their flowering season pre-eminently above all other flowers. Their large blooms—perhaps the largest of any of the Hardy Perennials—with their brilliant colors will attract the attention of any flower lover. They are of the easiest culture. Water freely during the flowering period.

Princess Victoria Louise—Salmon pink. Goliath-A large flowered bright scarlet of strong growth.

Strong plants, each, 25c; 3 for 65c. Large field grown clumps are available for early Spring planting or in the Fall. Each, \$1.00.

Iceland Poppies

One of the very first of Hardy Perennials to bloom in the Spring and to continue a mass of bloom for months.

New Sunbeam Varieties—This particular strain is a great improvement on the older varieties. The colors are a rich, deep orange, lemon and white. Each, 25c; 3 for 65c.

Pyrethrum Uliginosum

Chinese Lantern

Plumbago

Larpentae—This is one of the most desirable border and rockery plants. A dwarf spreading grower covered with a mass of deep blue flowers during late Summer and Fall just when this color is usually lacking from the garden. Each, 30c; 3 for 75c.

Potentilla

Single Hybrids—Charming hardy plants for the border. Flowers of orange, red and crimson tones produced in profusion during the Summer. Each, 25c; 3 for 65c.

Pyrethrum (1997)

Too much cannot be said about this superb Perennial, which will thrive under almost any conditions. Splendid for cutting.

Pyrethrum Uliginosum—(Giant Daisy) This Hardy Perennial grows from 3 to 4 feet high and produces in great profusion large daisy-like flowers. Strong plants, each. 25c; 3 for 65c.

Hybridium Mixed (Single) — In the choicest shades of red and pink. June flowering. Strong plnats, each, 25c; 3 for 65c. Field grown clumps, each, \$1.00.

OUR LITTLE PRUNING BOOK

Clear and concise methods of pruning fruit trees, small fruits, trees, hedges, vines, roses, etc. Each, postpaid, 25c.

StimUplanT Makes a Wonder Garden

Shasta Daisy—See Chrysanthemum Maximum, page 25

Stim Uplan I Makes a Wonder Garden

Sweet William-See Dianthus, page 25

Statice, Great Sea Lavender or Limonium

S. Latifolium—A noble plant for the hardy border. Produces clumps of leather-like leaves, with heads of bloom covered with small lavender flowers and lasting until frost. The flower sprays when cut and allowed to dry will keep in almost their fresh cut appear-ance for months. It has a fine appearance in the hardy border and has wonderful keeping and decorative qualities when cut and dried. Each, 25c; 3 for 65c. Field grown clumps, \$1.00.

Sedum Spectabile

Scabiosa

Caucasica—One of the handsomest of the Hardy Perennials, bearing on long wiry stems beautiful artistic lavender blue flowers. fine cut flower, 18 to 24 inches. Each, 25c; 3 for 65c.

Blue Bonnet-Dwarf compact Perennial variety of this ever-popular flower. Price, each, 25c; 3 for 65c.

Sweet Wivelsfield

Dianthus Allwoodi-Crossed with Sweet William (Dianthus Barbatus). Few plants can compare with it for wealth of color and length of flowering season. It is distinct in habit and freedom of growth. Wonderfully colored flowers in trusses and perpetual flowering. Plants, each, 25c; 3 for 65c. Field grown clumps, \$1.00.

Stokesia or Cornflower Aster

Cyanea-A beautiful hardy plant, bearing freely all Summer handsome light blue blossoms of immense size. The plants are of very easy culture and an excellent border or rockery plant. Price, each, 25c; 3 for 65c.

Trollius, Globe Flower or Giant Buttercup

Mixed Hybrids-Desirable free flowering plants. Colors ranging from pale yellow to a deep orange. Succeed well in a half shady location and they are wonderful for cut flowers and a gem for the rockery. Mixed colors only. Each, 35c; 3 for 90c.

Sweet Wivelsfield

~ Salvia

Azurea-Rocky Mountain Species. A fine Hardy Perennial averaging 3 to 4 feet in height under normal growing conditions. Produces late in the Summer pretty spikes of sky-blue flowers. Each, 25c; 3 for 65c. Strong field grown clumps, \$1.00.

Sweet Rocket or Hesperis

A Perennial that will succeed in any location, producing large spikes of blossoms varying from white to lilac. The plant is of a bushy nature and grows from 3 to 4 feet high. Price, each, 25c; 3 for 65c.

Thalictrum Dipterocarpum or Meadow Rue

This beautiful hardy plant is too little known. It is a real gem for the hardy border, and its graceful sprays of violet flowers, brightened with a bunch of yellow stamens, are invaluable for cutting; 4 feet, each, 30c; 3 for 75c. Field clumps, \$1.00 each.

Tritoma or Red Hot Poker

A very handsome and showy border plant with rush-like foliage. The blossoms are unique in shape, the lower petals being tinged with orange, ultimately becoming a brilliant flame red at the top. Flowering season July to September. Must be carefully protected, or lifted and carried dormant in dry sand or earth during Winter. Each, 30c; 3 for 75c.

Valeriana Officinalis or Hardy Garden Heliotrope

A fine hardy plant, with very showy heads of bright rose flowers, produced in great numbers on stems about three feet high, heliotrope scented. A constant bloomer until frost Each, 25c; 3 for 65c. Field grown clumps, \$1.00.

A very handsome, hardy, variegated grass which gives a touch of color to any hardy border. plant is also especially useful for hedge purposes. Each, 25c; 3 for 65c.

Veronica Spicata

This well known "Speedwell" is one of the best of the genus, bearing long spikes of blue flowers from July until the early frosts. One to two feet. Strong plants, each, 25c; Large field clumps, 3 for 65c. each, \$1.00.

Incana—(See Color Plate)—A gem for the rockery in every way. Each, 30c; 3 for 75c.

Repens—A fine rock or carpeting plant with beautiful light blue flowers. Each, 30c; 3 for 75c.

Thalictrum-Meadow Rue

Sweet Rocket—(Hesperis)

Vinca or Periwinkle

V. Minor—Also known as Trailing Myrtle. This pretty Evergreen is extensively used for covering graves, producing in the Spring an abundance of blue flowers. Each, 35c; 3 for 90c.

Viola

Jersey Gem—One of the most valuable violas yet introduced. The plants are of compact sturdy growth, bearing pure violet flowers on good stems, thus making it a splendid subject for cutting as well as a good border plant. Blooms in early Spring to the end of the season. Each, 30c; 6 for \$1.40.

Violet

Princess of Wales-A remarkably hardy and fine variety. The flowers are very large and borne on long stems, a very profuse bloomer and very fragrant. Fine for the rockery and that rather shady location. Each, 30c; 3 for 75c.

Water Lilies

We offer you the most adaptable varieties for Northwest conditions for your lily pool.

M. Albida-A large sparkling white variety, vigorous grower. Each, \$1.00.

Odorota Gigantia—A fine gigantic white Lily. Each, \$1.00.

Cape Cod Pink-A fine pink Lily. Each, \$1.00.

OUR HARDY ROCK GARDEN PLANTS

How to Make a Rock Garden

There is a place even on the smallest lot in which a rock garden may be tucked away in a beautiful setting. The combinations of rocks and plants which may be used loom up in a seemingly endless manner.

SITE OR LOCATION

The rock garden should be constructed in a spot that is subject to full light and to good aeration. Any natural slope in the ground can also be used to good advantage. Take advantage of any natural outcropping or rock on your grounds.

ROCKS

Rocks will usually be gathered from the nearest and most easily accessible source. Weatherworn rocks produce a pretty and natural effect, and on rather sharp sloping ledges the use of porous and water-holding rocks is much in order because it is in these positions that the conservation of moisture is a large factor. Go to both extremes in choosing rock sizes as too many rocks of either a large or small size tend to make the effect unnatural.

A good well drained garden loam is fine for a majority of rock garden plants, a soil made up of one-half loam as free from clay as possible, one-quarter leaf mold and one-quarter sand, is ideal.

CONSTRUCTION

The soil should be thoroughly prepared first and then the existing grades and the desired contours should be laid out in proportion. The bottom rocks should be placed first and there should be more plant surface than there are rocks in the finished effect. Anchor the rocks firmly by thorough tamping. Arrange rocks on slopes so that as much erosion by water is checked as possible and so that there will be plenty of light and air for plants that are planted on a slope.

PLANTING

The best time to plant is in the Spring, although many of the hardy rock plants can be transplanted equally as successfully in the Fall under our Montana conditions. If you are in doubt as to which plants to use for Fall planting just drop us a line and we shall be glad to advise you. Any of the plants may be set out in the Spring.

ADVANTAGE OF OUR EXPERIENCE IN MONTANA AND NORTHWEST

We are ready to help you at any time with your rock garden ventures. Our 43 years' experience of growing and selection under conditions found in Montana and the Northwest gives you something no other firm can offer you. Following is a list of rock garden plants which are adaptable to conditions in Montana and the Northwest and for complete descriptions turn back through the Perennial section of this Year Book to the pages indicated.

A Two-Year-Old Rock Garden

OUR ROCKY MOUNTAIN PEONIES

Grown and Selected in Our Nursery at the Foot of the Rocky Mountains

Peony-Festiva Maxima

During our forty-three years in Montana we have selected a most adaptable stock of these popular plants and growing in our Nursery at the foot of the great Continental Divide, as they are, we offer you the roots of the utmost hardiness, strength and vitality.

CULTURE

Peonies may be planted either in the Fall or Spring. Dig the soil deeply and dress with well rotted manure. Bone meal is also good to work into the soil. Never allow manure at planting time to come in contact with the roots. When planting, cover the eyes or new buds to a depth of not more than three inches. Too deep planting causes poor growth and prevents blooming. Their chief requirements are good rich soil and a sunny position though the latter is not absolutely essential, for they thrive well in partly shaded locations. They must be given a liberal supply of water during the growing season.

Peony Officianalis

This is the old-fashioned Peony and comes into bloom from ten days to two weeks ahead of the other varieties. All are strong growers, with full fragrant flowers.

Officianalis Rosea-Double rose.

Officianalis Rubra—Double blood red.

Officianalis Mutabilis—Pink changing to white. Each of above varieties, 50c; 3 for \$1.25.

Asa Gray — Large, compact flower of semi-rose type. Pale lilac sprinkled with darker lilac dots. Very distinct and beautiful. Very fragrant, medium height. Each, 75c.

Baron Rothschild—Deep rose, mid-season. Long stem. Each, 75c.

Duchess DeNemours—Crown type, early. Superb, cup-shaped, sulphur-white flowers with greenish reflex that lights up the entire flower. Each, 50c.

Edulis Superba—One of the early varieties, dark rose pink with center petals of a light shade. One of the very best on the market. Each, 50c.

Eugene Verdier-Pink, very full flower. Each, 50c.

Felix Crousse—One of the largest and most beautiful reds, a great favorite. Each, 75c.

Festiva Maxima — One of the largest and most floriferous whites — center petals tipped with carmine. Each, 50c.

Humcii — A beauty — Cherry pink and slightly tipped with silver. Each, 60c.

Lady Bramwell—An early variety, color delicate silvery rose with light pink center. Petals tipped creamy white. Large full fragrant flowers of good form. Each, 60c.

Longfellow—A bright crimson with a cherry tone. A circle of golden stamens surround the central mass of petals, while the outer petals are slightly reflexed. Fine erect habit, vivid color and long season. Each, \$1.00.

Lord Kitchener—Rose type; very early. A most beautiful flower, well filled out; of a brilliant cherry red color, a most dazzling hue; very free blooming; lasting. Each, \$1.25.

Mons Jules Elie—Bomb type, early. Often called the king of all Peonies. Very full flowers. Color

an ideal glossy lilac-pink, shading to deeper rose at the base, overlaid with a sheen of silver. Claimed by many as the largest of all Peonies. Each, 60c.

Gloire de Touraine—A beautiful velvet red sort, shaded purple, having very double flowers of large size. Each, 75c.

Queen Victoria—Very early; opens up blush pink, ultimately turning white. Each, 75c.

Madame Emile Lemoine—Semi-rose type; mid-season. Enormous buds opening into extra large imbricated round flowers, each petal overlapping the other, giving the whole flower a very unusual glossy white, overlaid tender satiny pink, covered with minute lilac dots—when fully blown, pure white. Each, 75c.

Marie Crouse—Bomb type; mid-season. An enormous very full globular flower on long strong stems; color soft salmon pink, shaded a glossy satiny lilac—an exquisite variety. Each, \$1.00.

Richard Carvel—Very early deep red; an immense globular bomb; tall, very profuse bloomer, fragrant and beautiful. The very best of all early dark reds. Each, \$1.25.

Rosea Magna-Dark pink, lilac center. Each, 50c.

Rubra Triumphans — A semi-double type; very early with large loose very dark crimson blooms. Each, 60c.

Sarah Bernhardt—Semi-rose type; late mid-season. Flowers of remarkable size and freshness in huge clusters, full and double and of perfect form. Color apple-blossom pink with each petal silver tipped. A fragrant and magnificent flower without a fault. Each, \$1.25.

Therese — A very large pink Peony of perfect shape which is usually considered the best pink Peony in the world—rose type. Each, \$1.50.

A Field of Our Peony Bluebloods

Department of Hardy Trees, Shrubs and Vines

Our forty-three years' experience in Montana has enabled us to select and grow only such Trees, Shrubs and Vines that we have found to be hardy and adaptable to conditions found in Montana and the Northwest. This is something no other institution can offer you.

CARE IN WATERING

Growth should be encouraged during the early Summer months and ample water should be applied at this time. Do not merely wet the surface but give several successive applications, being sure that the water goes to the very lowest root extremities. About the last part of August and during September water should be gradually withheld so that the Trees and Shrubs will have a chance to mature up properly for the winter. Then after the leaves have fallen and the Trecs have gone into their winter dormant state, which is usually about the middle to the end of October, they should be heavily soaked with water again.

Shrubs that bloom early in the season should be trimmed immediately after blooming is over. Shrubs that bloom late in the season should be pruned early in the Spring. All that is needed is to keep them trimmed to a symmetrical form, to remove all dead wood and enough of the surplus wood to insure a good circulation of air and sunshine. To those who are anxious to make an immediate showing on their property, we have a fine stock of extra large specimens of most of our Trees and Shrubs. If interested in this class of stock please write us for prices.

When planning on the artistic arrangement and planting of your grounds, we cordially invite you to consult our experienced staff of nurserymen who are at your service at all times to give information on the most desirable Trees, Shrubs and Plants and to furnish cost estimates.

NOTICE

We endcavor to send out only stock that will grow with proper care and attention. We should be advised BEFORE AUGUST 1 should any Trees, Shrubs, etc., fail to grow so that our representative may have an opportunity of calling and inspecting same. We will replace any of our nursery stock at one-half price that does not start growth

Should your goods show any appearance of damage on arrival be sure to get your express agent to make a note of the damage on your receipt and send this to us so that we may enter a claim.

A Spirea Van Houtii-Hedge in Helena

A Hedge of Japanese Barberry

Barberry or Berberis

Berberis Thunbergi—This is the Japanese green Barberry. It is very beautiful, dense and low growing. The leaves are small, light green and towards Fall assume rich brilliant colors of red, orange and yellow. The Japanese Barberry is not a host for the wheat rust. (See Color Plate.) Each, 50c; 3 for \$1.25; larger sizes, 75c. Write for prices on Barberry hedge stock.

Red Leaved Barberry (B. Thunbergi Autropurpurea)—A fine new variety which is similar in all respects to the green variety except that the foliage is a rich lustrous bronzy red all through the growing season. Bears brilliant scarlet berries. Each, 50c; 3 for \$1.25; larger sizes, \$1.00; 3 for \$2.50.

Buckthorn

A good hedging plant which may be held into a sheared fence of from three to five feet or grown into a tall screen of fifteen feet. A quick grow-

ing hardy Shrub.

12-inch to 18-inch, doz., \$1.00; 100, \$7.50.

18-inch to 24-inch, doz., \$2.00; 100, \$12.50.

We can also supply a larger size, 2 to 3 feet high, which will make an immediate hedge effect.

Each, 40c; 1 doz., \$4.00.

Buddleia or Magnifica

Butterfly Shrub or Summer Lilac—One of the most desirable Hardy Summer Flowering Shrubs; beginning to bloom in July, it continues until cut down by severe frost. The flowers are a pleasing shade of violet mauve borne in dense cylindrical spikes from ten to fifteen inches in length by three inches in diameter. The bushes sometimes die back to the ground during Winter but this will not prevent it sending up long spikes with beautiful flowers the following year. Each, 50c; 3 for \$1.30. (See Color Plate.)

Peking Cotoneaster—A beautiful low Shrub with dark green leaves; flowers are pinkish white and berries are black. One of the hardiest Shrubs we know of and will tolerate considerable shade. Each, 75c; larger sizes, \$1.50.

A Block of Nursery Stock Growing in Our Nursery

Philadelphus—Virginal

Lilacs

Nowhere do they succeed better, produce more beautiful foliage and flower more profusely than in Montana and the Northwest. We have an exceptional stock of this general favorite with a fine selection of the most adapted varieties. They may be planted as single specimens in groups or in hedges. Blocks of these Shrubs attract large numbers of visitors to our Nursery every season when in flower in flower.

Purple—This is an old-time favorite, very hardy and of rapid growth. Excellent for specimen purposes or for hedge use.

White—The companion to the purple, very hardy and fragrant and producing large trusses of -The companion to the purple, very hardy beautiful flowers.

Prices of the above two varieties, each, 50c, 75c and \$1.00.

Extra fine specimen bushes of the above varieties that will bloom this season. Balled and burlapped. Each, \$3.00, \$5.00 and \$7.50.

Persian Lilac—This is quite distinct, with small foliage, graceful growth. Color, the true lilac shade. Each, \$1.00 and \$2.00.

Villosa-This is one of the most beautiful species that we offer. Bears its purple flowers about a month later than the other varieties and they turn nearly white when fully open. It has proven an excellent Shrub for a shady exposure and is very hardy. Each, \$1.00 and \$2.00.

Kolwitzia or Beauty Bush

Amabilis-A handsome new ornamental Shrub from the wilds of China, resembling Weigelia, to which it is allied. It bears an amazing profusion of pale pink bell-shaped flowers in early Summer. Fine strong Shrubs. each, \$1.00 and \$1.50.

Tartarian Honeysuckle

Cornus or Dogwood

Because of the distinctive color of its bark and its attractive flowers and fruit the Dogwood is suitable either for planting as an individual shrub or in a hedge or foundation planting. The three varieties listed, with their contraction relationships. trasting colors, go very well together in a planting.

Native Red Dogwood—This is a very ornamental Shrub and in rows is an effective windbreak. White flowers, followed by white berries. Each, 50c. Larger Shrubs, \$1.00.

Yellow Dogwood—Another ornamental variety, but with yellow wood. Fine for either specimen or foundation planting. Each, 60c and \$1.00.

Silver Blotched-Variegated Dogwood - A very beautiful Shrub and becoming very popular for foundation planting. It adds color and zest to shrubbery groupings with its leaves of green blotched and striped with silvery white. Each, 60c.

High Bush Cranberry or Viburnum Opulus

High Bush Cranberry—A highly decorative, tall growing Shrub bearing white blossoms in broad cynes. Scarlet fruit, very showy Shrub. Each, \$1.00.

Philadelphus, Mock Orange or Syringa

Native—A beautiful white fragrant flower and very hardy. Each, 50c; 3 for \$1.25.

Pyramidal—This is a tall pyramidal grower bearing beautiful double white flowers. Each, 75c; 3 for \$2.00.

Philadelphus—Virginal—A medium sized Shrub with beautiful fragrant semi-double flowers. The flowering season lasts somewhat longer than on the other two types. Each, 75c; 3 for \$2.00.

Lilac Rooted Cuttings

Suitable for the planting of hedges and wind-breaks. Well rooted cuttings of the Purple and White varieties for this purpose. Per 100, \$8.00.

French Hybrid Lilacs

Pres. Grevy-A very fine double, producing trusses of pale blue flowers.

Charles X-Deep purplish Lilac flowers in large trusses. Flowers in May.

Madame Lemoine — Magnificent panicles of large double white blooms.

Ludwig Spaeth — Single. One of dark crimson purple. the darkest shades known.

Any of the above, each, \$1.00; larger specimens, \$2.00 and \$3.00.

Ligustrum Vulgaris or English Privet

We have searched many years for a Privet that would withstand Montana winters and we are now offering you this variety which has proven hardy in our Nursery. For these in extremely high altitudes we would not recommend it. This is a fine splendid grower and develops a most beautiful

Prices—25 for \$3.50, 50 for \$6.00, 100 for \$12.00, prepaid.

Honeysuckle—Tartartian

Tartarica Alba—Flowers are a blush white.
hardy bush of very dense growth. Tartarica Rubra—Bears light crimson flowers on a fine shapely bush. The darkest color of all

honeysuckles.

Pink Tartarian—Develops a tall bush with large pink flowers; a fine sturdy grower.
Prices of above three varieties of Honeysuckles: Each, 50c and \$1.00; larger bushes, \$2.00 to \$4.00.

Sambucus or Elderberry

A very valuable Hardy Shrub of quick growth and branching habit. When in bloom the Shrub is a perfect bower of beauty over a long period and again in the Fall when burdened with its load of black fruits. Each, 75c; larger Shrubs, \$2.50.

Sambucus or Elderberry

Russian Olive

Elaeagnus Angustifolia-There is a greater demand each year for this fine hardy Shrub. It has proven to be a great drought resister and is a fast vigorous grower. Foliage is a beautiful green above and a silvery white below. Bears fragrant yellow blossoms. Makes a beautiful trimmed or untrimmed hedge and may also be grown as a specimen and we have some fine large single specimens to offer.

Price—18 to 24-inch stock, per doz., \$1.00; per hundred, \$7.50. Larger branched hedge stock, per doz., \$2.00; per hundred, \$16.50. 3-4 foot Shrubs, each, 50c.

A Russian Olive Hedge in Helena

Snowball or Viburnum

One of the hardiest of Shrubs and a favorite everywhere. During May and early June it is a perfect mass of blooms producing large globular pure white flowers. It is ideal for landscape work. Each, \$1.00. Large specimens, balled and burlapped, \$3.00 to \$5.00.

Siberian Pea or Caragana

The Caragana or Siberian Pea is a great drought resister amongst shrubs and is the variety recommended to our farmers and ranchers in the treeless regions of Montana. For windbreak purposes in exposed situations, for specimen tree planting or for shrub use we cannot voice the praises of this variety too strongly. Has fine clean foliage, and rich golden blossoms, with the flowers hanging in regular clusters. It is especially useful for hedge purposes.

Prices—12 to 18-inch stock for hedge purposes, \$6.00 per 100; 50 at 100 rate. 18 to 24-inch stock for hedge purposes, \$12.00 per 100; 50 at 100 rate. 3 to 4 Shrubs, each, 75c. Caragana Seed-These beautiful and hardy Shrubs are easily propagated from seed. Prices, oz., 30c; ¼-lb., 85c; lb., \$3.00, postpaid.

SPECIMEN SHRUBS OF CARAGANA

\$3.00 to \$10.00 F. O. B. Helena

These Shrubs are extra fine stock, balled and burlapped at the root, thus insuring arrival of the Shrubs in the best possible condition.

(Not Hardy in Higher Altitudes)

Cydonia Japonica—A popular flow-ering Shrub. It is valuable as a specimen plant or planted in masses or for hedge work. Flowers are bright scarlet and it is a vigorous grower. Each, 2 to 3 feet, \$1.25.

Snowberry

Spireas

For either foundation planting or specimen planting nothing can outdo the Spireas.

- Van Houtii (Bridal Wreath)—
 The grandest of all the White
 Spireas; it is of compact habit
 and a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom. Each, 50c, 75c and \$1.50.
- S. Sorbifolia (Ash Leaved Spirea)-A very showy variety and a quick grower. Flowers produced on long spikes; white flowers. Makes a very beautiful, graceful Shrub. Each, 75c.
- S. Anthony Waterer—A very valuable variety producing bright crimson heads of bloom in great profusion. Very hardy and of dwarf dense habit, never exceeding 30 inches in height. Each, \$1.00.

Sumach

This old favorite Shrub has proven hardy in Helena, and we are pleased to be able to offer it to our customers. It has handsome fern-like foliage, which turns to a wonderful red at the approach of the first frosts. 3 to 4 feet, each, 50c. Larger Shrubs, \$1.00 and \$1.50.

Symphoricarpos, Snowberry or Coral Berry

Coral Berry—The Red Snowberry or Indian Currant. Bears dense clusters of red fruit in Au-Very attractive. Each, 75c; larger Shrubs, tumn. **\$1.50.**

Snowberry—A small native Shrub that succeeds even in shaded locations. It is quite hardy, produces small white or pinkish flowers in July and August, succeeded by abundant white berries. Price, each, 75c. Larger Shrubs, \$1.50.

Field of Russian Olive in Our Nursery

S. Prunifolia—Another favorite variety. It produces long spikes of double blooms very freely in May and June. Each, 75c.

Special—One each of the above four varieties, \$2.50.

Spirea-Froebel-This is a vigorous spreading ower. 1 (11 Dright mk Howers wnich borne profusely from May to June. The Shrub presents beautiful colors and hues in the Fall and is very hardy. Each, \$1.00.

Weigelia

Rosea-An introduction from Japan and a most beautiful free blooming Shrub, bearing pink flowers early in the Summer. Excellent for foundation planting and for specimen work. Each, 75c.

HARDY VINES FOR THE NORTHWEST

Clematis Jackmanii

Virginia Creeper

American Ivy-Woodbine-(See Color Plate)

This Vine is, without doubt, the very best and most hardy variety for this section. Everywhere it has been planted it has succeeded wonderfully. It produces masses of rich dark green foliage deeply cut, which assumes brilliant shades of yellow, crimson and scarlet in the Fall. It is the ideal Vine for covering fences, walls, trees, rocky slopes, etc. Our stocks are clean, hardy and of sturdy growth and we feel safe in saying, are some of the finest in the country.

> Each\$1.00; 3 for \$2.50 Each, extra large plants...... 2.00; 3 for \$5.00

Hop Roots

For quickness in covering residence fences, arbors, etc., the Hop Root leads. The peculiar shade of its foliage, extreme hardiness and quick growth make it a very desirable Vine. Each, 30c; 6 for \$1.40; doz., \$2.75.

REMEMBER

OUR PRICES ARE PREPAID PRICES

Clematis

One of the most popular of all trailing Vines. When in bloom the dense sheets of blossoms, with their most pleasing fragrance, give a beauty indescribable.

To obtain good results they must have rich soil, perfect drainage and an abundance of water and most important of all they must be planted with the crowns about 3 inches beneath the surface of the soil.

Heretofore it has been difficult for many to transplant these plants with success, so this sea-son we are again featuring pot-grown stock of Al quality which will come with a ball of earth and are sure to give satisfaction.

Jackmanii—The popular rich purple variety with large flowers and very hardy. (See Color Plate.) Each, \$1.00; 3 for \$2.55.

Mme. Eduard Andre—One of the very finest red varieties on the market; very effective.

Each, \$1.00; 3 for \$2.55.

One each of the above two varieties, \$1.75.

State Nursery & Seed Co.,

Helena, Montana. Dear Sirs:

I received my strawberry plants and they were all in good shape. I planted them and they are growing fine. I wish to thank you very much for them.

Yours very truly.

MRS. LOUISE PAISLEY,

Glacier County, Mont.

May 13th, 1932.

State Nursery & Seed Co.,

Helena, Montana. Dear Sirs:

I received the strawberry plants. They came through in splendid condition and every one was a strong healthy plant.

Thanking you.

Yours truly,

GEORGIA JAMES,

Sweet Grass County, Montana.

Native—A sweet-scented, rapid grower, extremely hardy and producing magnificent foliage and great masses of flowers. Good strong roots. Each, 45c; 3 for \$1.20.

State Nursery & Seed Co.,

Helena, Montana.

Gentlemen:

Enclosed find specimens of Sweet Pea flowers grown from your seed. We think they are marvelous.

(Note: One stem measured 16 inches long.)

OUR HARDY AND ADAPTABLE TREES

All Prices on Trees, Shrubs and Plants (except Evergreens) include delivery to your nearest express station

IMPORTANT TO TREE BUYERS — In buying shade and fruit Trees or other Nurscry Stock from THE STATE NURSERY AND SEED CO., you are also getting free of charge the experience of FORTY-THREE YEARS of production of these goods in Montana. This can not be offered you by any other house at any price.

We are proud of our great fields of Trees which we have tested and tried so thoroughly and we invite you to see them growing in our Nursery high up on the eastern slope of the Main Range of the Rocky Mountains.

We have larger specimens of nearly all Trees listed and if interested we invite you to write about them.

We take special care to send out only such stock that we know with proper attention will grow, but should any fail to do so before August 1st, 1933, we wish to be informed immediately after that date so that one of our representatives may have an opportunity of inspecting same. We guarantee to replace at one-half the original cost.

Almond, Flowering

A charming low dwarf-like Tree which bears a profusion of beautiful double pink and white blossoms early in the season. Price, \$1.00 to \$2.50.

Ash

American White — The best hardwood Tree for Montana, being extremely hardy and growing into a most beautifully formed head. We can not recommend this Tree too highly for this section, either for parking purposes or for planting as individual specimens.

Each, 6 to 7 ft., \$1.50; 6 for \$7.50; each, 7 to 8 ft., \$2.00; 6 for \$10.00; each, 8 to 9 ft., \$2.50; 6 for \$12.50. Larger specimens, \$3.00 to \$5.00.

White Ash Seedlings—6-8 inches—per 100, \$5.00; per 50, \$3.00. These are offered for customers who may wish to grow these valuable Trees for windbreaks.

European Mountain Ash

This is without doubt one of the very best ornamental Trees, and because of its outstanding beauty and hardiness, together with its fine foliage and lovely blossoms, followed by massive clusters of beautiful berries from July till Winter. 6 to 8 ft., \$2.00 each.

Oak Leaved Mountain Ash

Another very handsome Tree equally as showy as the Ash leaved variety and producing immense clusters of bright red berries. Foliage dark lobed and oak shaped—a very hardy Tree of pyramidal habit.

Each, 6 to 8 ft., \$2.00.

Mountain Ash Berries

Cut Leaf Weeping Birch

Rirch

Canoe Birch—A very hardy and beautiful American Tree of fine shape and delightful bark. An excellent specimen for lawn or other decorative purposes. 6 to 8 ft., \$2.50 each.

Cut Leaf Birch

Very beautiful form of the European White Birch; the main trunk, with snow white bark, grows as straight as an arrow. Branches spread slightly, while the fine slender shoots hang vertically. Foliage fine and deeply cut. One of the most beautiful of deciduous Trees. Each, 5 to 6 ft., \$3.50; 6 to 8 ft., \$4.50.

Box Elder or Manitoba Maple

Often called the Ash Leaved Maple. Requires but moderately rich soil, and is of a vigorous growth. Has been so popularly planted that it needs no description. Each, 5 to 6 ft., \$1.00; doz., \$7.50. Each, 8 to 10 ft., \$1.25; doz., \$12.50.

Chestnut, Horse

A very handsome and beautiful Tree producing spikes of white flowers in great profusion and sweetly scented. May be frequently seen in many towns of the state. Well worth trying. Each, 4 to 5 ft., \$2.00.

Cherry, Japanese Flowering

The famous flowering Cherries of Japan—strictly ornamental and beautiful specimens, blossoming in profuse panicles.
Each, 4 to 5 ft., \$1.50.

Crab, Flowering

(See Color Plate)
Strictly an ornamental Tree. An excellent addition to any grounds. Makes a medium sized Tree, perfectly hardy; succeeds well in all soils not too wet. When in blossom appears to be covered with delicate pink perfectly double small roses of delicious fragrance. Each, 3 to 4 ft., \$1.00 and \$1.50.

Elm

Americana-Ulmus A noble native American Tree, attaining a large size, with wide spreading head and graceful drooping branches. Each, 6 to 8 ft., \$1.50; doz., \$15.00.

Ulmus Pumila—(Chinese Elm) — This variety which was introduced from China is a wonder-fully rapid growing Tree and is adapted to semi-arid as well as irrigated districts. In some lo-calities the young tips freeze back, although this does not

Chinese Elm injure the main body of the Tree. It is remarkably resistant to drought. Each, 5 to 6 feet, \$1.50; 6 to 8 feet, \$2.00.

European Larch

A tall, handsome deciduous conifer, with pyramidal head and tapering trunk. This Tree is covered with soft feathery foliage of a delicate green. It is very graceful, resembling the Spruce. In the Autumn its needles turn a golden color before falling. Prices, \$3.00, \$4.00 and \$7.50. These Trees are balled and burlapped the same as Evergreens and are shipped F. O. B. Helena.

Black Locust

One of the hardiest of the Locusts. Produces blossoms in long white racemes, very fragrant. 5 to 6 feet, each, \$1.00.

Linden, American

A very stately and beautifully shaped Tree. It makes a fine specimen of a shade Tree with bright shining leaves. It bears blossoms in July. It is a vigorous grower in the Northwest. 6 to 8 feet, each, \$2.00.

Maple

Hard Sugar Maple—An excellent shade Tree. The foliage in the Fall assuming very striking tints of yellow. It is one of the most handsome of the species, of very hardy nature. Each, 6 to 8 feet, \$2.50; 3 for \$6.50.

Soft Maple—Of easy culture and rapid growth, forming well shaped Trees when given sufficient room to develop. Splendid stock. Each, 6 to 8 feet, \$1.50; doz., \$15.00.

Acer Schwedler—Purple Leaf Maple—A red and purple variety that contrasts brightly with the delicate green of the other Trees. In midsummer the leaves are purplish green, in Autumn a golden yellow. A new rare variety. Each, 6 to 8 feet, \$3.00. (See Color Plate.)

A Fine Maple Specimen

A Block of Our Fine Silver Leaf Poplars (See Offer Below)

Poplars

These hardy Trees thrive in almost any soil, and as a class are unequaled for this section.

Silver Leaved Poplar—We are featuring this beautiful hardy member of the Poplar family this year as we have developed a most remarkable stock of them in our Nursery. The under sides of the leaves are a beautiful silvery gray, giving it a mark of distinction among the Poplars. It is very resistant to disease and a fast, vigorous grower, developing a beautiful shade head. We offer fine 6 to 8 foot Trees at, each, \$1.00; 6 for \$5.00.

Balm of Gilead—Native—A variety that does remarkably well in most parts of Montana, especially the exposed prairie lands of Eastern Montana, and should be extensively planted.

Bolleana—A tall, columnar, rapid growing Tree which is an improvement over the Lombardy, being more hardy. Foliage a bright green above and silvery underneath.

Canada Poplars—This is one of the hardiest and fastest growing Trees for the Northwest. Farmers living in the treeless sections of the Northwest can add materially to the appearance and value of their property, in addition to deriving a great deal of pleasure by a systematic planting of these Trees. ing of these Trees.

Lombardy Poplar—This variety is a very rapid grower—very erect, forming living pillars of handsome green foliage. Subject to winter killing in some sections.

A Beautiful Specimen of Russian Willow

Willows

Among the best hardy Trees for our Northwest climate, are the Willows. They are handsome and ornamental in any location and are very hardy. Our stocks of these cultivated varieties of Willows are perhaps the largest and best to be found in any section, and produced as they are—at an altitude of over 4,000 feet—on the eastern slope of the main range of the Great Continental Divide, are the hardiest that can be produced anywhere.

Golden Willow—Golden colored growth, makes a handsome specimen Tree anywhere, and hardy under all conditions.

Russian Willow—A very strong growing, tall variety, extremely valuable for windbreaks, very hardy and of very rapid growth and of great value also for specimen Trees.

Each of the above two varieties, 4 to 5 ft., 50c; 6 for \$2.50; 5 to 6 ft., 75c; 6 for \$3.75; 8 ft., \$1.00; 6 for \$5.00; 10 ft., \$2.00; 6 for \$10.00.

Laurel Willow—One of the very best Willows for ornamental planting. Leaves very large and shining. Fragrant when bruised; produces in Spring large rich-colored pussy willows. Each, 6 to 8 ft., \$1.00; 8-10 ft., \$1.50 and \$2.00.

Pussy Willow—This hardy native Tree is one of the beautiful harbingers of Spring. Adds variation and natural beauty to the landscape scene. Each, \$1.00, \$1.50 and \$2.00.

ALL COLLECTIONS ARE SENT ONLY AS LISTED
WE INVITE YOU TO COME AND SEE OUR TREES GROWING

EVERGREENS

Mugho Pine

Black Hills Spruce

Austrian Pine

Colorado Blue Spruce

(See Color Plate)

Colorado Blue Spruce—Picea Pungens—There are other Trees of almost every imaginable color and form, but here is truly the culmination of Nature's highest effort to produce the beautiful. It is a perfectly shaped Tree with an abundance of heavy foliage of rich, glistening blue, which flashes and sparkles in the sunlight. The glory of the Blue Spruce is in the foliage, which is an intense steel blue and has created a sensation the world over. It is considered the handsomest Tree on the Rocky Mountain Trail.

Price, 12 to 15 inches, \$3.00; $1\frac{1}{2}$ to 2 ft., \$5.00; 2 to $2\frac{1}{2}$ ft., \$8.00, F. O. B. Helena. For prices on larger sizes, please write.

Colorado Green Spruce

The green variety of this famous Spruce which has the same graceful shape and quality but exhibits a bright green coloring of the needles rather than the bluish and silvery blush of the Colorado Blue Spruce.

Price, $1\frac{1}{2}$ to 2 feet, \$4.00; $2\frac{1}{2}$ to 3 feet, \$6.50.

White Fir

White Fir—Abies Concolor—One of the most popular and picturesque of the Evergreens. Both the upper and under sides of the needles are a beautiful grayish blue. It is regarded by many as the cheeriest of all the Evergreens in the winter, has no insect enemies and is the best Fir Tree to withstand heat and drought. It retains a distinct pyramidal outline and is branched to the base. Each, 2 to 2½ feet, \$6.50; 3 to 4 feet, \$12.00.

Black Hills Spruce

Black Hills Spruce-The hardiest of all Spruce, being lack Hills Spruce—The hardiest of all Spruce, being symmetrical, compact and bushy in habit of growth; the very smallest Trees soon form round, sturdy, compact bodies as the Tree grows and develops. It continues to carry this particular style of growth; even in old Trees the lower branches are retained, thus forming a close ground cover. The foliage varies from green to bluish tint. Price, each, 12-15 inches, \$2.00; 2 to 2½ feet, \$5.00; 3 to 3¼ feet. \$10.00. 3½ feet, \$10.00.

Douglas Fir

Pseudotsuga Douglasi—A beautiful Evergreen forming an open, broad, sharp-pointed pyramid. The lower branches are straight or somewhat drooping, and the middle or higher ones trend upward. This Fir is a symbol of rugged strength, of endurance, and permanency. Price, each, 2 to 2½ feet, \$5.00.

Pines

Mugho Pine—A very short, stout and bushy Evergreen, very popular for low border plantings and foundation work. It never grows over 4 to 5 feet tall but spreads out 6 to 8 feet in diameter. By annual shearing it may be kept as small as desired. The Mugho is shade tolerant and the color is a deep green in summer and winter and it is very hardy. 18-in. x 18-in., \$4.00; 10-in. x 12 in., \$2.00.

Austrian Pine—Pinus Nigra—The leaves are two in a sheath, straight and slender, from 4 to 5 inches long and of such a deep rich green color that it is known in some parts of the world as the "black pine." No tree shows such a resistance to the trying conditions of city planting. Coal gas and smoky atmosphere have no effect on its growth. A very

atmosphere have no effect on its growth. A very strong hardy Evergreen making a fast annual growth. Each, 2½ to 3½ feet, \$6.00.

NOTE-All our Evergreens are shipped with a large ball of earth, securely burlapped. When received, great care must be exercised not to break this ball of earth. At planting time loosen only the top of burlap, then thoroughly pack the soil around the ball of earth, before saturating with water.

WE INVITE YOU TO DRIVE TO OUR NURSERY and see our Evergreens growing and also the hundreds of large specimen Trees we have to offer.

Pfitzer Juniper

Junipers

Hill Dundee Juniper—An amazing variation from the type. The Summer color is a grayish green, the winter color a brownish red plum color. They grow to about 12 feet in height with uniform habit and symmetrical columnar form. Each, 1½ to 2 feet, \$3.50; 2-3 feet, \$5.00.

Colorado—This is the seedling form which produces a variation in habit and color. The color ranges from green to light blue, and is more pronounced during hot dry weather. It is narrow, compact and symmetrical, having one single stem in contrast to some Junipers with several stems. Each, 3 to 3½ feet, \$6.00.

Pfitzer—Almost unknown a few years ago, this remarkable Tree today is in the front rank of ornamental Evergreen Trees. The shape and size may be readily controlled by shearing, and it is shade tolerant, being used extensively on the north sides of buildings. It is a low-growing and very bushy type of Evergreen. Each, 1 to 1½ feet, \$2.00; 1½ to 2 feet, \$5.00.

Silver Juniper—Juniperus Scopulorum Hilli—This is a select form of striking blue foliage. It is the whitest Juniper obtainable. The silvery foliage is magnificent as it sparkles in the sun. Each, 1 to 1½ feet, \$2.50; 2½ to 3 feet, \$6.00.

Swedish Juniper—An old favorite variety of columnar form, having grayish green, prickly needles. A most compact grower and fine for formal uses. Each, 1½ to 2 feet, \$4.00.

Red Cedar

Juniperus Virginiana—It is a compact, pyramidal type. As Winter comes on, the tips of the new foliage present a pinkish appearance. The early Spring color is very bright green, gradually darkening during the Summer. It bears bright blue and silvery berries which are quite an attraction to birds. Each, 1 to 1½ feet, \$2.00; 2 to 2½ feet, \$5.00; 3 to 3½ feet, \$7.50.

Landscape Gardening

We are prepared to do landscape work on a large or small scale and we are pleased to make suggestions and estimate cost of improving and beautifying your home grounds. Send us a sketch of your lot or lots with location of buildings, dimensions, location of entrances, roadways and exposure, etc. We are equipped to draw plans of the property and wish to help you plant your home.

FRUIT TREES AND SMALL FRUITS

Our Fruit Trees and Small Fruits are hardy and adaptable to the Northwest and are inspected, clean and thrifty. We offer you only the varieties that we have found to be hardy in our forty-three years' experience in Montana.

BUY FRUITS NOW WHILE PRICES ARE DOWN.
WE PAY DELIVERY CHARGES

Apples

Duchess of Oldenburg—One of the hardiest and most productive of our large Apples. Fruit streaked red (Fall variety). Each, 5-6 feet, \$1.00; 3 for \$2.50.

Haralson—A dandy Winter Apple, originating at the Minnesota fruit breeding station. It is a sturdy hardy grower and is resistant to fire blight. Bears a good crop of handsome red Apples early, yet the fruit keeps well into Spring. Each, 5-6 feet, \$1.00; 3 for \$2.50.

Hibernal—A splendid Fall variety, very hardy. A really good Apple for exposed situation. Each, 5-6 feet, \$1.00; 3 for \$2.50.

McIntosh Red—Too well known to need description. Each, 5-6 feet, \$1.00; 3 for \$2.50.

Yellow Transparent—Earliest of splendid quality, and does well in any exposed situation. Fruit light yellow. Each, 5-6 feet, \$1.00; 3 for \$2.50.

Wealthy—Does well wherever grown—leading Winter variety for Montana. Large red fruit. Each, 5-6 feet, \$1.00; 3 for \$2.50.

Crab Apples

Our Trees are noted for their hardiness and vigor, and usually bear the second season after planting. From an ornamental standpoint alone these Trees are well worth planting.

Transcendent—Very productive; fruit yellow with red cheek. The variety generally used for jelly. Each, 5-6 feet, \$1.00; 3 for \$2.50.

Whitney—Bears quantities of very large fruit. Good both for eating and cooking. Very hardy. Each, 5-6 feet, \$1.00; 3 for \$2.50.

Red Siberian—One of the hardiest and most prolific fruiting Crab Apples yet introduced. Each, 5-6 feet, \$1.00; 3 for \$2.50.

(Larger Trees of any of the above, \$2.00 to \$4.00)

Cherries

Cherries do very well in some parts of Montana, while in others they will not succeed. We advise our customers, where Cherries are not grown, to test a tree or two before attempting to plant on a large scale.

Early Richmond—A splendid variety in dark red. Each, \$1.25; 3 for \$3.50.

Montmorency—A good hardy red variety. Each, \$1.25; 3 for \$3.50.

English Morello—A good hardy red variety. Each, \$1.25; 3 for \$3.50.

Rocky Mountain Cherry

A distinct Hardy Shrub and its load of white blossoms in Spring is followed by quantities of black fruit that ripens into fruit valuable for preserving; one or more should be in every garden.

Each, 3 feet, \$1.00; 3 for \$2.50. Each, 2 feet, 50c; 3 for \$1.25.

Compass Cherry

Compass Cherry—A cross between a Cherry and a Plum. It is very hardy and will thrive where many other trees will hardly grow. In the Spring it is covered with a dense mass of blossoms, making it invaluable for a decorative plant anywhere. It bears enormous quantities of fruit, ripening late in the season, and which is extra fine for jelly-making purposes. Each, 3-4 feet, 75c; 3 for \$1.85.

Chokecherry

This native Tree may be trained to a bush or tree form. It produces an abundance of fruit and it is becoming most popular for ornamental use on the landscape. Each, 5 feet, \$1.00; 3 for \$2.50.

Another Block of Young Fruit Trees in Our Nursery

For fruit and ornament, Plum trees stand in the first rank. The Plums we offer are the best for the Northwest and you will be surprised at the fine crops they will produce.

Bradshaw-A fine large dark red Plum with green flesh and very juicy and of the finest quality. A hardy, vigorous grower and a fine market Plum.

De Soto-Large oval, light yellow and red, sometimes mottled; juicy, good quality. An early and regular bearer, producing large crops. One of the very best.

Terry-Another American Plum originating in northern Iowa, and has proven very hardy. A large fruit, color red over yellow, round shape, thick skin, yellow flesh of splendid quality.

Underwood—Very hardy and very prolific. Fruit large, red, juicy, good quality. An early and regular bearer. Quality excellent. This variety we can highly recommend. Even the small trees in our grounds are literally covered with fruit. (See Color Plate.)

Waneta—The most delicious of all Plums. Extra large size, two inches in diameter. Hardy any-where in the Northern States. An early and prolific bearer, often producing a good crop in two years from planting.

Price of Plum Trees, each, \$1.25; 3 for \$3.50.

Gooseberries

Gooseberries grow and fruit exceptionally well in Montana, and should be more generally grown. They yield enormously, and for preserving and pie making are unexcelled.

regon Champion—A splendid green variety, hardy, of good size and flavor. This variety is more generally grown on the Oregon fruit farms than any other for market purposes.

Industry—This is a fine hardy berry. The fruit is exceptionally large and of excellent flavor and quality. This has proven to be the most popular berry of recent years.

Price of Gooseberries, each, 50c; 3 for \$1.25.

Grapes

The two varieties below are the most adaptable:

Beta—A hardy northern hybrid, deep purple in color, medium size, and considered one of the best varieties for jelly and similar uses. Vigorous grower, does well anywhere and is especially adapted to the Northern States. Each, 45c; 3 for \$1.00.

Concord—The most popular; very hardy, vigorous and productive. Each, 45c; 3 for \$1.00.

OUR SPECIAL BACKYARD FRUIT OFFER

1 Wealthy Apple Tree, 4-5 feet 1 Rocky Mountain Cherry, 3 feet 1 De Soto Plum, 4 to 5 feet 1 Compass Cherry, 3-4 feet

> **ALL FOR \$3.25** Prepaid to You

Currants are hardy, very prolific, and their qualities for jelly making appeal to every housewife. Our stocks are good-in the best possible condition.

Perfection—This is perhaps the best variety of Red Currant that was ever introduced. It is a prolific yielder, with a rich sub-acid flavor. The fruit is very pulpy and contains but very few seeds. We strongly recommend this variety to be grown both for commercial and home use.

Red Cherry—Very productive, color a bright red, in profuse clusters. Large fruit, fine for jelly making.

White Grape—The best white variety, of very bushy habit of growth, yielding large quantities of large white fruit.

PRICES OF CURRANT BUSHES 1-year, each, 35c; 6 for \$1.30; 2-year, each, 65c; 6 for \$3.00.

FGooseberries-

SEE OUR LIST OF NEW PLANTS ON PAGE 34 ALSO LIST OF NEW FLOWER SEEDS ON PAGE 52

Champion Everbearing Strawberry

Blackberries

We recommend very highly our Montana Grown Hardy Blackberries. The bushes make a fine sturdy growth and bear large quantities of good sized fruit. The berries are sweet and mild and excellent for table purposes, jams, pies and jellies. Price, 6 for 45c; 12 for 85c; and 25 for \$1.50.

WINTER PROTECTION

After the first freeze and when the plants are free of leaves throw a covering of coarse straw around the canes or lightly earth-up with soil.

Strawberries

The fruiting plant that stands the severe conditions of Montana's climate with splendid credit to itself is the Strawberry. For the space it occupies in the garden it is hard to find anything to equal it and our patrons show a constantly increasing appreciation of this fact.

We desire to call especial attention to the Everbearing varieties listed. They should prove of more than usual merit for both home culture and market purposes.

We do not recommend fall planting in Montana.

Pamphlet on Strawberry and Bush Fruit Culture FREE ON APPLICATION

The New Mastodon Strawberry A fine new berry that has proved to be a wonder. The berries are large and are borne in great profusion. The plants are more resistant to disease and are strong, vigorous growers. We highly recommend this variety to you. Prices on Mastodon strong, sturdy plants, 50 for \$1.50; 100 for \$2.50. (See Color Plate.)

Standard Type Strawberry
Senator Dunlap—Hardy, strong
grower, prolific plant-maker, good bearer of firm berries and stands transportation well. The best early mid-season berry for Montana. Perfect flower-

1000 plants 14,00

Kaspberries

Raspberries are a splendid small bush fruit for Montana. The varieties we list have proven to be the hardiest and most adapatble in the Rocky Mountain region.

Latham-A large dark red berry which has proven to be ideal for the Northwest. It is a hardy, vigorous grower, a or heavy yielder, and a good keeper and shipper. It combines all the

good qualities asked for in a Raspberry. Price, 6 for 45c; 12 for 75c; 25 for \$1.35.

Syracuse—A newer and very large red berry which is ideal for home use. Not as solid as the Latham and note quite as hardy in some sections but its size and quality place it very much in demand. Price, per dozen, \$1.20; 25 for \$2.15.

Gregg—The best of the black Raspberries, and a splendid yielder. This is the variety of black Raspberry generally grown for market purposes. Price, per dozen, 90c; 25 for \$1.65.

Everbearing Raspberry

St. Regis—Everbearing red. This is perhaps the best known of the Everbearing type, and has proven well adapted to general Montana conditions. Well worth a trial. A very prolific yielder of delicious flavor. Per doz., \$1.00; 25 for \$1.75.

Our Strawberry Plants Are Strong

Everbearing Strawberries

This type of Strawberry is becoming a great favorite in the Northwest. Their extreme hardiness, combined with their long bearing season, make them doubly valuable.

Pride of Montana—This berry originated in the Bitter Root Valley and are very large in size, being more prolific than the Progressive and increase in size from the first picking up until the last. The plants and fruit will stand fairly heavy frost and are highly recommended.

Champion Everbearing—Derived from a seedling of Superb. Similar in many respects but larger fruited and more productive. Can stand a great deal of grief and show results in seasons where others fail.

VEGETABLE PLANTS AND GARDEN ROOTS

Asparagus Roots

Asparagus is very easily grown, and a bed when once established will more than repay any housewife who loves to have this delightful vegetable for her table in the early Spring, and also for canning for Winter use.

Washington Rust Resistant—A new variety, above all others in size, vigor, quality and tenderness. Prices: Doz., 1-year-old, 45c; 100, \$2.75; 2-year-old, doz., 65c; 100, \$3.50.

For a home garden plant Asparagus Roots 18 inches apart in rows 2½ feet apart, 100 roots for a patch 20x20 feet; 5,000 to 7,000 roots will plant

Horse Radish

Strong Vigorous Roots of this popular spicy relish—Each, 15c; doz., \$1.25.

Spear-For mint sauce and flavoring. Fine, hardy, high quality roots. Each, 20c; doz., \$2.00.

Parsley

3-inch Pot Tomato A valuable herb used for seasoning and garnishing. Each, 10c; doz., \$1.00.

Tomato Plants

Our list of Tomato Plants is made up of the most adaptable varieties for Montana and the Northwest. They have all been tested and tried in our seed testing grounds and the plants are from the most select seed. We are offering strong three-inch pot-grown plants which will start bearing from two to three weeks before the transplants and also the young bed transplants, all of which have been carefully hardened off.

TOMATO ARISTOCRATS

The following three varieties, while a little higher in price, will more than repay with their novelty nature and extra quality:

Market King—A variety that has met with much favor. A medium sized fruit, and a heavy crop-

Little

Orange Sunrise—One of the best yellow varieties yet introduced. A free fruiter of medium size.

Break-O-Day—A fine new early Tomato producing large, smooth, meaty globular red fruits. It is resistant to fusarium wilt of vines and to nailhead rust of fruits and also to several blights. It produces a heavy early crop and continues to bear a long time.

Prices of above three varieties—Strong 3-inch pot plants, doz., \$1.25; 6 for 65c. Strong Transplants, doz., 75c; 6 for 40c; 50 for \$2.50.

Pepper (Ready May 20th)

Large Bell or Bull Nose—The variety for Montana. Large early variety. Flesh is thick, of a mild flavor and of a shape that is desirable for filling. Splendid producers.

Cayenne Long Red-The real red hot kind, very prolific.

Harris' Earliest—The earliest Pepper in cultivation, therefore splendidly adapted to the North-

Pimiento-The mildest flavored of all Peppers, grown extensively for pimientoes, pickles and pulp. Very productive. Its smooth, thick flesh and uniform shape make it an excellent shipper.

Price of any of the above four varieties: Per doz., 60c; 25 for \$1.10.

Rhubarb or Pieplant

33 to 100 feet of row—5,000 to acre—5x3 feet. Requires a deeply cultivated and thoroughly manured soil—the more the manure the better. Our VICTORIA strain is not surpassed by any for its fine grain, its early propensity and delicious

S. N. & S. Co.'s Victoria-Large red stems. Each, 2-year-old, 35c; 6 for \$1.50.

If wanted in quantities—write for prices.

Sage '

A valuable herb used for seasoning. Plants from 4-inch pots, each, 25c.

Standard Tomatoes

John Baer—One of the earliest varieties for Montana, of splendid color and flavor. A heavy yielder and good sized fruit.

Bonny Best-Another good early sort.

Earliana—Fruit large.

Marglobe—A variety introduced by the United States Department of Agriculture. It is of fine appearance, noted for its great productivity, deep globe shape and superb table qualities. Color, a beautiful scarlet.

Prices of above four varieties: Strong plants from 3-inch pots, doz., \$1.00; 6 for 55c. Strong transplants, doz., 55c; 6 for 30c; 50 for \$2.00.

Chives or Snittlauch

Small, hardy perennial plants, resembling the onion in appearance and growing in clusters. They are grown for the young leaves which are produced from early in the Spring throughout the Summer. They give a mild onion flavor to sausages, salads and various dishes. Clump, 25c; 3 for 55c.

Tomato—John Baer

Cabbage—Earliest of All

Cabbage

As for the past four years, we are listing only our own Cabbage plants; for actual results have shown they make better growth than the so-called frost-proof Cabbage for they do not receive the set-back suffered by the latter.

Our Cabbage plants are grown in cold frames and are carefully hardened off. Should the season be normal we shall be ready to ship by May 1st; if it is late we shall ship accordingly. Too early planting of the late varieties often "esults in "splitting." We offer only varieties which have roven the best in vigor, quality and weight for this sec-

Our Cabbage plants will be ready about May 1st and can be successfully planted up to the middle of June.

Early Varieties

Ready About May 1st to June 15th

Copenhagen Market-Early round head, vigorous grower and yielder and one of the best.

Early Jersey Wakefield — Early cone-shaped heads, uniformly hard and solid. Few outside leaves, heart well blanched.

Hollander or Danish Ball Head—Vigorous, compact grower, exceedingly hardy in resisting cold or dry weather, heads very solid and of fine quality—good shipper.

Danish Round Head—Improved—Very vigorous, wonderful capacity for withstanding hot sun, very solid, crisp and tender.

Red Cabbage-The most solid of the Red Pickling varieties, sure heading and tender.

Savoy Cabbage-The most solid heading Savoy, plants being strong and vigorous.

Brussel Sprouts-A very palatable Cabbage vegetable. Very easily grown and profitable.

Cauliflower

Ready About May 1st to June 15th

50 plants per 100 feet of row; 8,000 plants per acre, 3 feet x 2 feet. Cauliflower grows splendidly in Montana. A money-making crop in favored sections.

quote you prices.

Wedding Flowers

At weddings, flowers always play a very important part. Having at all times a large production of flowers under glass a choice selection for wedding

bouquets is always available.

Brides' bouquets are usually "showered," while those for bridesmaids have short ribbon decorations. When we furnish bridal bouquets our patrons may depend upon getting the same in styles dictated by the latest fashions. When ordering bouquets for bridesmaids it is well to make known the shades of the dresses these ladies are to wear.

Bridesmaids' Bouquets-In colors to correspond with the ladies' gowns. Price, \$5.00.

Prices naturally vary, depending upon the desire of the customer as to the content, arrangement, etc., of the bouquet.

A Postcard will bring any of our special folders which we issue at Christmas, Thanksgiving Day, St. Valentine's Day, Mothers' Day and Decoration Day.

Flowers have the power of expression where human words. and writing fail.

S. N. & S. Co's. New and Rare Flowers for 1933

We offer a wonderful list of beautiful new novelties. They will add new beauty, new colors to your 1933 garden. You will enjoy watching the development of some flowers you have never seen before. Select now the varieties you want and order promptly before the supply is exhausted.

Marigold-New Guinea Gold

Gypsophila, Elegans Purpurea

Very graceful, half tall compact and a very free flowering variety, growing about 14 to 15 inches tall. The flowers are reddish purple and very showy. Pkt., 25c.

Sweet Wivelsfield

This new race of hardy plants is a cross between Dianthus Allwoodii and Sweet William, with large flowers and a wonderful range of colors. Few plants can compare with Sweet Wivelsfield for wealth of color and length of flowering period. An outstanding novelty of the easiest culture. Pkt., 25c. See page 31 for plants.

Zinnia, Dahlia Flowered Luminosa

This is an entirely new shade in Zinnias. A charming shade of bright deep pink with a light suffusion of salmon. Pkt., 20c.

Sweet Wivelsfield

Marigold, African All Double Orange

A new development in this popular annual. Will produce practically 100% double flowers. Very fine. Pkt., 15c.

Marigold, Guinea Gold

A distinct type of Marigold of graceful pyramidal habit, producing 30 to 40 flowers 2 to 2½ inches across on a plant, of a brilliant shade of orange flushed with gold. Pkt., 25c.

Eschscholtzia, California Poppy

(Salmon Beauty Double)

This variety is a beautiful double salmon introduced for the first time this year. It is a salmon both inside and out, very distinct, a wonderful rare variety. Pkt., 25c.

Eschscholtzia, California Poppy

(Salmon Beauty Single)
Same as above except being single. A very beautiful color. Pkt., 15c.

Venidium Fastuosum

A striking new variety from South Africa. The brilliant orange-like flowers are 3 inches across, with dark center and a reddish brown zone. Two feet tall and blooms over a long period. A hardy annual. Pkt. 25c.

Pansy, Swiss Giants

If you really want extraordinary Pansies by all means sow the new Swiss Giants. They are without exception the most gorgeous Pansies we have ever seen. Immense in size and of thick velvety texture, and the range of colors includes many of the deep red and brown shades. The Swiss Giants have now gained the reputation of the world's most brilliant and magnificent of all Pan-

sies. Mixed.

Pkt., 35c; 1/16-oz., \$1.00; ½-oz., \$1.75; ½-oz., \$3.25; ½-oz., \$6.25.

Nasturtium, Golden Gleam

A new double sweet scented Nasturtium. The large golden yellow flowers are borne on long erect stiff stems well above the foliage. The flowers are very attractive; a marvelous flower

for garden display and cutting. Pkt., 25c; ½-oz., 75c; oz., \$1.25.

Nasturtium-Dwarf-Golden Gleam

SPECIAL OFFER—1 pkt. each of the above 10 New Varieties (value \$2.35) for \$2.00 postpaid

Our Peerless Tested Flower Seeds

We wish to again remind you that all our flower and vegetable seeds are tested and tried in our large seed testing grounds; a distinct protection and assurance of only the best and highest quality in seeds and a service which only the very largest of American seed houses offer. We invite you, our friends and customers, to visit our extensive seed testing grounds and see the thousands of varieties of flowers and vegetables being grown and tested to qualify for the high ideals which they must meet before they are ready for you as our PEERLESS Seeds.

Abronia Umbellata or Sand Verbena

Very pretty trailing plants with numerous clusters of sweet-scented flowers. Is excellent for growing in baskets, rockeries or the open border. Rosy pink. Does well in light soil. Hardy annual. Pkt., 5c; ¼-oz., 30c; ½-oz., 50c.

Acrolinium or Everlasting Flower

A very pretty half-hardy annual, producing white and rose-colored double daisy-like flowers. These are known as "Immortelles" and are desirable for wreaths and winter bouquets. mixed. Pkt., 10c; ¼-oz., 25c; ½-oz., 40c.

Arctotis Grandis

Blue-Eyed African Daisy—The daisy-like flowers measure 2½ inches across. They are silvery white with a sky-blue eye surrounded by a narrow yellow zone. The under part of the petal is lilac-blue. Borne on long stems. One of our most attractive annuals. Pkt., 10c; ¼-oz., 30c; $\frac{1}{2}$ -oz., 50c; oz., 90c.

African Gold Daisy

African Gold Daisy (Dimorphotheca

Aurantiaca) The single daisylike flowers are 2½ inches in diameter, and of a unique glossy terra cotta orange, which bril-liant coloring is rendered the more conspicuous by the dark disc surrounded by a black zone. The plants grow from 8 to 12 inches high and are very profuse flowering, especially in dry situations. Hardy annual. Pkt., 10c; \(\frac{1}{4}\)-oz., \(35c; \frac{1}{2}\)-oz., \(60c; \text{ oz., } \\$1.00.

Amaranthus Tricolor or Joseph's Coat

These plants afford brilliant contrast of colors, being useful for borders and groups; also, where foliage effects are desired. The leaves and stems are of different shades of red, blended with green. Half-hardy annual. Mixed. Pkt., 5c; ¼-oz., 30c.

- Alyssum

A fragrant, free flowering hardy annual, bearing small flowers in great profusion. Useful for border or early bedding flowers. Succeeds anywhere.

Sweet Alyssum-A well-known, fragrant, lowgrowing, spreading variety. Pure white flowers. Pkt., 5c; ½-oz., 25c; oz., 40c.

Carpet of Snow-Pure white. Grows only 2 to 3 inches high and flowers profusely. Exceedingly useful for border and cemetery purposes. Pkt., $10c; \frac{1}{4}$ -oz., 30c; oz., \$1.00.

Lilac Queen-Hardy annual. Deep lavender lilac. Pkt., 10c; ¼-oz., 30c; ½-oz., 50c; oz., 85c.

Sweet Alyssum

-100 Total -100 -100 TO

Little Gem—Three to four inches high, pure white, fine for borders. Pkt., 10c; ¼-oz., 25c; ½-oz., 40c; oz., 70c.

Alyssum Saxatile Compacta—or (Basket of Gold)—A hardy dwarf perennial, very useful for rock work, literally covering itself with yellow flowers. Blooms first season if sown early indoors. Pkt., 15c; 1/4 - 0Z., 60c.

SEE PLANT FOODS—Last Pages

Ageratum or Floss Flower Blue Perfection

A hardy annual of easy culture, especially valuable for bedding, as it is literally covered with blue blossoms all Summer. They make fine house plants in pots during Winter time. Pkt., 5c; 1/8-oz., 25c; ¼-oz., 40c; ½-oz., 70c.

Ageratum-Blue Perfection

Antirrhinum or Snapdragon

S. N. & S. Co's. Tall Giant Flowering Varieties

Coreopsis

Convolvulus Minor or Dwarf Morning Glory

A very early flowering annual with brilliant flowers. Of very easy culture. Finest Dwarf Mixed - Pkt., 5c; $\frac{1}{2}$ -oz., 15c; oz., 25c.

CONVOLVULUS-JAP MORNING GLORY

(See Ipomea, Page 62)

StimUplanT Makes a Wonder Garden

Coreopsis Lanceolata

A hardy perennial, blooming the first year and producing on long stems a succession of rich bright yellow flowers. Seed may also be sown in Fall outdoors. About two feet. Pkt., 10c; ¼-oz., 35c; ½-oz., 60c.

Chinese Lantern Plant or Physalis Franchetti

The Chinese Lantern Plant is grown for its showy scarlet-red seed-pods which are easily dried for Winter bouquets. The plants are perfectly hardy. The flowers are white. Perennial. Pkt., 15c; $\frac{1}{8}$ -oz., 30c; $\frac{1}{4}$ -oz., 50c; $\frac{1}{2}$ -oz., 80c.

Chinese Lantern Plant

Columbine Aquilegia

Of easy culture and will furnish for many years a magnificent display of handsome flowers. Hardy perennial.

Chysantha — (Golden Spurred) — Golden yellow. Pkt., 10c; 1/8-oz.,

Coerulea — (Rocky Mountain Blue $\frac{1}{8}$ -oz., 50c.

Columbine

Columbine-Violet blue and white. Pkt., 15c;

Double Mixed—Pkt., 10c; ¼-oz., 35c.

LONG SPURRED COLUMBINE

While all the varieties of Columbine are beautiful, this strain of long-spurred is unquestionably the finest yet produced. The plants are strong, with flowers of largest size.

Pink Shades—A lovely strain with large flowers. Pkt., 20c; 1/16-oz., 50c; ½-oz., 75c.

Long-Spurred Hybrids-Fine long-spurred flowers in shades and combinations of pink, red, blue, and yellow. They make excellent cut-flowers. Mixed colors. Pkt., 15c; 1/8-oz., 50c; 1/4-oz., 85c.

Cypress Vine or Ipomea Quamoclit

A hardy, rapid-climbing annual, with feathery foliage, bearing bright scarlet and white flowers very profusely. Mixed. Pkt., 5c; ½-oz., 25c; oz., 45c.

Cynoglossum or Chinese Forget-Me-Not

Lovely rich blue. It thrives in a dry sunny location. Will bloom continuously all Summer. Grows 20 inches tall. Sow the seed during May. Hardy annual. Pkt., 15c; 1/8-oz., 25c; 1/4-oz., 40c.

Daisy or Bellis, English Daisy Low-growing, early Spring flowering. Desirable for edging or borders. Daisies are indispensable for shady places and are easily raised from seed. A hardy perennial.

Double Mixed-Pkt., 10c; 1/8-oz., 40c.

Giant or Monstrous—A new strain of Double Daisy with flowers fully twice the size of the ordinary sorts. Colors white or rose. Pkt., 15c; 1/8-oz., 50c.

DAISY-Shasta-(See Chrysanthemum, Page 57)

English Daisy

Dahlia

Dahlias can be raised from seed and will bloom the first year. Sow the seed in a shallow box early in March or April. When danger of frost is over, plant them in the bed or border in the garden. Seed may also be sown out of doors in

Double—Choice mixed colors. Flowers of excellent form. Mixed. Pkt., 15c; 1/16-oz., 35c; 1/8oz., 60c.

Single—Seed saved from the choicest varieties. Mixed. Pkt., 10c; 1/16-oz., 25c; 1/8-oz., 40c.

New Dahlia, Coltness Hybrids

A new class of single Dahlias. They are of neat, compact habit, averaging only about 18 inches high, and bearing a succession of bloom from July until frost. The flowers have flat or

Delphinium—Perennial Larkspur

slightly fluted petals about 3 inches in diameter. Their colors embrace light and dark scarlet, crimson, blood-red, yellow, white, purple, mauve, and brickred; bizarre combinations. Excellent as a bedding plant and for the rock garden. Mixed. Pkt., 15c; 1/16-oz., 40c;1/8 - oz., 70c.

Delphinium Perennial or Hardy Larkspur

These are of the most handsome and useful hardy plants. Excellent for cut-flowers and borders, producing large, long spikes of beautiful flowers producing of varying shades of blue. If seed is sown early in the Spring some will blossom the first

Formosum — Dark Blue—This is the old favorite dark blue Larkspur, and one of the best. Four feet. Pkt., 20c; 1/16-oz., 40c; ½-oz., 70c.

S. N. & S. CO'S. PEERLESS GLADIOLUS BULBS

No other Summer flowering Bulb is enjoying such great popularity as the Gladiolus. Their adaptability to garden decoration or as cut-flowers is surpassed by no other flower. They are very showy and when cut with the first flower open, will last for 10 days in the house. They thrive in almost any good soil but better results may be had if soil is well prepared. Our list comprises the best of recent introductions and the most popular of the standard varieties. Plant Bulbs 4 inches deep and 6 inches apart. In the Fall before frost, the Bulbs should be lifted and the stems cut off and placed in a cellar away from frost until planting time in the Spring.

Notice-We offer first size Bulbs only. All Gladiolus Bulbs are postpaid.

Gladiolus-Le Marechal Foch-E. J. Shaylor

America—One of the best Gladiolus in existence. The color is a beautiful flesh pink, tinged with lavender. The flowers are of the largest size and splendid as a cut-flower. A very free bloomer. 3 for 15c; doz., 50c; 100, \$3.25.

Halley—A very large well expanded flower of a lovely salmon pink, blotched yellow, with carmine markings. 3 for 15c; doz., 50c; 100, \$3.25.

Louise—The lavender queen among Gladiolus. Beautiful shade of lavender, growing lighter towards the center. Extra fine. 3 for 25c; doz., 70c; 100, \$4.25.

Le Marcchal Foch—One of the most wonderful novelties; flowers of immense size and well opened; color, rose pink, flaked and striped deeper at edges of petals. 3 for 20c; doz., 60c; 100, \$3.50.

Peace—A grand pure white flower with just a slight marking of a lilac feather on the lower petal. The plant is very robust, 5 feet high and shows enormous flowers, well placed all along the stem. 3 for 15c; doz., 50c; 100, \$3.25.

Mrs. Francis King—A most beautiful flame pink. Immense flowers on a spike growing 4 feet high, with from 18 to 20 flowers, 6 to 8 being opened at one time; a popular variety on account of its attractive color. One of the most exquisitely colored and formed Gladiolus in our list. 3 for 15c; doz., 50c; 100, \$3.25.

Mrs. Leon Douglas—Enormously large flowers of beautiful begonia-rose striped with flame-scar-let, the lower petals pale lemon, speckled ruby. The tall strong stems produce several side shoots. Considered one of the largest Gladiolus in existence. 3 for 25c; doz., 75c; 100, \$4.50.

Anna Eberius—An extra fine variety; color rich velvety purple with a deep purplish red blotch on the lower petals; flowers large, on long spikes. 3 for 20c; doz., 60c; 100, \$3.50.

Byron L. Smith—Delicate lavender, deepest at the edges of the petals and shading towards white in the center; gives the impression of an orchid—a real gem. 3 for 25c; doz., 70c; 100, \$4.25.

Crimson Glow—One of the best scarlet varieties, throat overlaid with a velvety scarlet blotch. Large wide open flowers with enough open at a time to make it attractive; good form and keeps well as a cutflower. 3 for 25c; doz., 70c; 100, \$4.25.

E. J. Shaylor—A tall strong growing variety with large flowers; color, a beautiful shade of pure deep rose-pink with well ruffled edges; one of the best of its color. 3 for 20c; doz., 60c; 100, \$3.50.

Herada—Blooms of immense size, color a glistening pure mauve with deeper markings in the throat, always greatly admired for its unusual shade. 3 for 20c; doz., 60c; 100, \$3.50.

Golden Measure—Tall spike with many large, pure golden yellow flowers; several of the flowers are in bloom at one time; a winner at exhibitions. 3 for 25c; doz., 70c; 100, \$4.00.

Los Angeles—Shrimp pink with orange-carmine throat. 3 for 20c; doz., 60c; 100, \$3.50.

Mary Pickford — Delicate creamy white; throat finest sulphur yellow; very distinct and beautiful. 3 for 20c; doz., 60c; 100, \$3.50.

Orange Queen—Apricot-orange. This quite new shade without any competition and the substance of this variety is excellent. 3 for 25c; doz., 70c; 100, \$4.00.

Scarlano—Scarlet blotched ox-blood red in throat; beautifully ruffled; a fine acquisition. 3 for 25c; doz., 70c; 100, \$4.00.

S. N. & S. Co's. COLLECTION

Mathiola or Evening Scented Stock No annual in cultivation equals this in delicate perfume of its flowers. The pink and lilac blossoms partly closed during the day, expand and impart their fragrance in the evening; 12 to 15 inches. Pkt., 10c; ¼-oz., 20c; ½-oz., 30c; oz., 50c.

Matricaria or Feverfew

A favorite bedding plant and profuse bloomer. Half-hardy Treat as perennial. an annual. Double white. Pkt., 10c; 1/4oz., 35c.

MEXICAN BURNING BUSH—(See Kochia, Page 62)

Evening Scented Stock

Moon Flower or Ipomea Noctiflora So called from its rare peculiarity of blooming best at night, and on dull days. A beautiful climber, producing large, sweet-scented flowers 4 to 5 inches across. Tender annuals, 15 to 20 feet. Soak seed and plant in warm sunny place. Pkt., 5c; ½-oz., 30c; oz., 50c.

Musk Plant or Mimulus Moschatus

Foliage emits a strong musky perfume; pretty yellow flowers, fine for hanging baskets. Pkt., 15c; 1/16-oz., 50c.

Myosotis or Forget-Me-Not

Beautiful little plants with star-like flowers; succeeding best in a shady, moist situation; half hardy perennial; blooming the first year from seed if sown early. The true Forget-Me-Not; beautiful blue flowers. Pkt., 5c; 1/8-oz., 25c; 1/4-oz., 40c.

MORNING GLORY—(See Convolvulus, Page 58) MORNING GLORY—Mikado or Japanese (See Ipomea. Page 62)

MOURNING BRIDE—(See Scabiosa, Page 67)

Nasturtiums

For ease of culture, duration of bloom, brilliancy of coloring and blooming in the greatest profusion even in poor soils; is an endless profusion of gorgeous blossoms. The seeds picked green and pickled in vinegar have a piquant, appetizing flavor as a pickle. Do not water much nor sow on rich ground if abundance of bloom is desired.

DWARF OR BEDDING VARIETIES

Empress of India-Rich salmon-scarlet, deep green leaves.

Golden King-A glowing orange yellow, dark foliage.

Queen of Tom Thumbs - Flowers rich purplish crimson.

GAILLARDIA

CANTERBURY BELLS

LUPINES

S. N. & S. Co's. Giant Flowering Pansies

Pansies thrive best on a cool, moist, well drained soil enriched with rotted fertilizer or bone meal. Seeds sown early will produce fine plants for Autumn blooming. Best to sow in July or August and protect the plants during the Winter when they will flower continuously the next Spring and Summer. Our Pansies are renowned as the most beautiful in the world for size and color. In germinating allow plenty of ventilation. Keep beds quite moist but not soaking wet. Never allow beds to become dry.

Pansy-Giant Flowering

St. Knud—(The Orange Pansy)—The plants are of luxuriant growth. The handsome shaped flowers are placed on long stems well above the leaves. The color of the flower is golden orange in the center, changing into dark orange without spots or stripes. This peculiar color is of great effect in beds and borders. Pkt., 25c.

Adonis-Beautiful light blue. Pkt., 10c.

Fire King—The lower petals bright golden yellow shaded orange. Each petal has a large blotch of deep mahogany-red, shaded with purplish black in the center. The two upper petals are copper-brown with a bright golden yellow border. Very showy. Pkt., 10c.

Golden Queen-Large. Best of the pure yellows. Pkt., 10c.

King of the Blacks-Almost jet black. Extra fine large flowering. Pkt., 10c.

Lord Beaconsfield-Top pale lavender, shading to purple violet on lower petals. Very large and exquisitely marked and distinctive. Pkt., 10c.

Madam Perret—Petals frilled. Dark wine, pink, and red shades beautifully veined, all with white margin. Pkt., 10c.

Prince Henry—An extra fine variety. The largest dark purple. A flower of unusual beauty. dark purple. Pkt., 10c.

Prince Bismark — Beautiful shades of golden The largest and finest of the bronze Pansies. Pkt., 10c.

Snowflake-Extra fine pure white. Pkt., 10c. Any of the above named varieties, 1/16-oz., 45c;

Masterpiece - Giant Ruffled-The mammoth size, richness of colorings and frilled or ruffled character make "Masterpiece" one of the most distinctive Pansies. Pkt., 15c; 1/16-oz., 35c; 1/8-

Cardinal—This magnificent variety has a well-defined dark blotch on the three lower petals. Bright cardinal red, shaded with a rich tone of bright mahogany-red toward the center. Pkt., 15c; 1/16-oz., 35c; 1/8-oz., 60c.

Mile. Irene-A shade never before known to Pansies, a henna or tango red, a grand flower with long strong stems. Pkt., 20c; 1/16-oz., 50c; 1/8-

Pansy-Fine Mixed-Pkt., 10c; 1/16-oz., 25c; 1/8oz., 40c; ¼-oz., 65c.

S. N. & S. Co's. Giant Flowering Premium Mixed Pkt., 20c; 1/16-oz., 65c; ½-oz., \$1.20; ¼-oz., \$2.25.

Petunias

S. N. & S. Co's. Dou-ble Fringed Mixed —This is a mixture of the best large flowering and fringed double Petunias and will produce grand flowers. Only a certain percentage of double flowers may be expected from seed, varying from 25 to 40 per cent, while the remainder will be choice large single flowers. The weaker seedlings should be saved, as they often produce double flowers. Seed very costly. Pkt.,

Petunia—(Double Type)

SINGLE VARIETIES

Giant Fluffy Ruffles — These Petunias are very large flowered. The petals are waved, frilled and curled and twisted, giving an extremely dainty and pretty flower. Pkt., 35c.

Elks' Purple or Pride—A most outstanding variety, with immense flowers of rich deep Elk's purple. The petals are of velvety appearance. The blooms are enormously large. The velvety black veins add much to the beauty of the magnificent flow-Pkt., 25c.

Petunia—(Single Type)

Rosy Morn—A bright rosy pink with silvery white throat; very charming, com-pact, and free flowering. Make a very dainty and effective border. Pkt., 10c; 1/16-oz., 45c; ½-oz.,

Rose of Heaven-Excels by its marvelous color-rich brilliant rose with inconspicuous white throat. A deeper color than Rosy Morn. Pkt., 15c; 1/8oz., 60c; ¼-oz., \$1.00.

Rosy Morn-A bright rosy pink, with silvery white throat, very charming, compact, and free flowering. Make a very dainty and effective border. Pkt., 10c; 1-16-oz., 45c; 1/8-oz., 80c.

Rose of Henven—Excels by its marvelous color—rich brilliant rose with inconspicuous white throat. A deeper color than Rosy Morn. Pkt., 15c; 1/16-oz., 35c; 1/8-oz., 60c; 1/4-oz., \$1.00.

Balcony Petunias

For window or porch boxes, dry banks, terraces, or among rockwork, they may be depended upon to supply an unsurpassed floral effect throughout the summer. Flowers nearly 3 inches in diameter.

Balcony Blue—The flowers open up as a purplish blue, turning to a violet-blue when fully expanded. Pkt., 15c; 1/16-oz., 65c; ½-oz., \$1.10.

Balcony White—A magnificent pure white. Very large. Pkt., 15c; 1/16-oz., 65c; ½-oz., \$1.10.

Balcony Rose—Lovely bright rose flowers with a contrasting white throat. Pkt., 15c; 1/16-oz., 65c; ½-oz., \$1.10.

Portulaca, Moss Rose or Sun Plant

A low growing or creeping annual, six inches high. Of easy culture, thriving best in rich light loam or sandy soil. The glossy cup shaped flowers are produced in great profusion and are of the richest colors. Very fine for massing in beds, edgings or rockwork. They love the sunshine and rather dry ground.

PANSY COLLECTION Contains the following varieties: Golden Queen, Adonis, Madam Perret, Lord Beaconsfield, Prince Henry, Prince Bismark. One packet each of these six fine Giant-flowering Pansies (value 60c) mailed

POSTPAID FOR 50c

S. N. & S. Co's. Summer Flowering Sweet Peas

Our Peerless Spencer Sweet Peas have been selected and reselected for type, large flowers and long stems and are the best to be had anywhere. They are quickly and easily grown from seed and adaptable to the gardens of the Northwest. We have selected the newest, choicest and most up-to-date Sweet Pea varieties known in each color class.

Thousands inoculate their Sweet Pea seed with Stim-U-Germ (See Page 125). Spray thoroughly and often to prevent infection by aphis. We recommend spraying with black leaf "40" or Evergreen for this purpose. Leaflet on Sweet Pea Culture Free.

Spencer Sweet Pea

Sweet Pea Novelties for 1933

Smiles

A really new and exquisite shade. It is a clear glistening salmon shaded, shrimp pink; a most pleasing color and absolutely sunproof. The blossoms are so clear in color that people have been flowers beautifully waved and fluted. Pkt. (about 30 secds), 25e.

Red Boy

We offer Red Boy as the best crimson Sweet Pea. The shade is pure, rich, distinct and standard and wings are alike in color. The stems are long, carrying four magnificent flowers. We strongly recommend Red Boy; richer and brighter than any other crimson. Pkt. (about 30 seeds), 25c.

Carmine

Doreen-Carmine rose flowers of large size and beautifully waved petals. Pkt., 10c; ½-oz., 30c; oz., 50c; ½-lb., \$1.50.

Cerise, Deep

Hero-Is a beautiful shade, because in sunshine or artificial light it appears to be suffused with salmon. "Hero" is an entirely new shade of color and difficult to describe, and on account of its brilliance and clarity will be welcomed by all. The flowers are large, nicely waved, on strong stems. Pkt., 10c; ½-oz., 30c; oz., 55c; ½-lb., \$1.80.

Cerise Scarlet

Defiance—The color is a pleasing cerise-scarlet, absolutely burnless. Defiance has a charming form. It is of immense size and of vigorous, robust habit; carries four very large size flowers on long stout stems, which are produced in great profusion. Pkt., 10c; ½-oz., 20c; oz., 35c; 1/4-lb., \$1.00.

Crimson

Crimson King — Undoubtedly the most glorious crimson Sweet Pea yet introduced. Flowers of large size, perfectly placed on long strong stems and of rich deep crimson color. Entirely free from sunburn and wind scald. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00.

Lavender

Austin Frederick—Flowers of largest size, well placed on long strong stems. Color a true lavender, the best yet introduced. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00.

Two Varieties of Real Merit

Welcome

The most brilliant and dazzling scarlet Sweet Pea yet introduced. Welcome is a grand flower and a glorious color. It is absolutely sunproof, and the wings are exactly the same shade as the standard, giving the flower its magnificent self color effect. Welcome is the deepest and brightest scarlet Sweet Pea ever introduced. Pkt., 15c; ½-oz., 45c; oz., 75c.

Debutante

A magnificent new shade in Sweet Peas. The color is difficult to describe. It is a lovely soft salmon shaded coral or peach pink. It is quite a distinct shade, a color all its own. Flowers are large and bold. It flowers almost indefinitely, making it an exceptionally desirable garden variety. Pkt., 15c; ½-oz., 45c; oz., 75c.

Four Wonderful Varieties Miss Delight

Magnificent double Sweet Pea having beautifully waved petals. The color is a warm light salmon pink on cream ground with a decided amber suffusion. The flower itself is huge with the four beautifully doubled blossoms on a strong stem. Pkt., 15c; ½-oz., 40c; oz., 70c.

Ripples

A charming rose pink. The flushed rose on deep cream ground appears intensified in the center of the standard and edges of the wings. The standard has a margin of lighter pink which brightens the flower. The flowers are large, well waved, with a tendency to duplex. The stems are long and bear four flower sprays. Pkt., 15c; ½-oz., 40c; oz., 70c.

Kitty Pierce

is a new shade in Sweet Peas, being a soft light lilac, suffused with blush pink. The blossoms are very large; stout stems, and the petals are beautifully frilled and wavy. A charming Sweet Pea. Pkt., 15c; ½-oz., 35c; oz., 60c.

Winnie Morse

is the largest and one of the most beautiful Sweet Peas we have ever introduced. The flowers are mostly duplexed and delightfully frilled, giving the blossoms a fine light, wavy effect in spite of their large size. The color is cream ground, lightly flushed, soft rose pink. Pkt., 15c; ½-oz., 35c;

One packet each of the above four varieties (value 60c) will be mailed to any address postpaid for 50c.

1/2-oz. each (value \$1.50) postpaid for \$1.25. 1 oz. each (value \$2.60) postpaid for \$2.35.

S. N. & S. Co's. Summer Flowering Sweet Peas Are the Largest and Most Beautiful Shades

What Joy—A charming variety of rich deep primrose-yellow shade. Pkt., 10c; ½-oz., 25c; oz., 35c; 1/4-lb., \$1.00.

Cream Pink

Mary Pickford—A cream pink with a faint suffusion of salmon. Flowers exceptionally large and beautifully waved. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00.

Cream Pink, Pale—(See Winnie Morse)

Maroon, Dark

The Sultan—The best rich black velvety maroon. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00.

iny mauve. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00. Chieftain-The most beautiful shade of pure sat-

Orange

Tangerine — Brilliant tangerine-orange flowers. Very popular. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00.

Orange Pink

Royal Pink—A magnificent shade of shrimp pink with large, well formed waved flowers. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25.

Orange-Scarlet

Mammoth-Brilliant orange-scarlet of large size, the standard showing more orange than the wings. Vigorous and free blooming. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00.

Picotee Edged Pink

Youth-Clear, waxy white with pink edging. Produces large blooms. Beautiful and delightfully fragrant. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00. \$1.00.

Pink, Pale

Supreme—This is the best clear pink known. A soft and delicate color. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00.

Pink, Deep

Pinkie—Is larger than any other variety we have seen in the deep pink class. The beautiful rose pink flowers are free from the blueness of other deep pinks and is glorious. A most vigorous grower. The flowers are nicely waved. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00.

Purple

Royal Purple-The best rich royal purple. The color deepens as the flower ages, a desirable quality in a purple variety. Pkt., 10c; ½-oz., 25c; oz., 35c; ½-lb., \$1.00.

Rosabelle—A very rich bright rose. Flowers beautifully waved or fluted and of extra large size. Pkt., 10c; ½-oz., 20c; oz., 35c; ½-lb., \$1.00.

Salmon

Barbara—A superb salmon-colored sort that makes a telling bunch for exhibition or table decoration. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00.

Hawlmark Scarlet—A really wonderful bright scarlet. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00.

White

Avalanche—Glistening white of great substance. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00.

Heavenly Blue—A most beautiful shade of delphinium blue. Pkt., 10c; ½-oz., 25c; oz., 35c;

Blue, Light

Gleneagles—Flowers beautifully waved with daintily frilled edges. Color lavender blue, slightly deeper at center. Pkt., 10c; ½-oz., 25c; oz., 35c; 1/4 - lb., \$1.00.

Mary Pickford

Spencer Sweet Peas—Mixed Composed of Giant Waved Spencer varieties, blended in proper proportion and including several new hybrids of exquisite colors and shades. The varieties in this mixture will produce from three to four flowers on a stem. ½-oz., 20c; oz., 30c; ¼-lb., 85c; ½-lb., \$1.40; lb., \$2.50.

Special Offer of Spencer Sweet Peas We will send you one 10c package each of the 22 varieties listed (not including 15c or 25c pkgs.) for \$1.85

Your choice of any 15 varieties (not including 15c or 25c packages) 10c packages only, for \$1.25

Our choice of any 15 varieties (10c packages) for \$1.00

Grandiflora Sweet Peas

The overshadowing size and beauty of the Spencer Sweet Peas have gradually reduced the demand for the Graniflora types, so that we now offer only the mixed varieties.

Peerless Mixed—The best Grandiflora Mixture, colors well proportioned. Oz., 15c; ¼-lb., 40c; lb., \$1.50.

A hardy perennial climber. Sow the seed in rich ground one inch deep. The plants start slowly but make a strong growth and bear large compact clusters of flowers resembling those of the Sweet Pea but without fragrance, and give profusion of bloom all Summer.

Red, pkt., 15c; ½-oz., 40c; oz., 75c.

White, pkt., 15c; ½-oz., 50c; oz., 90c.

Pink, pkt., 15c; ½-oz., 40c; oz., 75c.

Mixed, pkt., 10c; ½-oz., 35c; oz., 65c.

S. N. & S. CO'S. SPENCER SWEET PEAS

Early or Winter Flowering Varieties

This new race of Early Flowering Spencer Sweet Peas is particularly adapted to sections where the summer flowering varieties have not proved satisfactory. They are now very popular and in great demand for early spring blooming, for out-door culture, coming into flower three to four weeks earlier than the regular summer flowering varieties, and if the flowers are kept picked will continue to bloom over a long period. The flowers are large and of the same form as the Spencer and are beautifully waved or frilled. We offer the following constults selected register. frilled. We offer the following carefully selected varieties.

Thousands inoculate their Sweet Pea Seed with Stim-U-Germ. (See Page 125.) Spray thoroughly and often to prevent infection by aphis. We recommend spraying with Black Leaf "40" or

Evergreen for this purpose

NOVELTIES

Novelty-1933

Miss Annie Laurie

Miss Annie Laurie constitutes the richest tone of pure rose pink ever produced in a Sweet Pea. It is several shades richer than any other rose and is a marvelous improvement; a vigorous grower, with four large flowers on long stems; an abundant, prolific and continuous bloomer.

Pkt., 25c; ½-oz., \$1.85; 1-oz., \$3.50.

Early Duplex Gem

Early Duplex "Gem." Everyone who has seen this novelty has been loud in admiration and praise. The color is soft rose pink flushed on light cream ground.

The flowers are enormous in size yet beautifully frilly. The huge effect comes from the duplexing

of the standard and even the wings.

Bear a profusion of blooms on good stems.

Pkt., 25c; ½-oz., \$1.25; oz., \$2.25.

Early Duplex Pioneer

Early Duplex "Pioneer." The color is rose pink on cream ground, giving a lovely effect which is greatly added to by the unusual frilliness of the flower. The flowers look double and really are double and sometimes the wings are also double. It is quite common to get four beautiful duplexed flowers on one stem. Pkt., 25c; ½-oz., \$1.25; oz., **\$**2.25.

White

White Harmony—The stems are long, the flowers are large and pure paper white of grand substance. Four large flowers on each stem; the best white Sweet Pea yet introduced; awarded silver medal. Pkt., 20c; ½-oz., 45c; oz., 80c; ½-lb., \$2.70.

Pink Superior Pink—A pleasing shade of glowing pink with a soft suffusion of salmon. Large, beautifully waved flowers. Pkt., 15c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.65.

Imperial Pink—A new grand variety with large clear pink blooms and long stems. Pkt., 15c; ½-oz., 35c; oz., 65c; ¼-lb., \$2.20.

Blush Fair Maid—A blush pink, suffused salmon on a white ground. A beautiful shade. Pkt., 15c; ½-oz., 35c; oz., 65c; ¼-lb., \$2.20.

Crimson Aviator—Deep rich crimson. A strong and beautiful color. A vigorous grower. Pkt., 15c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.65.

Queen Crimson—The brightest and richest of the Early Crimson, large flowers, long stems and good growth. Queen Crimson will be in great demand on account of the brilliant coloring. Pkt., 25c; ½-oz., 35c; oz., 65c; ¼-lb., \$2.20.

Scarlet Grenadier—The large flowers are a rich Poppyscarlet. Borne profusely on long stems. Pkt., 15c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.65.

Rose Zvolanek's Rose-This is a widely known variety with large flowers and bold stems. Color a rich rose. Pkt., 15c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.65.

Chevalier—A true rose color with just a suspicion of yellow toward the base. Well waved. Pkt., 15c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.65.

Orange Orange King-The most outstanding orange Sweet Pea. It is a clear intense orange. Pkt., 20c; ½-oz., 35c; oz., 65c; ¼-lb., \$2.20.

Orange-Scarlet Glitters—The standard is a bright fiery orange, and the wings are deep orange. Pkt., 15c; 1/2-oz., 30c; oz., 50c; $\frac{1}{4}$ -lb., \$1.65.

Early Flowering Sweet Peas

Lavender

Sweet Lavender-A beautiful shade of lavender. Pkt., 15c; $\frac{1}{2}$ -oz., 35c; oz., 65c; $\frac{1}{4}$ -lb., \$2.20.

New Blue—A charming shade of true blue; a color much in demand. Of great size, excellent form, free blooming, long stemmed, and heavy texture. Pkt., 20c; $\frac{1}{2}$ -oz., 35c; oz., 65c; $\frac{1}{4}$ -lb., \$2.20.

Silver Blue—The large flowers are a pleasing delicate shade of silver blue. Stems are long and sturdy. For a light blue we feel that those growing Sweet Peas will find Silver Blue a most satisfactory variety. Pkt., 15c; ½-oz., 30c; oz., 55c; ¼-lb., \$1.80.

Purple

Amethyst—The color is a rich warm purple, the younger flowers having a slightly softer color tone. Pkt., 15c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.65.

Early Flowering Spencer Mixed-A choice mixture of the foregoing named Early Flowering Spencer varieties. Pkt., 10c; ½-oz., 25c; oz., 40c; ½-lb., \$1.20; ½-lb., \$2.00; lb., \$3.50.

Poppies

Annual Poppies should be sown as early in the Spring as possible; they do not stand transplanting. Sow thinly, barely covering the seed. Press down firmly, and they will soon come up. picked just before expanded, the flowers will last several

Shirley Poppies

SINGLE ANNUAL VARIETIES

Dannebrog or Danish Flag—Large flowers of brilliant scarlet, with a silvery spot on each petal, forming a white cross. Very showy. Pkt., 5c; $\frac{1}{4}$ -oz., 25c; $\frac{1}{2}$ -oz., 35c; oz., 60c.

Tulip or Glaucum Flowered-Intense scarlet. The brightest colored of all Poppies. Pkt., 10c; ¼-oz., 25c; ½-oz., 40c; oz., 70c.

Single Annual-Mixed colors. Gorgeous colorings, easily grown from seed sown in the open. Pkt., 5c; oz., 25c; ¼-lb., 85c.

White Shirley—An exquisite free-flowering variety with single and semi-double flowers; stems 12 inches long. The flowering petals are pure white and have a satiny wrinkled finish. Pkt., 10c; $\frac{1}{4}$ -oz., 25c; $\frac{1}{2}$ -oz., 35c.

Pink Shirley—A free-flowering single Shirley Poppy of a beautiful wild rose color. Grows 12 inches tall. Pkt., 10c; ¼-oz., 25c; ½-oz., 35c;

Shirley Mixed—An extra fine strain. They are single and occasionally semi-double; colors white, pink, rose, carmine, crimson and blood red; many daintily edged and striped. Scarcely any two flowers are alike. Pkt., 10c; ¼-oz., 20c; ½-oz., 30c; oz., 50c.

DOUBLE ANNUAL VARIETIES

These Poppies are very handsome. The flowers grow to an enormous size from 6 to 7 inches in diameter, are as double as Peonies and the colors are very rich and striking.

Double Carnation or Peony Flowered, Mixed—Large, full double fringed flowers, 2 feet high. Pkt., 5e; ¼-oz., 20c; ½-oz., 30c; oz., 45c.

Cardinal Scarlet-Splendid double fringed flowers. Pkt., 10c; ¼-oz., 25c; ½-oz., 35c; oz., 50c.

White Swan or White Fringed-Immense double white flowers, beautifully fringed. Pkt., 10c; ¼-oz., 25c; ½-oz., 35c; oz., 50c.

Double Salmon Pink-A beautiful shade and a favorite with all. Pkt., 10c; ¼-oz., 25c; ½-oz., 35c; oz., 50c.

American Flag — Beautiful variety; flowers very large and double; snow-white, bordered with scarlet. Pkt., 10c; ¼-oz., 25c; ½-oz., 35c; oz., 50c.

Phlox, Drummondii (ANNUAL VARIETIES)

Phlox is a very pretty free-flowering annual of The coloring is brilliant auiek growth. scription. Sow the seed thinly as early in the spring as possible and cover ¼ inch deep. Phlox makes beautiful borders.

Alba—Pure white.

Fireball—Fine scarlet.

Isabellina—Yellow.

Violet — With purple eye.

Lilac-A bright soft lilac.

Crimson—Large well formed heads.

Any of the above, pkt., 10c; \(\frac{1}{2} \cdot - \text{oz.}, \) 30c; \(\frac{1}{2} \cdot - \text{oz.}, \) 85c.

Peerless Mixed, pkt., 10c; ¼-oz., 30c; ¼-oz., 50c; ½-oz., 85c.

Fine Mixed, pkt., 5c; ½-oz., 25c; ¼-oz., 40c; ½-oz., 70c.

Poppies PERENNIAL VARIETIES

Hardy perennials of easy culture; in bright glowing colors.

True Oriental Poppy

Oriental-(Papaver Orientale)-This is the most gorgeous perennial Poppy flowering in June and July, with enormous blossoms, deep crimson, with a conspicuous black blotch on each petal. Transplant carefully in August. Pkt., 10c; 1/8-oz.,

30c; ¼-oz., 50c; ½-oz., 85c.

Oriental Hybrids—Beautiful hybrids of the Oriental Poppy, producing flowers of immense size, colors ranging from delicate shades of salmon to door original many mixed part 10c; ½-oz. 25c. to deep crimson. Mixed, pkt., 10c; 1/8-oz., 35c;

1/4-oz., 60c. Iceland—Papaver Nudicaule—Pretty tufted foliage, flowers on long wiry stems in shades of white, yellow, and orange with satiny crinkled petals. Yellow, Orange Scarlet, White, or Orange—Pkt., 10c; ½-oz., 35c; ¼-oz., 60c. Iceland Poppy—Mixed. Pkt., 10c; ½-oz., 30c; ¼-

oz., 50c.

Pyrethrum-"Painted Lady"

Pyrethrum

Roseum—Single Hybrids Mixed—A lovely flower of easy culture. They resemble large daisies, but of various shades of pink, deep red and purple, and make a pretty show in the garden, and fine for cut-flowers, having stems 1½ feet long. They are perfectly hardy; 2 feet high. Pkt., 15c; 1/8-oz., 45c.

Aureum-Golden Feather-A most desirable dwarf Pyrethrum for edging of borders, with golden yellow foliage. Half-hardy perennial. Six inches. Pkt., 10c; %-oz., 35c.

Phlox, Hardy Perennial, F. Decussata

One of the finest hardy perennials, with extremely large heads of magnificently colored flowers, remaining in bloom during the late summer months. Two to three feet. Requires 3 to 4 months for seed to germinate. Mixed Pkt., 20c; 4-oz., 85c.

COLLECTION OF PHLOX

Collection contains the following varieties; Alba, Fireball, Violet, Yellow, Lilac, Crimson. One packet each, (value 60c).

POSTPAID FOR 50c

RICINUS—Castor Oil Bean—(See Page 57)

Salvia or Scarlet Sage

Splendens—A tender perennial blooming the first season from seed. The blossoms are borne on long stems in racemes or spikes and are fragrant. The plant blooms profusely. Two feet. Pkt., 10c; ½-oz., 35c; ½-oz., 60c; ½-oz., \$1.10; oz., \$2.00.

SWEET SCENTED LAVENDER—See Lavendula

Scabiosa, Mourning Bride or Pincushion Flower

Scabiosa, Mourning Bride or Pincushion Flower

The beautiful flowers in exquisite shades are borne on long stems. They make effective borders or beds, and no garden is complete without Scabiosa, especially when flowers are wanted for cutting; $2\frac{1}{2}$ feet tall. Hardy annual.

Any above	named.

Any above named, $\frac{1}{8}$ -oz., $\frac{50}{90}$ c; $\frac{1}{4}$ -oz.,

Mixed — All colors, pkt., 10c; ½-oz., 40c; ¼-oz., 70c.

Stocks

STOCK—Evening Scented—(See Mathiola Bieornis)

Virginia Stock or Malcomia Maritima

An early flowering small flowered annual, largely grown for edging border. Height about 6 inches, and blooms continuously during cool weather; finest mixed. Pkt., 5c; ¼-oz., 25c; ½-oz., 40c.

Sunflower

Mammoth Russian—Extra large heads. Pkt., 5c; oz., 10c.

Double Chrysanthemum Flowered—Hardy annual, growing from 3 to 5 feet. Large densely double golden flowers. Fine long stout stems for cutting. Pkt., 5c; ½-oz., 25c; oz., 40c.

Sanguineus—Shades of red, purple, and reddish brown combinations; 5 to 6 feet tall. Very showy. Pkt., 10c; ½-oz., 30c; oz., 50c.

VENIDIUM FASTUOSUM—(See Novelties, Page 52)

Schizanthus

Schizanthus, Butterfly or Fringe Flower
Called the "poor man's orchid" on account of
their easy culture and resemblance in form and coloring to some of the floral aristocrats. Sown out of doors in Spring where they are to remain, or started inside and transplanted when the weather is suitable. Hardy annual. One to two feet. Mixed. Pkt., 5c; 1/16-oz., 30c; ½-oz., 50c; ¼-oz., 85c.

Sweet William or Dianthus Barbatus

A beautiful sweet-scented old-fashioned annual and perennial. Grows one to two feet high and bears its flowers in clusters at the end of a stiff stem. It makes a beautiful bedding plant and is of easy culture.

Single—Mixed—The flowers are large, of handsome form and embrace a great variety of extremely rich and beautiful colors. Perennial. Pkt., 5c; ⅓-oz., 25c; ¼-oz., 40c.

Annual Flowering, Mixed—A new strain that blooms the first season. Flowers large, borne in great profusion and in beautifully assorted colors. Pkt., 10c; 1/8-oz., 25c; 1/4-oz., 40c.

Viola Cornuta (Tutted Pansies)

While the flowers of the Violas are not so large as the Pansies, yet they bloom very freely and for a longer time. The colors are clear and distinct and very effective in the rock garden.

Viola—Cornuta Mixed—Pkt., 10c; ½-oz., 40c; ½oz., 70c.

Vola Odorata (Sweet Scented Violets) Every garden should include sweet-scented Violets; dark blue. Pkt., 15c; 1/16-oz., 55c.

Vinca or Periwinkle

Dark green, glossy foliage and bright single blossoms of striking beauty; grows 12 inches tall; excellent for beds, borders and window boxes. Seeds are sometimes slow to germinate.

Mixed Colors—Pkt., 10c; ¼-oz., 35c; ½-oz., 60c.

Sweet William

Statice

SWEET ALYSSUM—(See Alyssum)

Thunbergia or Blackeyed Susan

A beautiful climber, 3 to 5 feet high, with pale yellow or orange-yellow flowers having a black center. Of quick growth, blooming profusely. Tender annual. Pkt., 5c; ¼-oz., 30c; ½-oz., 50c.

Veronica or Speedwell A beautiful species, with rich deep blue flowers. Pkt., 10c.

Statice Latitolia or Sea Lavender These useful plants bear purplish blue everlasting flowers that last a long time after cutting, and are of very easy culture. Hardy perennial. Two feet. Pkt., 10c; 1/8-oz., 40c; 1/4-oz., 70c.

Strawflowers or Helichrysum These flowers, with their rich, bright colorings, are most valuable for Winter bouquets. Keep well cultivated to produce the finest and largest number of flowers. The blooms should be cut as soon as they open, tied in small bunches, and dried slowly in a cool, shady place. Hang the flowers

Fire Ball—Fire Ball is a popular variety with rich, bright blooms. They are an intense and vivid crimson. The flowers are large and the brilliancy of the color is retained in the dried flow-

Canary Yellow-A well named variety since the flowers are of almost ball shape and of a rich, golden yellow color. They are borne profusely on strong, robust plants.

White Queen—Is a favorite on account of its pure white flowers. The reason for this is that White Queen is most easily dyed to any desired color. The blooms are of largest size and quite double.

Rose Queen-The color is a bright and cheerful rose, a shade that is always greatly admired. The blooms are of remarkable size, forming a

double flower which never shows a yellow center until it has passed its prime. But even then it is very beautiful, as a fine color contrast.

Violet Queen-The color is rich violet and intense. Violet Queen has quickly become one of the most favored of all Strawflowers. The dried blooms are particularly rich and life-like.

Any of the above, pkt., 10c: ½-oz., 20c; ¼-oz., 35c; $\frac{1}{2}$ -oz., 60c.

Strawflower

Mixed-Those who have not room enough to grow separate colors will get a fine display from this mixture. Pkt., 5c; 1/8-oz., 20c; 1/4-oz., 30c; 1/2-

VENIDIUM FASTUOSUM—(See Novelties, Page 52)

COLLECTION OF STRAWFLOWERS We will mail one packet of the five fine Strawflowers (value 50c), postpaid for 45c We will mail 1/8-oz. each of these five fine Strawflowers (value \$1.00), postpaid for 75c

Sweet Rocket

Sweet Rocket or Hesperis

A hardy perennial growing two feet high. A beautiful fragrant flower of the easiest culture and bearing clusters of white and purple blossoms. Flowers from June to September. Mixed Pkt., 5c; ¼-oz., 25c; $\frac{1}{2}$ -oz., 40c; oz., 65c.

Wild Flower Garden Mixture

These annual flowers can be grown easily. Simply raked in a corner of the garden will make a pretty display of flowers and will resemble a wild flower garden. We have made a mixture of seeds of the hardiest annual flowers that will bloom from early Summer until late. bloom from early Summer until late in the Fall. These are not wild flowers. Pkt., 5c; oz., 25c; ¼-lb., 70c; ½-lb., \$1.30; 1-lb., \$2.40.

> StimUplanT Makes a Wonder Garden

Mammoth Verbenas

GLADIOLUS BULBS—(See Page 60)

Wall Flower or Gold Lack

These half-hardy perennial and annual sorts should be sown in Autumn and carried over in coldframe; annual sorts may be sown indoors in March and will flower the first year from seed. Very pretty and fragrant.

Single Mixed—Pkt., 5c; 1/16-oz., 20c; 1/8-oz., 35c.

Early Paris Market—A beautiful single golden yellow variety which may be treated as an annual, flowering through the Summer from seed sown in the Spring. Pkt., 10c; 1/16-oz., 25c.

Blood Red—This is a much improved and selected stock of the Annual Wallflower brought out some years ago. We have ever since been carefully selecting this, and each year getting nearer to a blood red. Pkt., 10c; 1/16-oz., 25c; 1/4-oz., 40c.

Wall Flower, Siberian

Cheiranthus Allioni-This beautiful early-flowering perennial Wallflower has gorgeous orange flowers, and is a splendid little plant for the rock garden or border. Will bloom throughout the Summer if seed-pods are removed. May be sown in the open ground in September where required to flower the following Spring, or will bloom first season from seed, if sown in a hotbed in March and transplanted outdoors in May. Pkt., 10c; ¼-oz., 35c; ½-oz., 60c.

MARIGOLD—NEW GUINEA GOLD—(See Page 52) PANSY—NEW SWISS GIANTS (See Pages 18 and 52)

Verbenas, Mammoth

This distinct and beautiful race is worthy of a place in every garden. The average trusses measure 6 to 8 inches in circumference. They bloom freely, are vigorous in growth and contain beautiful new colors and shades. For garden beds and massing these Verbenas are unrivalled; flowers of the most brilliant colors produced continually from the most brilliant colors produce Spring until late in the Autumn. Earlier blooming may be had if plants are started indoors and transplanted in the open ground 12 inches apart, after danger of frost is over. Half hardy perennial, one foot high, usually treated as an annual.

VERBENAS - MAMMOTH - Pink, White, Blue Shades, Defiance, brightest scarlet; Firefly, bright red with small white eye; Lutea—Yellow, a unique color among Verbenas. Very fine.

Any of the above—Pkt., 10c; 1/8-oz., 35c; 1/4-oz.,

Fine Mixed—All colors, pkt., 5c; 1/8-oz., 30c; 1/4 - oz., 50c.

Peerless Mixed—Embracing a wide range of beautiful colors, the blooms being of mammoth size. Pkt., 10c; ½-oz., 35c; ½-oz., 60c.

WOOLFLOWER—(See Celosia Childsii, Page 56)

Wisteria

Sinensis Purple—One of our most popular hardy climbers. The flowers are abundantly borne in Spring on long drooping racemes of light blue before the leaves appear. Pkt., 10c.

Sinensis Alba-White. Pkt., 10c.

Wild Cucumber

Ornamental climbing cucumber with curious fruit, remarkable for its luxuriance and rapidity of growth. Sow in the Fall. Pkt., 5c; ½-oz., 20c; oz., 30c; ¼lb., 95c.

OUR FAMOUS ZINNIAS

A half hardy annual growing from 1 to 2 feet high. The colors are in great variety and very bright. Probably no flower has such an assortment of shades, tints and colors, and no bedding plant is more effective for a brilliant show. Sow in boxes early and transplant or sow directly in the garden after May first.

New Dahlia-Flowered

New Dahlia-Flowered Zinnias are distinct. The flowers are if immense size and are made up of Many small-sized petals. The individual petals stand well apart, giving an attractive grace and looseness to the flowers. They are strong growers, blooming profusely all during Summer and Fall.

Zinnia—Dahlia-Flowered our TEMPLE MIXTURE

We wish to call special attention to this mixture which is composed of precisely the same variety of seeds as sown by us on the grounds at the Shrine Temple, Helena, and which create such a sensation each year. This mixture contains all the standard and novelty shades in Zinnias and will give very satisfactory results. Large packet 40c; 4-oz., 50c; 4-oz., 85c; 1 oz., \$1.50.

Crimson Monarch—One of the best, with immense flowers. A bright and attractive shade of crimson-scarlet. The blooms are of perfect form; borne in great profusion.

Exquisite—The flowers resemble a large Decorative Dahlia. They are a pleasing shade of reddish rose with deeper rose in the center. One of the most attractive of this type.

Golden State—Rich golden yellow shading to orange as the flower ages. Blooms are large, of true Dahlia form, borne on long stems.

Scarlet Flame—Rich orange-scarlet. A dazzling color; is one of the brightest, always attracting attention. Blooms profusely.

Dream—The large flowers are a distinct shade of deep lavender, shading to purple as they age. A free bloomer of strong and sturdy growth.

Polar Bear—The finest of all White Zinnias. The flowers are of great size and pure in color. The flowers are borne with a wonderful profusion on fine strong stems.

Oriole—This variety seems to be particularly popular. A bright glistening orange shaded with liquid gold. As the flowers age they show a coppery cast, but the effect is beautiful at all times.

Any of these Dahlia-Flowered Zinnias—Pkt., 20c; 1/16-oz., 30c; ½-oz., 50c; ¼-oz., 85c; oz., \$2.75.

Dahlia-Flowered Mixture — This, is a complete mixture of Dahlia - flowered Zinnias, including all the above separate colors and many other beautiful and rich shades. Pkt., 15c; 1/2-oz., 35c; 1/4-oz., 60c; 1/2-oz., \$1.00; oz., \$1.75.

Zinnia-New Dahlia-Flowered

Zinnia—Robusta or Giant Mammoth—Tall Double
—White, Flesh, Scarlet, Yellow, Crimson, Deep
Rose, Purple, Burnt Orange.

Any of the above, pkt., 10c; $\frac{1}{4}$ -oz., 40c; $\frac{1}{2}$ -oz., 70c; oz., \$1.15.

Zinnia—Tall Double—Mammoth Mixed. Pkt., 10c; ¼-oz., 35c; ½-oz., 60c; oz., \$1.00.

OR COLLECTION OF THE EIGHT NAMED VARIETIES (Value 80c) postpaid for 65 \$\foralle{f}\$

Zinnia Elegans—Dwarf Double Mixed — Pkt., 5c; ¼-oz., 30c; ½-oz., 55c.

Luminosa—New—Bright deep pink with a light suffusion of salmon; an entirely new shade. Pkt., 25c; ½-oz., 75c; ½-oz., \$1.25; ½-oz., \$2.25.

COLLECTION OF DAHLIA-FLOWERED ZINNIAS

This collection contains one packet of the six separate colors of Dahlia-flowered Zinnias described above. It will be mailed to any address, postpaid, for \$1.00

The early Flowering Type of Sweet Peas are most valuable for our Northern States. They are now in great demand for early Spring blooming, coming into flower three to four weeks earlier than the Summer flowering varieties. A very acceptable gift. The collection contains the following eight varieties:

Amethyst—Rich warm purple.
Fair Maid—Blush pink on a white ground.
Grenadier—Rich poppy scarlet.
Chevalier—True rose color. Waved.

Aviator—Finest large orange-scarlet flower.

Sweet Lavender—Beautiful shade of lavender.

New Blue—A charming shade of true blue.

White Harmony—Large waved pure white.

One packet each of these eight fine Early Flowering Sweet Peas (value \$1.30) will be sent postpaid to any address \$1.10

One-half ounce each of these eight fine Early Flowering Sweet Peas (value \$2.70) will be sent postpaid to any address for \$2.50

COLLECTIONS OF FLOWER AND VEGETABLE SEEDS

Every one loves to "grow things." Doctors advise that we eat more vegetables; that we grow the food we eat. Vegetables are healthful. They contain vitamins. Digging, hoeing and planting furnish the finest kind of exercise. No vegetables are like those gathered fresh from the garden. The time spent in the garden is an actual gain in health and money saved.

Many people think that seeds can only be planted successfully during the Spring months of April and May. The wide-awake planter sows "successive crops" throughout the Summer of Beets, Carrots, Endive, Lettuce, Peas, Radishes, Spinach, etc. A space 50x50 will produce more vegetables than the average family can consume and if purchased would exceed \$60.00 to \$100.00. Therefore the cost of the family's food can be reduced by having your own vegetable garden. Flowers also make the home more enjoyable.

Asparagus

Asparagus

of drill.

5 lbs. to the acre.

Ger.—Spargel.

Scand.—Asparges.

Sow early in the Spring in drills 2 inches deep and 12 inches apart if to be cultivated by When the hand. plants are one or two years transplant to rows 5 feet apart, and 18 inches apart in the row. Cover the soil 4 to 5 inches deep with well rotted manure and disc well-then plow as deep as possible and harrow. Turn furrows feet apart, about 6 inches deep. Place plants in rows about 18 inches apart, with roots well spread out. Turn a light furrow back over them and level by cross harrowing.

Conover's Colossal

—A favorite in our
western market,
having a pink
of vigorous growth.

tinge, and very fine flavor; of vigorous growth. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.25.

Washington—Giant Rustproof—The Washington is a rust-resistant, vigorous, high-yielding strain of Giant Asparagus. Plants grow rapidly and produce uniformly long shoots of superior table qualities. It produces large straight shoots of a dark green color. The tips are tight and firm and do not open out or begin to branch until well out of the ground; a very valuable feature. Pkt., 10c; oz., 25c; ¼-lb., 60c; lb., \$1.50.

Palmetto—The plants are strong and vigorous in growth, producing large, thick, dark green shoots, with a distinctly pointed head or tip. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.25.

ASPARAGUS ROOTS—(See Page 48)

OUR LITTLE PRUNING BOOK

Clear and concise methods of pruning fruit trees, small fruits, trees, hedges, vines, roses, etc. Each, postpaid, 25c.

HOT KAPS—(See Page 130)

This Asparagus Knife is made of the best steel; cutting edges are hardened and tempered to stand rough usage. Used also as digger and weeder for long tap-rooted weeds such as dandelions. Each, 45c; postpaid, 53c.

Dwarf Shell Beans

Shell Beans are grown exclusively to use as dried beans during Winter. The food value of dry beans is very high. Sow 16 to 24 lbs. to the acre.

Great Northern Navy—This variety is especially adapted to Montana soil and climate, and is being grown in increasing quantity each season. In our opinion it leads all other varieties of Navy Beans. Its flavor and tenderness as a baked bean are "par excellence." Pkt., 5c; ½-lb., 15c; lb., 25c; 2 lbs., 40c.

FOR LARGER QUANTITIES—(See Field Seeds)

Broccoli or Winter Cauliflower

¼-oz. to 100 fcet of drill—2 to 3 ozs. to the acre Ger.—Sparcekohl. Scand.—Broccoli-kaal.

(One ounce will produce about 3,000 plants)

Sow the first week in May in drills 2 to 4 inches apart, covering seeds lightly. When the leaves are about three inches broad, transplant to prepared beds 2 feet apart each way. Resembles Cauliflower; cultivation the same.

BROCCOLI—Snow White—150 days—Pure white color; heads medium size, close and compact. Pkt., 10c; ½-oz., 40c; oz., 75c; ¼-lb., \$2.50.

BROCCOLI — Green Sprouting — This delicious Italian vegetable has become a great favorite in this country; does not make solid heads but produces an abundance of green, tender sprouts with loose flower heads at the ends which can be cut off and cooked like spinach or brussels sprouts. The sprouting Broccoli provides delicious, healthful, boiling greens during Summer, Autumn and early Winter. A continuous supply may be had for a long time; cut when the buds begin to burst into flower. Sow in May. Pkt., 10c; ½-oz., 45c; oz., 75c; ½-lb., \$2.75.

Broccoli—Green Sprouting

NOTICE-If ordered alone add for mailing, 8c per ½-pound, 10c per pound, and 15c per 2 pounds

Bountiful

Bountiful - This excellent dwarf, green podded sort is similar in appearance to Early Yellow Six weeks but is of much better quality. The vines are vigorous and productive. The pods are very long, six to seven inches, straight, broad, flat, light green, of handsome appearance and absolutely stringless. They are tender and brittle. The pods are longer, broader, and have much longer tips than those of Long Yellow Six Weeks. Kidney shaped, light yellow with brownish circle about eye. Bountiful is a most desirable early sort. 62 days. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Full Measure-A fine stringless bean of splendid melting quality. The round pods are very fleshy, and dark green in color; 6 inches long, fine grained and of good flavor. Excellent for the table and for preserving, very prolific. Pkt., 5c; ½-lb., 20c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Stringless Green Pod—Remains tender and crisp a long time. Pods are pale green, long and round, meaty and of excellent flavor. The plants have a spreading habit of growth and produce large quantities of pods which are very uniform both in size and shape. 65 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Extra Early Red Valentine-Is very hardy and early, germinates in cold ground where other yield well; pods are round and fleshy and eaten when young are of good quality. The demand for a hardy early bean of good quality has established a reputation for this excellent sort. For market garden and home use it is an easy winner. 45 days. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25. would rot. Vines are about 15 inches high.

PLANT A GARDEN

Do you know that it doesn't require much space to raise vegetables enough for your family?

All it requires to guarantee to you and your family nice, fresh, crisp radishes, onions, peas, lettuce, beets, carrots, turnips, spinach, cabbage and a world of other good healthy food is a few selected seeds, a little time devoted to healthful exercise and there you are —a big saving in the family budget.

Feltham Prolific

Feltham Prolific

"THE GREATEST PRODUCER YET INTRO-DUCED"—A MARVEL OF PRODUCTIVENESS

Feltham Prolific—Is a dwarf green bean and one of the heaviest croppers yet introduced. It produces a mass of medium sized, rich green fleshy pods which are very crisp, and stringless. As the seed is small they do not quickly show through the pods. This is a great advantage as many other varieties age so quickly if allowed to go a few days too long. "Feltham Prolific" is remarkably quick in growth. Try this sweet and delicious bean. They are really wonderful. Pkt., 10c; ½-lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50.

Extra Early Red Valentine

NOTICE-On Beans in lots of 10 lbs. or more of one variety deduct 5c per lb. when ordering by express or freight. NOT PREPAID.

INOCULATE THIS SEED WITH STIMUGERM

BEANS

INOCULATE THIS SEED WITH STIMUGERM

(2 lbs. to 100 feet in drill, or 150 hills; 120 lbs. to the acre, in drills)

Beans require a light friable soil with plenty of moisture. In the garden, the soil should be made mellow and rich, and kept so. For garden, a succession of sowings can be made from the first week in May until the middle of June. Sow in rows 18 to 24 inches apart and cover from 1 to 2 inches deep, but not more. Keep the pods picked and the vines well watered and the beans will continue bearing much longer than if allowed to dry up. Hoe the rows occasionally. For farm crop, plant about 25 pounds per acre in rows 36 inches apart.

DWARF, OR BUSH, WAX OR YELLOW PODDED VARIETIES
THE SIX BEST YELLOW PODDED BEANS FOR MONTANA

NOTICE—If ordered alone add for mailing, 8c per ½-lb., 10 cts. per lb., 15c per 2 lbs.

Early Wonder Wax — It is loaded with pods, five to seven inches long; flat, plump, handsome and meaty, of a clear, waxy yellow color. The pods are tender, brittle and of fine texture. We claim this is the earliest wax-podded Bean. Practically rust-proof; a bountiful yielder, in bearing for long season, it is an ideal Bean for the home and market gardener. It seems determined to yield a crop in good weather or bad. It is a real money maker for the market gardener. 55 days. Pkt., 5c; ½-lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50.

Improved Golden Wax—Probably the best known of all Wax Beans; it is an ideal Wax Bean; very prolific. Thick fleshed, pods flat and stringless. 60 days. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Sure Crop Stringless Wax—Very much resembles Bounitful in the sturdy character and disease-resistant constitution of its plants. It also starts bearing within 60 days after seeds are sown, but if anything its hearing season is

within 60 days after seeds are sown, but if anything its bearing season is longer. The pods average 6 to 7 inches long, are very meaty, flat but thick through, and we have never found a stringy specimen. In common with most black-seeded varieties, Sure Crop Stringless Wax is very hardy and may therefore be planted several days earlier than the light seeded varieties. 65 days. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Davis White Wax—Extra Early—This is also called the Davis White Kidney Wax. It is a well known variety. The plants are very hardy and productive and is a handsome wax-podded white seeded intermediate sort. The plants are very vigorous. The pods are remarkably long, about six inches, sometimes longer. They are handsome, light yellow, straight, very attractive and are crisp and tender. The dry beans are excellent for baking. Seed medium large, clear white and kidney shaped. 55 days. Pkt., 5c; ½-lb., 20c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Brittle Stringless Wax—"A very popular Bean"—
Without a doubt the earliest of all Wax Beans, also a great cropper, very hardy and extremely prolific; the pods are round, fleshy and entirely stringless, often measuring 4½ to 6 inches long. They are of fine flavor, solid and tender. The pods have white seeds, showing only a small black dot at the eye, and when allowed to ripen fully make an excellent shell bean. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Sure Crop Stringless Wax

We handle a complete line of Planet Jr. Seeders and Cultivators; also Barker Weeder Mulcher and Cultivator. Also a complete line of small garden tools for the garden. See last pages of Catalog.

Black Wax-Pencil Pod

Black Wax—Pencil Pod—Is the most satisfactory of the early dwarf Wax Beans. Of dwarf, bushy growth, about fifteen niches high, large luxuriant foliage, beneath which in great clusters will be found an enormous crop of beautiful straight yellow pods six to seven inches long, well rounded, deeply "saddle backed," meaty and solid clear through; they are brittle, of rich, mild flavor, and entirely stringless. An early sure cropper; of the finest quality. 65 days. Pkt., 5c; ½-lb., 20c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Brittle Stringless Wax

On Beans in lots of 10 lbs. or more of one variety deduct 5c per lb. when ordering by express or freight. NOT PREPAID.

BEANS---Pole or Running

INOCULATE THIS SEED WITH **STIMUGERM**

NOTICE-If ordered alone add for mailing, 8c per 1/2-pound, 10c per pound, and 15c per 2 pounds

Pole Beans: yield more heavily than the dwarf varieties, bearing an abundance of fleshy, tender Beans. They are more sensitive to cold and wet and should be planted later. About the middle of May plant four to six Beans around each pole, setting poles four feet apart each way.

Kentucky Wonder or Old Homestead-Green Pod-An early and productive variety bearing a fine crop of large green Beans 7 to 9 inches long. Pods are saddle backed, very fleshy, thick, tender and brittle and of good quality, hanging in large clusters from the top to the bottom of the pole. Very prolific; 80 days. Pkt., 5c; ½-lb., 20c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Kentucky Wonder Wax — Yellow Pod — The best pole wax Bean for Northern planting. It is similar in habit of growth to "Kentucky Green Pod" and bears as early. Pods are beautiful goldenyellow, and so fleshy that often the thickness surpasses the width; make delicious eating. Pkt., $5c; \frac{1}{2}$ -lb., 25c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Scarlet Runner—An English Bean of great merit; very tender and sweet; also grown as ornamental flowering vine for trellises. Pkt., 5c; ½-lb., 30c; lb., 50c; 2 lbs., 90c; 5 lbs., \$2.00.

S. N. & S. CO'S. COMPLETE VEGETABLE SEED COLLECTIONS

On page 74 we offer several collections of choice Vegetable Seeds, suitable for gardens of various sizes, and each containing a careful selection of reliable standard sorts in well-balanced quantities.

NOTICE—On Beans in lots of 10 lbs. or more of one variety, deduct 5c per lb. when ordering by express or freight. NOT PREPAID.

Kentucky Wonder or Old Homestead

Beans,—Bush Lima
(One pound will plant 50 feet of row) Lima Beans are very susceptible to cold and the seed must not be planted until the ground has become thoroughly warm. The end of May is usually safe. Plant the seed edgewise (eye down) 6 inches apart in the row and cover two inches deep with fine soil. They should be sown on well enriched ground.

Henderson's Bush Lima

Henderson's Bush Lima—This variety belongs to the small Limas, known as Carolina or Sieva Lima Beans. On account of their hardiness they are worth growing in the North, where they will mature early and produce an enormous crop. A week earlier than Burpee's Bush Lima and the flavor is delicious and sweet; bear tremendously, each pod being filled with flat light green Beans. When mature, the Beans are practically white and keep well for Winter shell Beans. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.40.

Burpee's Bush Lima-Are early and of stout growth and always erect, yet branching so vigorously that each plant develops into a rounded bush from 2 to 3 feet in diameter and from 18 to 24 inches tall. Pods are uniform in size with an average of five large Beans to a pod. They are thin-skinned and of fine flavor. They are immense yielders. The pods are borne in clusters and are easily gathered. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.40. English or Broad Windsor - This Bean is very hardy. Plant as soon as the soil is in good condition. Plant four inches apart and 2 inches deep in drills three feet apart, to insure well filled pods; pinch off the tops as soon as pods begin to set. 65 days. Pkt., 5c; ½-lb., 25c; lb., 45c; 2 lbs. 20c 45c; 2 lbs., 80c.

LIMA BEANS FOR COOKING ONLY

1 lb., 15c, postpaid, 25c; 2 lbs., 24c, postpaid, 37c; 5 lbs., 50c, postpaid, 69c.

HOW TO PLANT—The soil should be rich and deeply plowed. Sow in rows 14 to 20 inches apart and about 1 to 1½ inches deep. As soon as the plants have the fifth and sixth leaf, thin to one plant each 3 inches apart. Then irrigate. Cultivate often and do not water again until absolutely necessary as the soil will dry from the surface of the total transfer of the surface of the surfa best results. Keep clean and remember that cultivation is the next thing necessary after the best seeds and the two are necessary for success. (One ounce to 100 feet of drill, 5 to 6 lbs. per acre, in drills; 15 to 20 lbs. to the acre broadcast.)

Beet-Early Wonder

Early Wonder or Boston Crosby—(35 Days)—This new variety is extremely early, deep red, tender and sweet. One of the earliest and most perfectly shaped Beets. Its small-sized top and small, clean tap root, make it desirable. Its attractive appearance uniformity of size shape tractive appearance, uniformity of size, shape and color, and excellent keeping qualities have created a splendid demand for this sort. Grown very extensively for late Fall sowing, as it matures two weeks earlier than any other desireble tures two weeks earlier than any other desirable Beet. We urge that you give it a trial. Pkt., 5c; oz., 20c; ¼-lb., 45c; lb., \$1.00.

Beet-Crimson Globe

Crimson Globe—It is very symmetrical, with small tap root, and but few fibrous roots; color outside is deep blood-red; inside layers of blood-red; light-grained and unsurpassed in quality. One sowing only is necessary to produce Beets for market and main crop for Winter use. Very tender and sweet. 45 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 90c.

Beet-Detroit Dark Red

Detroit Dark Red—The roots are globular or ovoid. They are smooth and have but little tops. The skin is blood-red and the flesh dark red lined with a lighter shade. The flesh is tender and the flavor decidedly sweet. A popular favorite for canning because of its extra deep dark red color. 50 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 85c.

Early Blood Turnip—An extra selected stock of blood Turnip, having larger tops and root than Detroit Dark Red and requiring a longer time to mature. The roots are dark red, slightly flat-tened. The flesh is deep red, zoned with lighter shade, sweet, crisp and tender. This is an ex-cellent market and home garden sort for Summer and Autumn use. 50 days. Pkt., 5c; oz., 15c; 4-lb., 30c; lb., 85c.

Extra Early Egyptian—This is the best variety for forcing. It is also excellent for first early crop outdoors, being very early; with small tops. The leaves are dark green shaded and veined with dark red. The roots are very dark red, moderately thick, a little rounded on top, distinctly flat on the bottom and about two inches in diameter when mature. The flesh is dark red, zoned lighter shade; firm, crisp and tender. 40 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 90c.

Half Long Blood-An excellent main crop Beet Roots deep red in color and always symmetrical and smooth. In quality it is sweet, crisp and tender, and is an enormous cropper and a reliable Winter keeper. It is a heavy Beet without being hard to pull. It never becomes woody and is always good for table use or stock food, whether pulled young or old. 60 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 90c.

SUGAR BEETS

FOR SUGAR MAKING

OUR LITTLE PRUNING BOOK

Clear and concise methods of pruning fruit trees, small fruits, trees, hedges, vines, roses, etc. Each, postpaid, 25c.

5 to 6 pounds per acre in drills. 15 to 20 pounds per acre broadcast

Sugar Beets are not as heavy yielders as the Mangels but are of superior quality containing a larger amount of sugar. They are excellent for feeding cows, improving wonderfully the quality and quantity of the milk. Sugar Beets require deep, well enriched soil. The seed should be sown in drills 2 to 2½ feet apart, and covered 1 to 1½ inches deep, any time during April, May or June. Thin the plants carefully to stand 8 inches apart in the row.

Klein's Wanzlebener Sugar Beet

Klein's Wanzlebener—Has rather long slender root, very rich in sugar; will yield under average conditions, 16 tons to the acre. All stockmen know that sugar makes fat, and will realize its value as a stock food. 80 days. Pkt., 5c; 4-lb. 20c; lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.25.

Vilmorin's Improved—This French variety is popular with sugar beet growers; contains a large percentage of sugar and requires less water than others. 80 days. Pkt., 5c; ¼-lb., 20c; lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.25.

Half Sugar and Half Mangel For Stock Feeding

The ground should be thoroughly prepared and made firm and mellow, same as for Mangels. Seeding and cultivation should be continued in much the same manner except that they should be thinned out 6 to 8 inches in the row. The Giant Feeding Sugar Beets or Half Sugar Mangels are especially valuable for feeding stock as they give a feed of much greater nutritive value than Mangels.

Mangel Wurzel-Yellow Globe

Giant Feeding or Half Sugar White Mangel—The most valuable of all for stock feeding, very heavy yielder, the favorite with stock feeders, very easily pulled, growing half out of the ground. White flesh, green top. Pkt., 5c; ¼-lb., 20c; lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.25.

Giant Feeding or Half Sugar Rose Mangel—A magnificent sort, growing at least half out of the ground, rendering the crop easy to gather. Skin of the upper part is rose colored, and the lower part white. Flesh white, rose top. Pkt., 5c; ¼-lb., 20c; lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.25.

Mangel Wurzel 5 or 6 lbs. to the acre

THE FOUR BEST MANGELS FOR STOCK FEEDING

Root crops are a great necessity for all kinds of stock, also chickens. Root feeding gives tissue building substance to the body, and acts as a tonic, keeping the digestive organs in a healthy condition. Root crops should be regularly fed to all stock. Results will show in appearance, also in increased weight, and will enrich and increase the milk. The ground should be thoroughly prepared, and made firm and mellow. Sow in April and May in drills 2 to 3 feet apart. When 4 to 5 inches high thin to 12 to 15 inches apart.

Mammoth Long Red — This variety produces the largest yield of any kind of Mangel. The quality of the roots for feeding is high. The roots grow very large and keep well. They are quite long, light red in color and grow well out of the ground so are easily harvested. Pkt., 5c; ¼-lb., 25c; lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.25.

Danish Sludstrup—Is considered the best of all Mangels. In color it is reddish-yellow. It contains the largest per cent of nutriment found in any sort. It is very hardy, grows well above the ground and is easily pulled. Pkt., 5c; ¼-lb., 20c; lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.25.

GROW MANGELS FOR POULTRY FEEDING

Mangels are as good for poultry feeding as for stock, and should be fed regularly in Winter, when no other green feed is available. Mangels help furnish a balanced ration, and keep the hens healthy, stimulating the production of eggs, just when prices are highest. They cost but little, in money and labor, and often yield 15 to 20 tons of succulent roots per acre.

Chop or cut the roots and green tops, and feed with grain, at the rate of 25 lbs. for 100 hens per day

Write for Price on 25-lb. Lots and Larger Quantities

Golden Tankard—A distinct variety, particularly valuable on account of its richness in saccarine matter, and highly prized by dairymen for its milk-producing qualities. The flesh, which is of a distinct deep yellow, is very sweet and tender. The large roots are oval in shape, and therefore will pull easier. 90 days. Pkt., 5c; ¼-lb., 20c; lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.25.

Yellow Globe—An especially good variety to grow if one has a limited supply of water; a great favorite for dairymen, making a wonderful increase in milk; easy to pull; tops are small. 85 days. Pkt., 5c; ¼-lb., 25c; lb., 65c; 5 lbs., \$3.00; 10 lbs., \$5.50.

Swiss Chard

Chicory Whitloof or "French Endive"—Seed sown in May or June produces roots which, when taken up and placed in sand in a warm dark place, throw out tender white sprouts which are used as salad. Often called French "Endive." Pkt., 10c; oz., 25c; ¼-lb., 65c; lb., \$2.00.

Swiss Chard

Ger.—Briskohl. Scan.—Bladbed. 2 ozs. to 100 feet of drill

Swiss Chard or Spinach Beet-Lucullus-Is a delicious vegetable and easily grown. Swiss Chard is used extensively as greens or in the same manner as Asparagus, when only the rib is eaten. Also cooked like spinach. The outer leaves should either be cut off or pulled off when young, and may be picked continuously from June until frost, for when leaves are cut others take their places rapidly. 30 days. Pkt. others take their places rapidly. 30 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., 95c.

Brussels Sprouts

Ger.—Rosenkohl.

Scand.—Rosenkaal.

Brussels Sprouts

Brussels Sprouts - Species of cabbage. One ounce will produce about 3,000 plants. A packet 200 plants. It affords fresh green sprouts in the Fall. The cabbage-like heads which grow upon the stem are improved by a moderate frost. Sow in hot beds in March or April and in the open ground in May; cultivate same as cabbage.

Improved Half Dwarf-An improved variety growing about 20 inches high; produces sprouts in abundance; cut out head of plant when sprouts have formed. 25 days. Pkt., 5c; oz., 35c; ¼-lb.,

CABBAGE

Ger.-Kohl-Kraut. Scand.—Kaal. One ounce will produce 3,000 plants; one-quarter pound will produce plants for one acre; 4-oz. to

100 feet of drill. The soil should be deep and rich. For early crop grow plants in hot beds, transplanting to cold frames and then after danger of freezing to the open ground. Cultivate often and keep well watered. For late crops sow seed in open ground and transplant, or in hills where wanted and thin to one.

Extra Early Varieties

Earliest of All

Earliest of All—Is the earliest hard heading Cabbage in cultivation. It combines earliness with solidity, good size, delicious flavor, tenderness and productiveness. It has produced fine marketable heads in 70 days from the sowing of the seed; very compact with few outer leaves, permitting close planting. It is a great money maker for the market gardeners and valuable for the home garden. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25; lb., \$4.50.

Extra Early Winningstadt—A Medium Size Pointed Head which is Firm and Solid-A fine header; will stand more frost, drought, wet, insects and diseases than any other early Cabbage. Plants very compact, with short thick leaves. Heads regular, conical and very hard. It is the largest of the pointed varieties. 90 days. Pkt., 5c; ½-oz., 20c; oz., 30c; ¼-lb., 85c; lb., \$2.75.

CABBAGE PLANTS—(See Page 49)

Early Jersey Wakefield-One of the finest types of early Cabbage. Produces uniform, pointed heads. The outer leaves form a protection for the heads which enables them to be set out earlier than other sorts. Usually matures in 80 days. Pkt., 5c; ½-oz., 20c; oz., 30c; ¼-lb., 85c; 1 lb., \$2.35.

Copenhagen Market-A very early variety. It is the finest large, round-headed early Cabbage in cultivation. The heads average about ten pounds each in weight, are hard and solid and with small core. The quality is extra fine and sweet. It matures as early as the Wakefield and will yield more to the acre in weight. It is a short-stemmed variety, the heads nearly resting on the ground. The leaves are light green, rather small, saucer-shaped and tightly folded, making it possible to set them close together in the field. 85 days. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00; 1b., \$3.50.

Cabbage—Copenhagen Market

Golden Acre—An extra early variety; heads medium size, very solid and uniform. Matures even earlier than Early Jersey Wakefield. Produces a tightly folded, round head of superb quality with few outer leaves, suitable for close planting. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25; lb., \$4.50.

Second Early Variety

Cabbage—Early Summer

reliable second early Cabbage, maturing about ten days after Jersey Wake-field. Makes a large, solid, flattish head, with short outer leaves, which enable sclose planting, and is a good keeper. It matures soon after the pointed head sorts, and is valuable for a second crop. It is suited to all sections. 110 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00; lb., \$3.00.

Cabbage—Large Late Flat Dutch

Large Late Flat Dutch—A low-growing variety, heads large bluish green, round, solid, broad and flat on top; an excellent Fall and Winter variety, and a good keeper. It is a sure header. 120 days. Pkt., 5c; ½-oz., 20c; oz., 30c; ¼-lb., 90c; lb., \$2.50.

Hollander or Danish Ballhead—Very solid, of fine quality. Plants vigorous, compact and exceedingly hardy in resisting cold and dry weather; leaves large, thick, bluish green. Heads medium sized, round, very solid, and stands shipment better than any other late sort. 120 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00; lb., \$3.25.

Cabbage-Hollander or Danish Ballhead

Cabbage—Drumhead Savoy

Drumhead Savoy—The plants are vigorous, of medium size, with rather short stem and are sure heading; the outer leaves are medium large, thick, fleshy and uniformly crumpled; the heads are large, nearly round, sweet and tender. 110 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ½-lb., 90c; lb., \$3.00.

Danish Roundhead—(Short Stem) — The heads of this variety are larger than the Danish Ballhead, grows larger and has a shorter stem; the interior leaves blanch white; very solid and exceedingly crisp and tender and of excellent flavor. 115 days. Pkt., 10c; ½-oz., 25c; oz., 35c; ½-lb., \$1.00; lb., \$3.25.

Red Rock—The largest variety of Red Cabbage, and produces heads which are remarkably solid. The heads are round, very solid, will keep for a long time. It is the best and most attractive Red Cabbage grown. Fine for pickling. 120 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ½-lb., \$1.00; lb., \$3.00.

Chinese Pe Tsai or Celery Cabbage—Grows somewhat like the Cos Lettuce. Boiled and seasoned with butter it makes a most delectable dish, and is splendid for salads. Sow later than ordinary Cabbage, as too early sowings have a tendency to run to seed too quickly. 75 days. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 95c; lb., \$3.00.

Chinese Pe Tsai or Celery Cabbage Blanched Head

Carrot :

Ger.—Mochre. Scand.—Gulrod. (One oz. to 100 feet of drill; 3 to 4 lbs. to the acre)

Good sandy loam is best adapted for Carrots of all varieties. The shorter varieties, however, can be sown on heavier soil with good results.

Early French Forcing or Golden Ball—It is an ex-cellent Carrot for forcing as well as for an early supply from the garden. Small roots, 1½ inches in diameter, tender and of fine flavor. Rich orange skin and flesh. 50 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.25.

Early Scarlet Horn or Short Horn—One of the most popular early varieties for market or home. The roots measure 1½ inches in diameter and about 3 inches in length. They are a rich deep orange color and of sweet flavor. 55 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.00.

Carrot—Oxheart or Guerande

Oxheart or Guerande—Medium early, bright orange color, fine grained and sweet; one of the best table varieties. Can be pulled by hand; well suited to heavy soils, but will thrive equally well in other situations. 70 days. Pkt., 5c; oz., 25c; ¼-lb., 50c; lb., \$1.25.

Early Chantenay or Model—A most excellent medium early, half long variety. The tops are medium sized with small neck. The roots are thick, six inches in length, uniformly half long or stump rooted but tapering slightly; smooth, deep orange-red color. The flesh is very crisp and tender. Variety is extensively used for bunching. 65 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.00.

Danvers Half Long-A standard variety and one of the heaviest croppers. Color dark orange, very thick shoulder, of a most excellent quality. Length 7 to 7½ inches. 75 days. Pkt., 5c; oz., 20c; ¼-lb., 40c; lb., \$1.00.

Improved Long Orange—This is a variety of the largest size. The roots are uniform in size and smooth. Of gradually tapering shape, holding their thickness well throughout the length; rich, deep orange color. It is a good keeper of fine quality for Winter use. 80 days. Pkt., 5c; oz., 15c; 4-lb., 40c; lb., \$1.00.

Pride of Denmark — Is an admirable Carrot for storing and shipping, holding to a remarkable degree its fine flavor, tenderness and crispness. The long roots (6 to 8 inches) are absolutely smooth, of a beautiful scarlet color, and are practically coreless. Order early as this Carrot has already were marks of distinction and the has already won marks of distinction, and the seed is going to be much in demand this year. Pkt., 10c; oz., 20c; ¼-lb., 60c; lb., \$2.25.

S. N. & S. Co's. New Red Cored Chantenay-This new Carrot meets the requirements of the home garden and market gardener. Tops are shorter than the regular Chantenay and considerably earlier, making bunching easy. The outstanding features are the smoothness of the roots, the excellent color, both exterior and interior; the tenderness of the core and the uniform and perfect stumping. Excellent for slicing, dicing in soups and salads. Roots tested for sugar average 10 per cent sweeter than any other Carrot. Pkt., 10c; oz., 20c; 4-lb., 60c; lb., \$2.00.

Cauliflower—Early Snowball

Cauliflower

(One ounce for 3,000 plants)

(4-oz. to 100 ft. of drill—2 ozs. to the acre)

Culture—Cauliflower is a gross feeder, and well repays heavy manuring and high culture. It succeeds best on well drained soil. For Spring crop, plant the seed in protected beds early in February and the plants will be ready to transplant probably early in April. The young plants should be thinned, since they become spindly if allowed to grow too thick in seed bed. Plant in rows two feet apart—eighteen inches in the row.

Early Snowball—Is the best all-around Cauliflower on the market for early or late use, for the family or the market garden. It heads where others fail. Its close and compact habit of growth permits one-third more to be planted on the same space of ground than can be done with other varieties. 90 days. Pkt., 25c; ¼-oz., 85c; ½-oz., \$1.50; oz., \$2.50; ¼-lb., \$7.50.

Dry Weather or Danish Giant—Is more resistant to unfavorable season than other sorts, particularly in dry weather. 100 days. Pkt., 15c; 4-oz., 85c; ½-oz., \$1.50; oz., \$2.75; ¼-lb., \$8.00.

Extra Early Snowball or Danish Perfection—This new strain possesses all the good qualities of the best Early Snowball strains and has shown an unusual uniformity in maturing. The leaves closely enfolding the head give it a particularly attractive appearance, and as the inner leaves almost cover the snow white flower the necessary early tying up as in the case of other early sorts is largely avoided. It is the earliest strain of its type and recommended for extra early marketing. 80 days. Pkt., 15c; ¼-oz., \$1.00; ½-oz., \$1.85; oz., \$3.50; ¼-lb., \$10.00.

Carrots For Stock THE TWO BEST VARIETIES

Victoria—There can be only one best stock Carrot, and we think our Mastodon is that Carrot, yet yet many prefer a yellow Carrot. No yellow Carrot can approach the Victoria in size, in yield and in feeding qualities. It is the largest orange or yellow Carrot known. The roots are remarkably fine and of excellent quality, possessing high feeding properties; is a heavy cropper on all soils and grows nearly half again as much weight an acre as the ordinary varieties. The roots grow more above ground and it is easy to gather. 90 days. Oz., 15c; ¼-lb., 30c; lb., 80c; 2 lbs., \$1.40; 5 lbs., \$3.25; 10 lbs., \$6.25.

Mastodon—It is the heaviest Carrot grown, yielding more tons to the acre than any other sort. The flesh is white, crisp and very sweet. It is a vast improvement on the white and green Belgian sorts and is much more productive. The roots are short and very heavy at the shoulder, rendering them easily harvested. Too much can scarcely be said of their size and great productiveness. The roots frequently measure 15 to 20 inches in circumference, and 20 to 30 tons to the acre is not an extravagant statement as to the acre is not an extravagant statement as to yield. 90 days. Oz., 15c; ¼-lb., 30c; lb., 80c; 2 lbs., \$1.40; 5 lbs., \$3.25; 10 lbs., \$6.25.

Celery

(See also Vegetable Plants) Ger.—Sellerie. Scand.—Selleri.

(One ounce will produce 7,000 plants)

(1/4-ounce to the 100 feet of row; 2 ounces to acre)

Sow seeds in a hot bed or cold frame. As soon as the plants are about 3 inches high, transplant to a well prepared bed, setting them 4 to 5 inches apart. When some 8 inches high, and the plants stocky, set them in trenches. Earth up a little during the Summer, keeping the leaf stocks close together so that the soil cannot get between them. Finish earthing up in Autumn. Never hoe or earth up in moist weather.

Keep the seed bed moist to insure quick ger-

mination and vigorous growth.

Golden Plume or Wonderful-This new variety is similar to Golden Yellow Self Blanching. It matures fully as early and has been found to be more resistant to attacks of blight and rust. The plants are semi-dwarf, stocky and vigorous growing with very full heart which bleaches quickly to a rich golden yellow color. Of very attractive appearance, superior quality and fine nutty flavor. A very profitable variety for market and the home garden. Pkt., 25c; ½-oz., 45c; oz., 80c; ¼-lb., \$2.50.

Golden Self Blanching—A remarkable early sort, entirely self blanching, with beautiful large golden yellow heart; crisp, solid and of a nutty flavor. 110 days. Pkt., 25c; ½-oz., 35c; oz., 60c; ½-lb., \$1.80; lb., \$6.00.

Easy Blanching

Easy Blanching—A most valuable Celery with a remarkable natural tendency to blanch. Those who have never been successful in growing good Celery can depend on this variety. Valuable both for early use and for its Winter keeping qualities. Of very quick growth, thick stalks, very tender and brittle, and rich flavor. 115 days. Pkt., 10c; ½-oz., 25c; oz., 45c; ¼-lb., \$1.25; lb., \$4.50.

Winter Queen-Unsurpassed for Winter Use-Probably the most desirable Winter keeping Celery. It is short, stout, thick and heavy with double the amount of heart of any other Celery. The flavor is sweet, nutty and delicious. It bunches up handsomely. The leaves are light green, and blanch to a cream white. Matures in 140 days. Pkt., 5c; $\frac{1}{2}$ -oz., 20c; oz., 35c; $\frac{1}{4}$ -lb., 90c; lb., \$2.50.

Celery Seed—For Flavoring—Excellent to use for flavoring soups, pickles, etc. ¼-lb., 20c; lb., 60c.

GARDEN EXERCISE PAYS BEST

Have a garden. Get out in the open and dig. It will bring you good health and will keep you fit. You will get wholesome exercise. Your brain will clear for business, your appetite will improve, you will sleep nights.

Mother Earth is the best tonic, and the best paymaster. A good garden will make a big difference in your grocery bill—maybe save a doctor's White Plume — Is a truly beautiful type. Not only does the stem whiten, but the leaf itself assumes the attractive white color. This makes the White Plume one of the most showy that can be put upon the Thanksgiving or Christmas dinner table. As to succulence, crisp-ness and quality, the White Plume is all that can be desired. Fit to eat in 110 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ½-lb., \$1.00; lb., \$3.

Succeed with Celery you must keep your plants growing constantly while young; if you allow

them to stand still Celery—White Plume they will run up to seed later. Always cultivate as soon after watering as the ground is dry enough to work well. Fertilize heavily in the Spring—and use nitrate of soda later if needed.

Celeriac

TURNIP ROOTED CELERY

Ger.-Knoller Sellerie. Scand.—Knopselleri.

Giant Prague—This vegetable is used for two purposes: the leaves are cut when young and used to flavor soups and meats; the roots are boiled, sliced, cooled, and served as a salad. 125 days. Pkt., 5c; oz., 25c; ¼-lb., 80c; lb., \$2.50.

Chervil

Chervil-(Curled)-An aromatic herb. The young leaves are used in soups and salads. Pkt., 5c; oz., 40c; ¼-lb., \$1.25.

Chives or Schnittlauch (See also Vegetable Plants)

Chives-A vegetable of the onion tribe, quite hardy everywhere. The leaves are slender and appear very early in the Spring, and may be shorn sev-eral times during the season. They are propa-gated by divisions of the root or for flavoring The Chives are equal to the onion for flavoring soups and salads. Pkt., 10c; ½-oz., 40c; oz., 75c; ½-lb., \$2.00.

Corn Salad

Ger.—Feldsalat.

Scand .- Vaarsalat.

(Two ounces to 100 feet of drill)

Corn Salad-(Or Fetticus)-A salad plant used as a substitute for Lettuce in salads or may be cooked like Spinach for greens. It does well in the Fall and Spring. On rich soil the leaves renew rapidly after being cut. 55 days. Pkt., 5c; oz., 25c; ¼-lb., 50c; lb., \$1.50.

Corn Salad

Cress

Ger.—Garten-Kresse.

Scand.—Karse.

Cress, or Pepper Grass-This salad is much used with Lettuce to the flavor of which its warm pungent taste makes an agreeable addition. 30 days. Pkt., 5c; ½-oz., 10c; oz., 15c; ¼-lb., 35c;

Cress—(Water)—Hardy perennial aquatic plant; sow seed along water's edge, preferably near running springs. 45 days. Pkt., 10c; ½-oz., 25c; running springs. 45 oz., 40c; ¼-lb., \$1.20.

StimUplanT Makes a Wonder Garden

CORN, Sweet or Sugar

StimUplanT Makes a Wonder Garden

THE SIX BEST VARIETIES OF SWEET CORN FOR MONTANA AND THE NORTHWEST

1 pound for 100 hills or 150 to 200 feet of drill; 15 pounds to acre; 1 pound is a little more than a pint; 2 pounds a little more than a quart.

Sweet Corn is very sensitive to frost and should not be planted until danger from freezing is past or about the middle of May in Montana. A rich, warm, good ordinary soil will raise excellent Sweet Corn, if it is deeply and thoroughly worked before planting. If planted in rows, make the rows three feet apart and 12 to 16 inches apart in the row; cover one inch deep with fine soil firmly pressed down. If planted in hills, make the hills three feet apart each way, and plant four to six kernels to the hill. Hoe frequently and when six inches high cut off all the suckers so as to leave three or four plants to the hill; do not let the plants overcrowd. Give frequent and thorough but shallow cultivation until the tassels appear. In cooking corn use boiling water; do not cover the vessel and do not cook more than ten minutes. "Use no salt"—a pinch of sugar will add to the natural sweetness.

NOTICE—If ordered alone add for mailing, 8c per $\frac{1}{2}$ -pound, 10c per pound, and 15c per 2 pounds.

S. N. & S. Co's. Golden Glory

EXTRA EARLY VARIETIES

S. N. & S. Co's. Golden Glory, Earliest and Hardiest Sweet Corn in the World

Golden Glory—A Montana grown Sweet Corn of high merit; growth about 5½ feet, producing 2 or 3 ears to the stalk, and considerably larger than the average Golden Bantam. The illustration is a good average specimen of 12-row, 8-inch ear. Sweet, creamy and tender, remaining in roasting ear stage a long time. With these qualifications this wonderful Corn can be grown to maturity wherever Golden Bantam can; we predict that it will be your first choice this season. In addition to its merits as a table Sweet Corn this variety is destined to be a popular variety on account of its extreme earliness, which is ten days to two weeks earlier than the Golden Bantam. Price: Pkt., 10c; ½-lb., 30c; lb., 50c; 2 lbs., 90c; 5 lbs., \$2.00.

Early Golden Sunshine—An outstanding new variety of yellow Sweet Corn, of exceptional merit. The ears are bigger than those of Golden Bantam, are 16 rowed, and of deliciously rich flavor; light yellow in color. Sunshine is ready for use 6 to 10 days earlier than Bantam. The stalks are quite dwarf; usually 2 ears to the stalk. Those who tried it last year are highly enthusiastic, and say it is real Sweet Corn. Pkt., 10c; ½-1b., 20c; 1b., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

S. N. & S. Co's. Extra Early Market-Is the earliest and sweetest White Sweet Corn in cultivation. It is extremely hardy, withstanding cold, wet weather to a wonderful degree. Ears are large for so early a variety. Kernels pure white, sweet and tender. It is very productive, producing two to three ears to the stalk; we can highly recommend this variety for home use and as a market good it is a mercan productive. ket sort it is a money-maker, especially adapted for planting in the Northern states. Pkt., 10c; ½-lb., 20c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Pop Corn—Japanese Hulless—Also known as Tom Thumb, Australian Hulless. Japanese Hulless is a dwarf-growing variety, a heavy yielder, and is ready for popping soon after it is husked. It has no hull or shell or hard center, is most tender, and of a delicious flavor when popped. The best all-around variety. 140 days. Pkt., 5c; ½-1b., 20c; 1b., 30c; 2 lbs., 50c; 5 lbs., \$1.00.

EARLY VARIETIES

Peep O'Day-Five days earlier than the Golden Bantam, Peep O'Day Corn, in addition to its sensational earliness, is entirely distinct in appearance and habit of growth. The stalk grows from 3 to 4 feet in height. The ears average about 5 inches in length and are of perfect form, well filled out to the tip. When cooked, the Corn is exceedingly sweet and tender. 65 days. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

NOTICE-On Sweet Corn in lots of 10 lbs. or more of one variety deduct 5c per lb. when ordering by express or freight. NOT PREPAID.

2 7

Golden Bantam—The well known variety. Some of our customers are now planting this Corn at regular intervals during the season, so that they may have it for table use continually and prefer it to all other contracts. it to all other sorts. Ears medium size, thickly set with delicious yellow kernels. Golden Bantam has a flavor distinct from any other sort. A very early variety. 70 days. Pkt., 5c; $\frac{1}{2}$ -lb., 25c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Black Mexican—When cooked becomes white, with bluish tinge near kernel base. Often remembered only as the black Corn that was so very sweet. 75 days. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

· All and pure of the last

SPECIAL COLLECTIONS OF FLOWER AND VEGETABLE SEED

For your convenience in ordering vegetable seed we have made up collections suitable for different size gardens. These collections are put up in the dull season from our choicest seeds, and the collections cannot be changed. By taking advantage of the different collections you will make a handsome saving. See Page 74.

We know that State Nursery and Seed Co's. Peerless Seeds grow, as every lot is carefully tested by us in our greenhouses and trial grounds for vitality and vigor before they are sent to our customers.

Cucumbers

Scand.—Haurk. Ger.—Gurken. (One oz. will plant 50 hills; 2 lbs. to an acre)

Earliest of the White Spine varieties. Excellent for table use. 60 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.25.

Earliest of All—An extra early prolific Cucumber; the fruit full and uniform, tapering slightly at both ends. Color, deep green; 10 days Color, earlier than Early White Spine, and because of its extreme earliness is a riety both for the home garden and for the market. 50 days. Pkt., 10c; oz., 20c; ¼-lb., 50c; lb., \$1.50. very desirable va-

Japanese Climbing— A strong and vigorous grower, this variety attains nearly twice the length of the ordinary sorts and can be grown on trellises, fences or poles. The fruits, from ten to twelve inches in length, are

Cucumber-Early Fortune

of excellent quality either for slicing or pickling. 65 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.50.

Early Fortune-This distinct variety is the finest yet introduced. The rich dark green fruits average 71/2 to 8 inches and retain their color for a long time. The flesh is firm, with a small seed cavity, making it a good shipping and market sort. As a pickling sort it produces an enormous quantity of uniform well-shaped pickles. The vine growth is very vigorous and the leaves, which are larger than those of other sorts, are very resistant to disease. 52 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.25.

Davis Perfect-Long and slender, average length 10 to 12 inches. Color very dark green, of fine flavor, very tender and brittle. A choice variety for forcing under glass or for outside culture. 60 days. Pkt., 5c; oz., 25c; 4-lb., 60c; lb., \$1.50.

Improved Long Green-Not quite so early as the above named sorts, but admitted to be the best general crop Cucumber for this climate; good color, crisp and tender. 70 days. Pkt., 5c; oz., 20c; ½-lb., 50c; lb., \$1.25.

Lemon Cucumber — Very productive, with round fruits of creamy yellow color; of distinctive flavor; desirable for slicing or pickling. For pickling they may be used either green or ripe. 55 days. Pkt., 10c; oz., 25c; ¼-lb., 80c; lb., \$2.50.

Rollinson's Telegraph or English Frame—For forcing. Long green Cucumber of excellent flavor, very tender and solid. We have grown this variety under glass to a length of 20 to 25 inches. Pkt. (10 seeds), 25c; 5 pkts., \$1.00.

Pickling Varieties

Everbearing — Small size, very early and enormously productive and valuable as a green pickler. It continues to flower and produce fruit whether the Cucumbers are picked off or not. Remarkably solid with very few seeds and of fine quality. 65 days. Pkt., 5c; oz., 25c; ¼-lb., 60c; lb., \$1.50.

Early Russian — Bright green, crisp and tender flesh; excellent for table use or pickling. 55 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.25.

Cucumber-Extra Early Green Prolific or Boston Pickling

Extra Early Green Prolific or Boston Pickling-A very prolific variety used principally for pickles. Fruit medium sized, bright green, flesh firm and very crisp and tender. Gather the fruit when small and it will bear all Summer. 65 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.25.

Egg Plant

 $(\frac{1}{8}$ -oz. to 100 feet of row; ¼-lb. to acre)

(One oz. will produce 1,000 to 1,500 plants)

Improved New York-This selection is vastly superior to the old type. The habit of the plant is low and branching, and is quite free from spines. days. Pkt., 10c; oz., 30c; oz., 50c; lb., \$1.75.

Egg Plant—Improved New York

Endive

Ger.—Endiven.

Scand.—Endive.

(1 oz. to 100 feet of row; 4 Tbs. to acre)

White Curled-Leaves pale green; should be used when young. 35 days. Pkt., 5c; oz., 25c; $\frac{1}{4}$ -lb., 45c; lb., \$1.25.

Endive-Green Curled

Green Curled—For Fall and largely used for Winter use; also garnishing; crisp and curly; easily blanched. 40 days. Pkt., 5c; oz., 20c; 4-lb., 45c; lb., \$1.25.

Broad Leaved Batavian or Escarolle—A very wide leaved variety. Leaves with straight edges, thick and fleshy, of a dull green color. Quality excellent. 45 days. Pkt., 5c; oz., 20c; ¼-lb., 45c; lb., \$1.25.

GOURDS—(See Page 87) GROUND CHERRY—(See Tomato, Page 100)

Garlic

Scand.-Hoidloeg. Ger.-Knoblauch. (1 lb. to 50 feet of drill; 200 lbs. to acre)

Garlic - The Garlic is the most pungent of all the Onion family. Plant in the Spring six to eight inches apart, and in August the tops will die when the bulbs are ready to gather; they do best in light rich soil; cultivate the same as Onions. Lb., 35c; 5 lbs., \$1.60.

Write for price on larger quantities.

Garlie

Gourd

Both Useful and Ornamental

A tribe of climbers with curiously shaped and colored fruit; being of rapid growth, they are fine to cover old fences, trellises, stumps, etc. Tender annual; ten to twenty feet high.

Hercules Club-Distinctly club-shaped, the longest of all varieties. Pkt., 10c; oz., 25c.

Japanese Nest Egg-Used as nest eggs; fruits are white; do not crack, and are not injured by heat or cold. Pkt., 10c; oz., 25c.

Sugar Trough-Has durable thick shell, and is often used for dishes and other household utensils. Pkt., 10c; oz., 25c.

Dipper or Siphon—Greatly used for dippers; fruits long and bottle shaped, with straight or slightly crooked neck. Pkt., 10c; oz., 25c.

Gourds—Mixed—Pkt., 5c; oz., 25c.

Kohl Rabi-White Vienna

Kohl Rabi

Ger.-Kohl Rabi. Scand.—Kaarlrabi.

 $(\frac{1}{4} - oz. \text{ to } 100 \text{ feet of row}; 4 \text{ lbs. to acre})$

White Vienna-Turnip rooted; small, white, very tender and delicious when young. 50 days. Pkt., 5c; oz., 25c; ¼-lb., 75c; lb., \$2.25.

Purple Vienna—An early variety with a bright purple bulb, the leaves and stems being green and tinged with purple. 70 days. Pkt., 5c; oz., 25c; ¼-lb., 75c; lb.. \$2.25.

Leek-American Flag

Leek

Scand.—Purre. Ger.—Lauch. $(\frac{1}{2}$ -oz. to 100 feet of drill; 4 lbs. to acre)

American Flag—A strong growing variety, producing large, thick stems of sweet flavor when properly blanched. Leeks are hardy and flavor is improved by frost. 80 days. Pkt., 5c; oz., 30c; ¼-lb., 90c; lb., \$2.50.

Kale or Borecole

Ger.—Blatter Kohl.

Scand.—Groenkaal.

 $(\frac{1}{4}$ -oz. to 100 feet of row; 2 lbs. to the acre)

Dwarf Curled Scotch—Kale makes excellent greens for Fall and are improved when slightly frosted. Cultivate same as Cabbage. Beautifully curled, very hardy. 55 days. Pkt., 5c; oz., 20c; ¼-lb., 45c; lb., \$1.25.

Tall Green Curled Scotch—Always a favorite. 60 days. Pkt., 5c; oz., 20c; ¼-lb., 45c; lb., \$1.25.

Herbs

Herbs-(Sweet, Pot and Medicinal) - The seeds should be sown in Spring in shallow drills, 12 inches apart, and the young plants thinned out or transplanted to about 4 inches. They should be harvested on a dry day, just before the blossoms develop, dried quickly and bottled, or closely packed in dry boxes, with the air entirely excluded. Those prefixed by an * are parennials. perennials.

Lettuce

Ger.—Gartensalat.

Scand.—Salat.

($\frac{1}{4}$ -oz. to 100 feet of drill; 3 lbs. to the acre)

Loose Leaf seed, sown in rich soil in cold frame in March, can be cut (just above the center bud) in 45 to 60 days and will grow new leaves or can be moved to the open ground later at 8 to 12 inches in the row.

Varieties which head should be started early and pricked out in the frame to get room and root system. As soon as the ground is mellow, set in open and encourage rapid growth by liberal feeding (nitrate of soda) and cultivation. Sow common sorts for a succession.
All varieties of Lettuce are also excellent for

sowing in the home garden. Sow out of doors early in the Spring or in late Summer. Lettuce develops best during cool weather.

May King—It grows very quickly even in the cold weather of early Spring. Very compact; in fact, the plant is about all head. Outer leaves light green, inner leaves bright yellow and of a fine, rich, buttery flavor. Heads weigh from 12 to 16 oz. and are so solid that they carry to market in perfect condition. 50 days. Pkt., 10c; oz., 25c; 4-lb., 50c; lb., \$1.35.

Improved Hanson—A well known, highly approved Lettuce. Large, well formed, firm head of broad leaves so compact that the inner ones are blanched almost white. The outside ones are very tender and deliciously sweet, and all are beautifully crinkled and curled. For mid-Summer planting outdoors, this sort is exceedingly popular, for it has superior qualities for resisting drought and heat. 50 days. Pkt., 5c; oz., 20c; 4-lb., 40c; lb., \$1.25.

LETTUCE

Ger.—Gartensalat.

Heading Varieties

Lettuce-Creamy Heart

Creamy Heart-Is a new variety very similar to the California Cream Butter and was selected on account of its being without brown spots or edges; nice large heads of a rich golden yellow inside and leaves are very bright green; an excellent variety for late Spring and early Summer crop; easy to grow and a good shipping variety. Pkt., 10c; oz., 25c; ¼-lb., 75c; lb., \$2.00.

New York Head-Also Called "Los Angeles" and "Wonderful" — A popular variety for Summer planting. The best heat resister. The immense heads are solid and frequently weigh 2 to 3 lbs. each. Beautifully blanched to a creamy white with dark green outer leaves; quality unsurpassed, being tender, crisp and sweet. New York is a hardy, rapid grower, deep rooted and resistant to drought; a slow seeder and sure to head. Mautres in 65 days. Does remarkably well in all sections. Pkt., 10c; oz., 25c; ¼-lb., 75c; lb., \$2.00.

Salamander or Black Seeded Tennisball—The most popular variety for withstanding the hot weather. The golden yellow heart is protected by crumpled outer leaves of medium green color and forming a close sure head; very solid, of medium size and excellent quality. 85 days. Pkt., 5c; oz., 20c; 4-lb., 50c; lb., \$1.25.

Big Boston—The well known and popular hothouse variety needs to be quickly grown to be of good flavor. Light green Cabbage variety, slightly tinged with brown on the head. Forms a compact buttery head. 50 days. Pkt., 5c; oz., 25c; ¼-lb., 65c; lb., \$1.75.

California Cream Butter or Royal Cabbage—Produces a large solid head and withstands most adverse weather. The leaves are thick, dark green tinged with brown and spotted. The interior of head is rich golden yellow and quality very fine. Pkt., 5c; oz., 20c; 4-lb., 50c; lb., \$1.25.

Iceberg—Is very crisp and withstands the heat remarkably well and very slow to shoot to seed. The head is extremely hard and well blanched, the leaves tightly overlapping each other. The color is light green, excepting for the faint brown tinge along the extreme border. The quality is good, crisp and firm, very sweet. 75 days. Pkt., 10c; oz., 25c; ¼-lb., 60c; lb., \$1.50.

Paris White Cos-Trianon, or White Paris Self-Blanching—Distinct variety of upright growth; leaves should be tied together near top when they will blanch to a beautiful creamy-white; crisp and delicious as celery stalks, and eaten in the same manner. 65 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.35.

Scand.—Salat. Loose Leaved Varieties

1000

Lettuce—Grand Rapids

Early Curled Simpson or Silesia—(White Seeded)—A very extensively used early loose leaved variety. The leaves are light green in color, slightly frilled, crisp, sweet and tender. This sort is especially adapted for sowing thickly and cutting when the plants are young. Does not wilt easily. 40 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.25.

Early Prize Head—This Lettuce forms a large, tender, crisp, loose head of bright green crimped leaves tinged with brownish red; of superior flavor, long remaining sweet and slow to run to seed. 50 days. Pkt., 5c; oz., 20c; 4-lb., 50c;

Grand Rapids — A popular variety for general planting and will make a quick growth under adverse conditions. Its upright habit permits close planting. 40 days. Pkt., 5c; oz., 20c; 14-lb., 50c; lb., \$1.25.

Semesan

Place a little Semesan with seeds in a jar and shake vigorously; bacteria and fungus adhering to the seeds will be killed.

MUSKMELONS

Ger.-Melone.

(One ounce will plant about 50 hills—2 to 3 lbs. in hills per acre)

Scand.—Melon.

Culture—A rich, deep, sandy loam, well worked and highly manured with old rotten compost, is of the first importance. Plant when all danger of frost is over, in hills 5 to 6 feet apart each way; scatter a dozen seeds to a hill and thin to 3 or 4 plants. When they have 4 or 5 rough leaves pinch off the end of the main shoot, which will cause the lateral branches to put forth fruit sooner.

Green Fleshed Varieties

Extra Early Hackensack - Fruit round, heavily ribbed, skin is light green; of delicious flavor, rich and sugary, and exceedingly productive. The earliest of all large netted Melons. 70 days. Pkt., 5c; oz., 25c; ¼-lb., 45c; lb., \$1.25.

Rockyford or Netted Gem—The flesh is green and so sweet that it may be eaten close to the rind. The Melons weigh about 11/2 pounds each. The vigorous vines produce an abundance of slightly oval fruits. 80 days. Pkt., 5c; oz., 25c; ¼-lb., 50c; lb., \$1.25.

Early Nutmeg or Extra Early Citron — A small round or slightly flattened Melon, valuable on account of its extreme earliness, hardiness and productiveness. The skin is green, becoming yellowish at maturity. The flesh is light green, very thick and of delicious flavor. 65 days. Pkt., 5c; oz., 25c; ¼-lb., 50c; lb., \$1.35.

Honey Dew—The sweetest Melon of all. The skin is smooth and the rind though thin is very tough, of creamy yellow color when ripe. The flesh is very thick, of a bright emerald green, very fine grained, of very sweet, sugary flavor, and can be eaten to the rind. 125 days. Pkt., 10c; oz., 25c; ¼-lb., 60c; lb., \$1.50.

Salmon Tinted Varieties'

Edward's Perfecto—Fruit nearly round with gray netting; flesh very thick salmon color, shading into green as it nears the rind. Perfecto has the deepest flesh and more salmon-colored flesh than any other Melon. Recommended for its hardiness, prolificness, deep flesh and excellent eating qualities. Pkt., 10c; oz., 25c; ¼-lb., 50c; lb., \$1.25.

Gold Lined Rockyford—This variety is one of the largest of the Rockyford type. It is very prolific, of uniform size, very thick flesh, of a rich golden yellow next to the seed cavity, fruit very thickly netted. Very fine in every respect. 70 days. Pkt., 5c; oz., 25c; ¼-lb., 50c; lb., \$1.25.

MUSKMELON COLLECTION This Collection contains one packet each Hale's Best, Barling's Montana, Edward's Perfecto Rockyford Value 35c, postpaid for 25c

Orange or Yellow Fleshed Varieties

Emerald Gem—Is one of the earliest to ripen and of most delicious flavor. Unequalled for home use. Very pro-The skin is lific. smooth and free from The fruits netting. are heavily ribbed. Flesh very thick; small seed cavity. 85 days. Pkt., 5c; oz., 25c; ¼-lb., 50c; lb., **\$**1.25.

Hale's Best (The Earliest Maturing of All Muskmelons)

Salmon Fleshed Varieties

Hale's Best, Extra Early—This new variety has become popular because of its extreme earliness. 68 days, tests made in sections where the season was remarkable for its coldness. It is a salmon flesh Melon of exceptional thickness. The shape is oval. Average size is $8x4\frac{1}{2}$ inches with very heavy netting and fairly prominent ribs; very valuable, as it leads the list in earliness. Pkt., 10c; oz., 25c; ¼-lb., 60c; lb., \$1.50.

Barling's Montana-Ideal in size for family use, oval shape, flesh salmon-pink, thick fleshed, with small seed cavity; originated in Montana and matures with the earliest. Pkt., 10c; oz., 25c; ¼-lb., 75c; lb., \$2.00.

Osage or Miller's Cream-A favorite salmon flesh variety. Large, oval, slightly ribbed and netted; skin is very dark green. Flesh is very thick and sweet, flavored most deliciously to the rind. The fruit is extra heavy. A great favorite for market and the home garden. 80 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.25.

Of all Vegeatble Fruits, the Melons are the most delicious. Be sure to plant some Melons in your

WATERMELONS

(One oz. for 30 hills-4 to 5 lbs. to an acre)

Scand.—Vandmelon.

Ger.-Wassermelone. The hills should be dug about 2 feet square, 8 inches deep and half filled with well-rotted fertilizer, which must be thoroughly mixed with the soil. Plant in May, 10 seeds to a hill, and when the plants are well up, thin out to three, and pinch the ends of the growing shoots to induce early fruiting. Some of the sweetest and best Melons we have seen were produced in the latitude of 45 degrees north; consequently, while the Watermelon is a tropical fruit, yet our Northern friends can grow them successfully.

Cole's Early—This is a fine variety for the family and market and is particularly adapted, on account of its earliness to Northern latitudes. For early marketing there is no superior. The bright red flesh is cool, crisp and produced in generous numbers. 80 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1b., \$1.00.

Fordhook Early—One of the earliest large-fruited Melons in cultivation. Fruits are of good size. Skin dark green, with faint stripes of lighter green. Rind quite thin, but skin tough, making an excellent shipping variety. Flesh bright red, crisp, sweet, and of splendid quality; really one of the finest flavored Melons in cultivation; white seed. 80 days. Pkt., 5c; oz., 15c; 4-lb., 35c; lb., \$1.00.

Kleckley Sweet or Monte Cristo—This is a very popular Watermelon. Dark green skin, thin ring; flesh bright scarlet; solid, very sweet and crist; not a good shipper for long distance. The fruits are oblong and uniform in size. Average weight, 25 lbs. 100 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

Stone Mountain-This Melon is comparatively new, medium dark green, round and of excellent quality. The flesh is a uniform beautiful deep crimson, very solid with fewer seeds than most Watermelons. The rind is tough enough to stand long-distance shipping. We have found this somewhat earlier than other large varieties. It produces an abundant crop. Pkt., 10c; oz., 25c; ¼-lb., 50c; lb., \$1.25.

Harris Earliest

Harris Earliest-Owing to its exearliness treme it is extensively grown in the orther where it is a favorite. We have known this Melon to mature as far north as Canada. It is the earliest Waterearliest Water-melon on the market and the sweetest. These are sweeping statements, but they are true.

Harris' will out-yield any other early Melon. 70 days. Pkt., 5c; oz., 25c; ¼-lb., 45c; lb., \$1.25.

Phinney's Early—One of the best early maturing Melons of medium size, oblong shape. The red flesh is very sweet and tender; a sure cropper. Does exceptionally well in the Northern states. 80 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

Citron FOR PRESERVES

Citron—Red Seeded—A small round Melon used for making preserves. 100 days. Pkt., 5c; oz., 20c; 1/4-lb., 40c; lb., \$1.00.

Citron—Green Seeded—Same as above with green seeds. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.00.

S. N. & S. Co's. Peerless Onion Seed

(One ounce for 100 feet of drill; 4 to 5 lbs. in drills per acre)

Sow in rich soil in drills one foot apart as early as possible in the Spring. Cover with fine soil and firm well. When plants are strong enough thin out to 3 or 4 inches. The largest Onions are produced by sowing the seed in a hot bed early in January or February and transplanting seedlings to the open ground 6 inches apart. When the bulbs have reached maturity bend the top down to hasten the ripening before the Onions are harvested.

Onion-Mountain Red Globe

White Varieties

Southport White Globe—A beautiful type of an almost round Onion, growing to an enormous size. The flesh when cooked is of a rich milky color, of tender and delicious flavor and in the raw state it is one of the mildest. 120 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 75c; lb., \$2.50.

White Portugal, or Silver Skin—The bulbs are flat in shape, pure white and mature within 110 days. It is a splendid variety for both family and market gardener, and is very largely used on account of its fine shape when small, and also for its good keeping qualities. This variety is grown extensively for use in the green state as a bunching Onion besides being well adapted for pickling. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 65c; lb., \$2.25.

White Pickling—For early bunching, pickling, etc. Small, hard, round; keeps well; does not turn green when exposed to sun. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 65c; lb., \$2.25.

Mammoth Silver King—The largest of the foreign varieties. Produces large bulbs within 125 days from seeds. Flat in shape and both skin and flesh are pure white, mild and well flavored. Pkt., 10c; ½-oz., 15c; oz., 25c; ¼-lb., 80c; lb., \$2.50.

Red Varieties

Red Wethersfield—A very large, deep red Onion, that matures early and succeeds well everywhere. The bulbs are flattened, very large around, solid and of fine quality. A good keeper. One of the best red Onions for home use or market, where a globe-shaped Onion is not required. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 60c; lb., \$1.75.

Mountain Red Globe—Grown at a very high altitude, where the seasons are short and where an ordinary strain of Southport Red Globe will not mature, and where an Onion has to hustle if it matures and makes a good sized bulb. It has a good globe shape, is dark red, ripens evenly, has a small neck, keeps well and ships well. It is a good mate for Mountain Danvers, which means that it is a mighty fine Onion. Pkt., 10c; ½-oz., 15c; oz., 25c; ¼-lb., 65c; lb., \$2.00.

Extra Early Red Flat—An extra early red Onion, which yields abundantly, keeps well and is of mild flavor. The bulbs are of medium size and rich red in color, very close grained, solid and heavy. This variety will form bulbs in cold soils where others fail to ripen. 100 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 65c; lb., \$2.00.

Brown Skinned

Australian Brown—An early and very hardy variety. These Onions have been kept in perfect condition the year around. They are of medium size, somewhat flattened, and of a light reddish brown color. The flesh is always crisp, mild and juicy. They mature very early. Pkt., 5c; ½-oz., 15c: oz., 25c; ¼-lb., 65c; lb., \$2.00.

Yellow Varieties

Vellow Globe Danvers—This almost round-shaped Onion is extensively sown by the private and market gardener on account of its good keeping qualities. It is a dark straw color and always produces a good crop, growing to a large size. 120 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 75c; lb., \$2.50.

Mountain Danvers (Yellow)—A very early maturing strain originating in the mountains of Colorado. The Onions are of fine globe shape, deep yellow color and very firm. They ripen two or three weeks earlier than Yellow Globe Danvers, and are valuable on this account where the seasons are short. These Onions have remarkable keeping qualities and can be safely stored all Winter. They are of good size and are often found more profitable because they can be marketed before other kinds are ready. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00; lb., \$3.00.

Prizetaker or Mammoth Yellow Spanish — Large yellow globe Onion. Excellent keeper of finest flavor, handsome shape and enormous size; many single Onions weigh 3 pounds and over. It is of the same type as those immense imported Onions which can be seen in stores and always command a very high price. 130 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ½-lb., 80c; lb., \$2.50.

Ailsa Craig — The largest of all Onions, often weighing 4 lbs. and over, each. Globe-shaped, slightly pointed at top and base; color a beautiful straw yellow. To obtain best results sow seed in hot bed and later transplant where they are to grow; in planting place 4 to 6 inches apart and thus procure gigantic specimens. Pkt., 10c; ½-oz., 25c; oz., 35c; ¼-lb., \$1.00; lb., \$3.00.

Onion-Mountain Danvers

CARCO—Will protect your Onion crop against the ravages of the root maggot and other garden pests. See Index for Insecticides.

Mustard

(4-oz. to 100 feet of row; 2 to 3 lbs. to the acre) White—The green leaves are used as a salad when a few inches high. If sown in a warm place or in a hot bed, will be ready to cut in a few days; sow frequently for a succession of crops. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 85c.

Giant Southern Curled — Large variety, forming great mass of beautiful leaves, ruffled and finely curled on edges; used for salads. Hardy, vigorous, and highly recommended. 35 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 85c.

Mushroom Spawn

Practically no capital is required in the mushroom business, and the profits are most satisfactory. All that is required to grow mushrooms is almost any building or cellar, some manure, loam, and last and above all, good spawn. Our Pure Culture Mushroom Spawn is full of vigor, the kind used by the best commercial growers of the United

States. One brick to ten square feet. Leaflet—"How to Grow Mushrooms"—free for asking.

Lambert's Mushroom Spawn — Per brick, 40c; 5 bricks, \$1.75, postpaid. By express or freight, per brick, 35c; 10 bricks, \$3.00; 25 bricks, \$6.75.

Okra or Gumbo

(One oz. to 100 feet of drill; 8 lbs. to the acre)

The long tender pods of Okra are very delicious when sliced and cooked in soups. While this is the chief use, it is also boiled and served like other vegetables. The dwarf sorts may be planted in hills or in rows about three feet apart. Plant in any good soil about May 15. The pods should be gathered when very young, as they are then very tender.

Dwarf Green—An early dwarf prolific variety with thick green pods. 65 days. Pkt., 5c; oz., 15c; 1/4 - 1b., 35c; 1b., \$1.00.

White Velvet—Very tender pods, long, smooth and white. 60 days. Pkt., 5c; oz., 15c; 1/4-lb., 35c; lb., \$1.00.

Parsley

Scand.—Persilie. Ger.—Petersillie. (One ounce for 150 feet of drill)

Parsley-Moss Curled

Parsley succeeds best in rich, mellow soil. As the seed germinates very slowly, it should be sown quite early in the Spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart and half an inch deep. For Winter use, protect in a frame or light cellar or a few plants may be placed in pots or boxes and kept in the house.

Moss Curled—There is no more attractive variety than this when well grown; it is hardy and slow to run to seed; every gardener's favorite. days. Pkt., 5c; oz., 20c; 4-lb., 40c; lb., \$1.00.

Extra Double Curled—In shape of leaf, color and taste this new variety is perfect. It stands heat, drought and cold better and will yield better than any other of the numerous varieties of Parsley we have ever had. 60 days. Pkt., 5c; oz., 20c; ¼-lb., 40c; lb., \$1.00. Parsley

Hamburg or Turnip Rooted-Turnip rooted variety. The roots as well as the leaves are used for flavoring soups, etc. The roots are stored like carrots for Winter use. 100 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; lb., \$1.25.

Onion Sets

(One lb. to 75 feet of row; 300 lbs. to the acre)

It is very easy to raise Onions from sets and they should be grown in every garden. If the sets are set out early in the Spring, nice green Onions can be pulled in a few weeks. A little later the bulbs grow large and are then ready to use cooked. They are of very delicate flavor. The Onions mature about the middle of August in this latitude. They are then large, ripe Onions which can be kept through the Winter if desired. The sets should be planted about 2 inches apart and covered an inch deep. A pound equals about one quart.

Parsnip

Ger.—Pastinake.

Scand.—Pastinak.

(One ounce for 200 feet of drill; 5 to 6 lbs. in drills per acre)

Sow as early in the Spring as the weather will permit, in drills 15 inches apart, covering half an inch deep. It is usual to take up in the Fall a certain quantity for Winter use, leaving the rest in the ground till Spring to be dug up as required.

Parsnip-Hollow Crown or Guernsey

Hollow Crown or Guernsey—An excellent variety for the table. The roots are long with white skin, uniform in shape, tender and of the best quality. This variety is easily distinguished by leaves growing from the depression on top of crown or root. 85 days. Pkt., 5c; oz., 20c; ¼lb., 40c; lb., 95c.

Long White or White Dutch Sugar—This variety of Parsnip is very hardy and will keep well through the Winter without protection. The roots are long, white, smooth, tender and of most excellent flavor. 100 days. Pkt., 5c; oz., 20c; $\frac{1}{4}$ -lb., 40c; lb., 95c.

Forcing Growth-Nitrate of Soda is a very strong stimulant for young growing plants. Vegetables grown for their leaves and stems, like lettuce, cabbage, celery, etc., can be improved by a light application or two of Nitrate of Soda in the early growing period. Nitrate of Soda is readily soluble. Use one ounce to three gallons or one pound to fifty gallons of water. Apply this in small amounts some little distance from the plant. Repeat in from 20 to 30 days. See Index.

PEAS

Scand.—Dan-Nor.

StimUplanT

Makes a

Wonder Garden

(1 lb. to 100 feet of drill-80 to 100 lbs. to the acre)

NOTICE—If ordered alone add for mailing, 8c per 1/2-pound, 10c per pound, and 15c per 2 pounds

Peas are quite hardy, and for early crop sow as soon as the ground can be worked. Then sow in succession every two weeks until the first of August. They require moderately rich soil but not excessively rich or wet, or they will run too much to vine and will not bear heavily. The varieties can be planted in rows 12 to 18 inches apart, and the tall varieties 3 feet apart. The tall varieties should be staked by brush or tied up. By using the various classes of Peas and making several sowings of each, good Peas can be had for a long season. The pods should be kept picked; the plants will then continue to bear longer. For late sowing, use Early Dwarf varieties.

Extra Early Round Seeded Varieties

Alaska or Earliest of All

Alaska or Earliest of All—The earliest Pea on the market, height 2½ feet. It produces a large crop of well filled medium size pods completely filled with small round Peas. 45 days. Pkt.. 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

Extra Early Dwarf, Wrinkled Varieties

Peas-Little Marvel

Little Marvel—A productive, wrinkled, seeded variety, growing about 18 inches tall; pods average 2½ inches in length. They are well filled with 6 or 7 large Peas of exceptionally fine quality. 60 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

Extra Early Dwarf Wrinkled Varieties

Peas-Laxton's Progress

Laxton's Progress—A new Pea and one of the best of the large podded, early, wrinkled sorts. Planted same time as Laxtonian, it is ready to pick a week earlier. The pods are 4 inches long and are filled with 7 or 8 large Peas of fine quality; height 18 inches. 60 days. Pkt., 5c; ½-lb., 25c; 1 lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75.

Little Gem—An early dwarf variety, height 12 to 15 inches. The pods measure 2½ to 3 inches long and are well filled with large Peas of a delicious flavor. 60 days. Pkt., 5c; ½-lb., 20c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

American Wonder—A fine, extra early wrinkled variety, well suited for the private garden and quite productive. The flavor and quality are excellent and its dwarf habit makes it a desirable sort; height 12 inches. 55 days. Pkt., 5c; ½-lb., 20c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

Carter's Daisy or Early Dwarf Telephone — The vines grow about 18 inches in height. They are strong and always bear a good crop. The pods measure from 4 to 5 inches and contain 7 to 8 large light green Peas, a favorite garden and market variety. 65 days. Pkt., 5c; ½-lb., 20c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

On Peas in lots of 10 lbs. or more of one variety, deduct 5c per lb. when ordered by express or freight. Not prepaid.

Acme Bait-M prevents and repels cut worms, snails, slugs, grasshoppers and other insects. (See Insecticides.)

Laxtonian

Early Wrinkled Varieties

Gradus or Prosperity—Extra early wrinkled Pea. This remarkable Pea is not only large and of the best quality, but is within two or three days as early as the small round extra early sorts. Gradus is a wrinkled Pea, growing about 30 inches high; the pods are of a bright green color measuring 4 inches with luscious Peas, 8 or 9 in a pod. The Peas are of the highest table quality. A grand Pea in all respects. 60 days. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

Laxtonian-The largest podded of the early dwarf wrinkled varieties. Has no superior for either quality or productiveness. Ready to use within a very few days of the very earliest types. Height about 18 inches. The pods, four inches or more long, slightly curved, contain eight to ten wrinkled luscious Peas of finest flavor. Almost double the size of any other early dwarf wrinkled Pea. Vines are vigorous, foliage dark green, which enables it to resist the extreme conditions to which Peas are subjected in many sections. tions of the United States. A good Pea for the market grower or the home garden. 65 days. Pkt., 5c; ½-lb., 25c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75.

Main Crop Varieties

Dwarf Champion—A desirable main crop sort for the market or home garden. The vines are of a medium height, about two and one-half feet; stout, vigorous and hardy, and are unusually productive. The pods are large, often four inches long, broad, quite straight, deep green in color, handsome and very well filled with large Peas which are tender and unsurpossed in quality. Pkt 50: 14-lb 200: lb 350: 2 lbs unsurpassed in quality. Pkt., 5c; 1/2-lb., 20c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

TIONS OF VEGETABLE AND FLOWER SEEDS ARE OFFERED ON PAGE 75

DESIRABLE COLLEC-

Telephone-Tall-Medium late. This fine Pea is vigorous growing, about four feet high, and producing an abundance of large pods and filled with immense Peas, which are tender, sweet, and of excellent flavor. It has sterling merit, which gardeners appreciate. 75 days. Pkt., 5c; ½-lb., 20c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

Roosevelt—This splendid Pea is of the same podded type as the Telephone but the pods are larger and the Peas sweeter. The Roosevelt Pea surpasses all other large-podded varieties in productiveness. In other words a pint of Roosevelt Pea pods will yield as many shelled as a quart of most other sorts. Quality is always to be preferred to quantity, but a Pea which will give better quality and larger quantity is the Pea to plant; that Pea is the Roosevelt. A very popular variety. Height, 3 feet. 65 days. Pkt., 5c; ½-lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.

Melting Sugar—(edible pods). We consider this the best of the ediblepodded sorts, in which the pods are used when half grown and are cooked in the same way as snap beans. The pods of Melting Sugar are very large, four to five and a half inches long, very tender and finely flavored. Very prolific, strong growing; about four or five feet high, with large, light-colored foliage. 85 days. Pkt., 10c; 1/2-lb., 25c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75.

Large White Marrowfat—The vines of this tall variety are about 4 feet high and of strong growth. The pods are large, about three inches long. Seed large, smooth, round and light creamy yellow. It is desirable for Summer use but is not as sweet and tender as most sorts, although undoubtedly one of the most productive. Grow this variety for your supply of dried Peas for Winter use. Pkt., 5c; ½-lb., 15c; lb., 25c; 2 lbs., 45c; 5 lbs., \$1.00.

PLANT A GARDEN—EAT MORE VEGETABLES

Vegetables are the natural source of vitamins. Vegetables contain more of this life force than any other food. Vegetable food is pure food. Vegetables are healthful. Grow more vegetables from our Peerless Tested Seeds. Eat more vegetables.

On Peas in lots of 10 lbs. or more of one variety, deduct 5c per lb. when ordered by express or freight not prepaid.

Peas-Roosevelt

Peppers

Ger.—Pfeffer. Scand.—Spankspebr. (One ounce will produce 1,000 to 1,200 plants)

Peppers are growing in popularity among cooking experts for seasoning pickles, sauces and various dishes. Plant seed ¼-inch deep in a hot bed, cold frame or box in the house, set in rows about 1¼ feet apart each way in the garden, about corn planting time. Hen fertilizer is excellent and will greatly increase the yield.

Large Bell

Flesh thick, hard and less pungent than most other varieties; excellent quality for use in salads or for stuffed Peppers. Sometimes three to four inches in length. 140 days. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25.

Harris' Earliest—The earliest Pepper in cultivation and therefore adapted for the North, as it matures before danger of

frost; of dwarf, compact growth; about 18 inches tall, bearing a wonderful crop of scarlet fruits of good marketable size; 3½ inches long and 2½ inches thick. The flesh is thick, sweet and always mild; matures in 125 days. Pkt., 10c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.50.

Cayenne Long Red—Pods are small, cone-shaped and red, hot and pungent; used for pickling. 130 days. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25.

Pimiento—The Mildest Flavored of All Peppers—
It is extensively grown for pimientoes, pickles and pulp, maturing in 135 days. Its productiveness makes it a desirable sort for market gardeners as it yields heavy crops. Its smooth, thick flesh and uniform shape make it an excellent shipper. Should be planted in every garden where a delicious sweet-flavored Pepper is wanted, both for salad and for stuffing. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25.

"Topepo"—The World's Newest Vegetable

The Topepo is of excellent flavor, combining the delicious qualities of the pepper and the tomato. Topepo is a cross between tomato and pepper.

Its gorgeous color of valid red, with dark green, make a very handsome table decoration. In flavor the Topepo resembles the Bell Pepper but it is sweeter, not so peppery and has the zest of the tomato flavor.

It is from four to five inches in diameter. In shape it resembles the Bell Pepper. The plants grow bushy. The foliage is a rich, deep green. Excellent for stuffing and baking, and its firm, thick walls do not break down when baked. It is also used for slicing in salads or dressings. It can be combined with any vegetable. Wonderful keeping quality. You will find the Topepo a fine addition to your home garden. Full directions on every package. Pkt., 25c; 5 pkts., \$1.00; ½-oz., \$1.50; ½-oz., \$2.50.

Pumpkins

Ger.—Melonen—Kaubis. Scand.—Graesker. (One ounce for 25 hills; 3 lbs. to the acre)

Culture—The common practice is to drop two or three seeds in every third or fourth hill in the corn field, but if cultivated on a large scale, the seed may be sown in hills 8 feet apart each way, four plants to each hill.

Pumpkin—Early Small Sugar or Pie

Early Small Sugar or Pie—For pies this cannot be excelled; fruits round and small, with deep yellow skin, plainly ribbed. Flesh sweet and fine grained. 70 days. Pkt., 5c; oz., 20c; ¼-lb., 40c; lb., \$1.00, postpaid.

Japanese Pie — A Large, Dark Green Crookneck Sort—The flesh is very thick, of a rich salmon color, fine grained, dry and sweet. Of medium size, early, very productive and a good keeper. Highly desirable for pies. Ripens in 70 days. Pkt., 5c; oz., 20c; ¼-lb., 45c; lb., \$1.25.

Large Cheese or Kentucky Field—A large, round, flattened Pumpkin with broad ribs; the skin is of rich cream color, flesh yellow, tender and of excellent quality. Extra fine quality for family and market use; fine for pies and rich food for stock. 90 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c.

"Jumbo" or "King of Mammoth"—Fruits grow to enormous size. Salmon-orange skin; very thick, bright yellow flesh, which is fine grained and of excellent quality for pies. 90 days. Pkt., 5c; oz., 20c; ¼-lb., 45c; lb., \$1.25.

Winter Queen or Winter Luxury — Medium size, nearly round; skin a beautiful deep orange-yellow, finely netted. Very productive, sweet, tender, and an excellent keeper. 80 days. Pkt., 5c; oz., 20c; 4-lb., 45c; lb., \$1.25.

Connecticut Field—The Best Yellow Field Sort—Also known as Big Tom. A large round or slightly oval shaped Pumpkin. Skin reddish orange color, with rich orange yellow flesh. Extensively grown for stock feeding, and generally planted with corn, producing enormous crops in 90 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; lb., 75c.

Pumpkiu—Connecticut Field

S. N. & S. Co's. Peerless Radishes

Radish

Scand.—Riddik. Ger.—Radies.

(1 oz. will sow 100 ft. of drill; 8 to 10 lbs. per acre)

Being a root crop, good brittle Radishes require light, well-worked soil, made very rich and mellow to insure quick growth. If permitted to grow slowly, they become tough and pithy. They are easy to grow and frequent planting will insure a constant supply for the table. Thin the very young plants somewhat. Summer varieties can be sown all Spring and well into Summer. Winter varieties, however, require some time to mature; plant in June to July.

Early Round Varieties

Early Scarlet Turnip, White Tipped—A splendid early Radish; very attractive appearance; its white tip and deep scarlet are always pleasing to the eye. Very tender and of good flavor. 25 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 90c.

Extra Early Saxa - The earliest of all Radishes and slow to run to seed. We recommend it for the first planting in the garden, and also for forcing in hot bed greenhouse. Round, bright scarlet, with the smallest possible tops. Exceptionally crisp and tender and of fine flavor. 20 days. Pkt., 10c; oz., 20c; ¼-lb., 40c; lb., \$1.00.

Early Scarlet Turnip—A wellknown Radish for early home and market use. Matures quickly; crisp and of good flavor. 25 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb.,

Crimson Giant Globe

Crimson Giant Globe — Early globe shaped and grows to an unusually large size; is always tender and of mild flavor. It remains in perfect condition a remarkably long time and unlike other forcing varieties, does not become pithy even when twice their size in diameter. 32 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.00.

Early White Turnip—A very quick-growing, small, turnip-shaped variety. Color, clear white; very mild flavor. 35 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 90c.

VOLCK DESTROYS ALL GARDEN PESTS (See Index under Insecticides)

Radish—Early Scarlet Turnip

Early Scarlet Globe-One of the earliest; flavor mild, crisp, juicy and tender. It forms a small top and will stand a great amount of heat without becoming pithy. 25 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 95c.

Radish

Radish seed can be planted about as early as any of the vegetables. It is important that Radishes be grown quickly, for if they come on slowly, they will be pithy and strong. Successive plantings may be made every two weeks.

French Breakfast or Half Long — Medium size, olive-shaped Radish; small top, scarlet except at the tip, which is white; a splendid table variety for either forcing or outdoor culture. Makes rapid growth. A great favorite. 30 days. Pkt., 5c; oz., 20c; ¼-lb., 35c; lb., 90c.

Summer Radishes—Long Varieties

Grow larger than early varieties and remain in good condition longer.

Long White Vienna or Lady Finger—An extra fine garden Radish. Both skin and flesh are pure white; the flavor is quite mild, and the roots seldom become pithy, remaining in good condition for a considerable length of time. 30 days. Pkt., 5c; oz., 15c; 1/4-1b., 35c; 1b., 95c.

White Icicle—The roots of this Radish grow about six inches long, are of transparent whiteness with short leaves, and make their growth very quickly. It is of excellent flavor and equally valuable for home use and market gardeners. 30 days. Pkt., 5c; oz., 15c; 1/4-lb., 35c; lb., 90c.

Radish-Icicle

White Strasburg—The skin and flesh are white and agreeably mild, being crisp and refreshing; keeps crisp and tender a long time. 40 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 90c.

Long Scarlet Short Top—This bright scarlet short topped sort is about 5 inches long; is uniformly straight and smooth, crisp and brittle; an excellent variety for private gardens or market. 35 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 95c.

Winter Varieties

Make your first planting the middle of June, a second the middle of July. Sow thinly in rows not less than 15 inches apart between the rows, and thin out to stand 6 inches apart in the row; firm and well-drained soil is essential. Apply water during dry weather. Winter Radishes are easily stored for Winter use in any frost-proof cellar in damp sand.

China Rose—One of the best Fall and Winter va-60 days. Pkt., 5c; rieties; firm, white flesh. oz., 15c; ¼-lb., 35c; lb., 90c.

Mammoth White China or Celestial-Flesh solid and brittle; pure white; flavor mild or slightly pungent. A splendid keeper for use in Winter; very showy. 70 days. Pkt., 5c; oz., 15c; ¼-lb., very showy. 35c; lb., 90c.

Long Black Spanish-The latest and hardiest of all the Winter Radishes; roots black, long, large and good keeper; pull before severe frost and store in damp sand in root house. 70 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 90c.

Round Black Spanish-A round form of above. 60 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 90c.

Sakurajima or Mammoth Japan—This is a mammoth variety, and is said to be the largest variety that is obtainable in Japan. Very tender, and round. Pkt., 10c; oz., 20c; ¼-lb., 60c; lb.,

Nerima or Mikado—A wonderful product of the Orient, with snow-white flesh; very tender and under good conditions growing from two to three feet in length. Pkt., 10c; oz., 20c; 4-lb., 60c; lb., \$1.75.

Rhubarb

Ger.-Rhababer. Scand.—Rhababer.

(One ounce to 125 feet of drill—1 lb. to acre)
Seed should be sown early in the Spring in shallow drills 1 foot apart; thin out to stand 4 to 5 inches apart in the row. The following Spring the roots should be transplanted into permanent beds and placed 3 feet apart each way; the year following that, or two years after sowing the seed, the Rhubarb may be used. Do not cut Rhubarb; pull it so that it comes out whole from the crown.

For forcing, take up some of the larger roots and plant in a dark corner of the cellar. Cultivate Rhubarb frequently, even after the cutting season is over, and top-dress with fertilizer in the Fall at least every other year.

Victoria-A variety with large, dark red stalks with plenty of juice. Becoming the most popular variety. Pkt., 10c; oz., 25c; ¼-lb., 75c; ½-lb., \$1.00; lb., \$2.00.

New Guinea Butter Bean

One of the Most Delicious of All Vegetables

The New Guinea Butter Vine is a wonderful vegetable. Grows to enormous size, one fruit often weighing 15 lbs., and from 3 to 5 feet long. In growth it is similar to the squash, and can be grown in the same manner or can be trellised up. It is more productive than squash and much easier to grow. The vines are always free from disease and insect pests, and stand more neglect ease and insect pests, and stand more neglect and abuse than any other vegetable vine we know of. The fruits should be eaten when small, while the fuzzy growth is yet on. It can be cooked like squash and fried like egg plant. When cut up in small pieces and cooked with cream or cooked with cream or fried it is most delicious. If trellised up, the vines take up so little space, no garden is too small for at least wo or three plants. Pkt., 10c; 3 pkts., 25c; New Guinea Butter Bean DZ., 50c, postpaid.

Salsity or Oyster Plant Ger.—Hafer-Wurzel. Scand.—Havrerod. (One ounce will sow 100 feet of drill)

(8 lbs. to the acre)

Culture-Sow the seed in light, deep soil, early in Spring, in drills 12 inches apart and 1 inch deep, thinning out the young plants to 4 or 5 inches. The roots will be ready for use in October, when a supply should be taken up and stored like carrots. Those remaining will suffer no injury by being left in the ground till Spring, but should be dug before growth starts.

Mammoth Sandwich Island — We consider this the largest and most profitable Salsify in cultivation; roots are two to three times the size of the ordinary Salsify, and of more agreeable flavor. It is pure white in color, and invaluable to market gardeners. 90 days. Pkt., 10c; oz., 25c; ¼-lb., 75c; lb., \$2.25.

Salsify

FLOWER AND VEGETABLE SEED COLLEC-TIONS—(See Page 74)

SWEET PEA NOVELTIES—(See Page 65)

Spinach

Scand.—Spinat. Ger.—Spinat.

(One ounce for 100 feet of drill) (10 to 12 pounds in drills for one acre)

Sow early in the Spring and make succession sowing every ten days until the end of May. For late Summer crop sow September 1st. No Spinach except the New Zealand will stand July and August heat without shooting to seed heat without shooting to seed.

Spinach—Round Thick Leaved

Round Thick Leaved—This variety grows quickly, forming a cluster of slightly wrinkled leaves of deep green color and good quality. The leaves are broad arrow-shaped but sometimes rounded. This is an extensively used medium early sort for the market and home garden. 45 days. Pkt., 50: 07, 150: 14-lb, 300: lb, 650 5c; oz., 15c; ¼-lb., 30c; lb., 65c.

Long Standing-The best variety for family use, as it remains in good condition longer without running to seed than the round leaved sorts. Thick. Well-flavored leaves. 45 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 65c.

Bloomsdale Savoy Leaved—One of the best of the savoy leaved type, with thick, heavily curled leaves. Very succulent and tender. 40 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 65c.

King of Denmark-This remarkable new Spinach is far superior to any of the above sorts. Its principal advantage is that it stands two weeks longer before running to seed than any other variety. The leaves are large, rounded. Savoy or crumpled of deep green color. Ready to cut in 48 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 65c.

New Zealand—(The Hot Weather Spinach) — The stems and leaves of this variety are soft, thick, fleshy and crystalline in appearance. Started early in the Spring, the plants will resist heat and make strong growth during the Summer. 55 days. Pkt., 10c; oz., 20c; ¼-lb., 40c; lb., \$1.00.

Seeds for Flavoring, Medical and Other Purposes

Postpaid	1/4 - lb.	1 lb.
Celery—For flavoring and soup (not		
for sowing)	\$.20	\$.60
Dill—For flavoring	15	.50
Pumpkin—(For medical purposes)	25	.75
Watermelon—(For medical purposes)	.15	.40

Lentils

Lentils—Growth and habit similar to the Pea. Is in great demand for cooking purposes; makes excellent soup. Lb., 20c, postpaid, 29c; 5 lbs., 85c, postpaid, \$1.00.

Have a supply of Vegetable Seeds on hand to replace the varieties used up. Beans, Beet, Lettuce, Radish, and Spinach are all suitable for filling in. Keep your garden producing for you.

## Squash

Ger.—Kurbiss.

Scand.—Squash-Graeskar.

(One ounce to 25 hills; 3 to 4 lbs. to the acre)

There are two distinct types. The Summer varieties are cultivated for the tender young fruits which are used in the green or growing stage during the Summer months. The Winter Squashes produce larger hard-shell fruits, which are gathered in the Fall before there is danger of their being injured by frost, and stored in a warm, dry place for Winter use. Be sure and leave part of the stem attached to the fruits. A few varieties may be used in either state.

Squash-Early White Bush

Early White Bush—One of the best early maturing varieties. The fruit is a beautiful waxy white of superior quality, somewhat flattened, scalloped along the edge and of medium size. It has a lasting delicious sweetness. 55 days. Pkt., 5c; oz., 20c; 4-lb., 45c; lb., \$1.25.

Vegetable Marrow — The favorite English Long White sort. The fruit is very desirable in size, from 9 to 19 inches in length and from 4 to 6 inches in diameter. Skin white, flesh white, and of rich flavor. Distinct from all other varieties of Squash. 65. days. Pkt., 10c; oz., 25c; ¼-lb., 65c; lb., \$1.75.

Early Summer Crookneck

Early Summer Crookneck - Very early medium sized, about 15 inches long and matures in 70 days. Flesh has a deep golden yellow color, is dry and of most agreeable flavor. Is the most highly esteemed of all Summer varieties. 60 days. Pkt., 5c; oz., 20c; 4-lb., 45c; lb., \$1.25.

#### Collection --- Salad Greens

Very few people are acquainted with salad vegetables other than head lettuce. We offer the following collection of palatable, deliciously flavored green vegetables, to supply greens from April through the Winter: Cos Lettuce Chinese Celery Cabbage French Endive or Chicory Corn Salad Endive Water Cress

One pkt. of each for 35c, postpaid

#### Tobacco

(One ounce will plant an acre) Grow Your Own Smoking Tobacco

Cultural Directions—The plants should be started in a hot bed, or in pots or boxes in the house, and transplanted outdoors, three feet apart each way, when danger of frost is past.

Connecticut Seed Leaf—The hardiest variety in cultivation. Pkt., 10c; ½-oz., 35c; oz., 60c.

Squash—Improved Hubbard

#### Fall or Winter Varieties

Red or Golden Hubbard-Almost identical to the Warted Hubbard, the chief distinction being that the heavily warted skin is of a rich orange yellow, turning to a deep salmon red when ripened. It is of most attractive appearance, fine quality and is one of the most profitable market sorts. 105 days. Pkt., 5c; oz., 25c; ¼-lb., 45c; lb., \$1.25.

Improved Hubbard—This old and popular favorite is still one of the very best Winter Squashes grown; always richly flavored. The vines are luxuriant growers and very productive, yielding large Squashes of dark bluish green color, weighing often 10 to 25 lbs. each. Properly stored it may be kept from September to May. 100 days. Pkt., 5c; oz., 25c; ¼-lb., 45c; lb., \$1.25.

Delicious—This Fall and Winter Squash is more delicious than the well known Hubbard. The color of skin is green; size about same as Hubbard, weighing from 5 to 10 lbs. The shell is not very thick, but is hard and strong; the flesh is thick, bright yellow, fine grained and of splendid quality. For table use, either as a Fall or Winter Squash, it cannot be excelled. 110 days. Pkt., 5c: 07, 25c: 14 clb. 45c: 15. 5c; oz., 25c; ¼-lb., 45c; lb., \$1.25.

Warted Hubbard-It is similar in size and quality to the Hubbard. The vines are vigorous and productive, while the large dark olive-green fruits are rather more heavily warted. Very handsome in appearance; an excellent keeper and of splendid quality. 110 days. Pkt., 5c; oz., 25c; ¼-lb., 45c; lb., \$1.25.

Table Queen—Sometimes called Des Moines, Acorn, Individual, and Danish Squash—Cut in half and baked for twenty minutes, it will give you a delicious meal you will long remember, and fine for pies. You will be pleased with the quality of this Squash. The fruits are a nice size to handle, 6 to 7 inches long and 4 to 5 inches in diameter. The shell is hard and smooth, so that they keep as well as the Hubbard. The color is dark green, acorn shaped, makes an ideal individual Squash. Ripens in the Fall. Pkt., 10c; oz., 25c; ¼-lb., 60c; lb., \$1.50.

Boston Marrow—Is a very popular Squash, very productive Fall and Winter variety of medium to large size, oval shape, and thin skin. It is much used for canning and making pies. The fruits when ripe are bright orange with a shading of light cream color. The flesh is of rich salmon yellow color, fine grained and of excellent flavor. 100 days. Pkt., 5c; oz., 20c; ¼-lb., 40c; lb., 95c.

Squash—Boston Marrow

## S. N. & S. CO'S. HARDY TOMATOES

#### Ger.-Liebesapfel.

Scand.—Tomat.

(One ounce will produce 2,000 to 3,000 plants)

Culture—Sow early in hot beds, and as soon as they have four leaves transplant into shallow boxes. Harden off, and set out as soon as danger of frost is past.

Break O'Day — This new Tomato was developed from a cross between Marglobe and Marvana and was introduced by the U. S. Department of Agriculture. The beautiful scarlet fruits are of medium size, deep, solid, smooth and almost seedless. Of vigorous growth but with very little foliage. It matures in about 80 days. From present indications it will be the most popular extra early Tomato in the market. Pkt., 25c; ½-oz., 30c; ½-oz., 45c; oz., 80c; ¼-lb., \$2.40.

John Baer—This is a hardy and very prolific extra early variety. The fruits are of large size, scarlet in color, nearly round, smooth, firm and of excellent quality. One of the first varieties to ripen and continues to bear a long time. A very desirable sort for gardeners and for home use. 85 days. Pkt., 10c; ½-oz., 25c; oz., 40c; ½-lb., \$1.15; lb., \$3.25.

Tomato—Bonny Best

Bonny Best—An extra fine early variety for the home garden; a few days later than the Earliana. The color is bright red; ripens evenly to the stem. It is a vigorous grower and very productive. 100 days. Pkt., 5c; ½-oz., 25c; oz., 40c; ½-lb., \$1.20; lb., \$3.50.

Spark's Earliana—Plants are of compact growth with stout-joined branches. Yields well and fruit is solid and of fine quality; bright red in color, of good size. Ready for market in 90 days. Pkt., 5c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.15; lb., \$3.25.

Marglobe—This fine second early produces large, smooth, meaty, globular red fruits, which ripen evenly, and are free from cracks. An extremely heavy cropper. Especially valuable to those who are in districts troubled with rust and wilt, and particularly in the Southern States, as this strain is immune. Pkt., 15c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.50; lb., \$5.00.

Golden Queen—Fruit of good size, smooth, solid and mild in flavor. Color, bright yellow; early and a prolific bearer. Many consider this yellow Tomato to be of a better flavor than the red varieties; it is less acid. 100 days. Pkt., 5c; ½-oz., 25c; oz., 45c; ¼-lb., \$1.35; lb., \$4.50.

Tomatoes, Melons Spinach and some other crops requiring rather long growing seasons are materially benefited by a second application of fertilizer when half grown. Side dressings of Bone Meal or Vigoro should be scattered between the rows at the rate of four ounces to ten feet of row, when rows are spaced two feet apart.

IMPORTANT — By supporting the plant less ground space is required, the fruit will ripen better and less will spoil.

### Novelties

#### Orange Sunrise

Is one of the earliest and most prolific Tomatoes. It possesses the finest flavor of any variety yet introduced and bears fruit of a beautiful orange color, medium size, in large clusters, suitable for indoor and outdoor culture. We are convinced that all who give the Orange Sunrise Tomato a trial will realize its value, notwithstanding popular prejudice in favor of red Tomatoes. Pkt., 25c; ¼-oz., \$1.25; ½-oz., \$2.00; oz., \$3.50.

#### Market King

Early and prolific. It is one of the finest Tomatoes for indoor and outdoor culture ever introduced; matures quickly from seed. Market King is an immense cropper, yielding heavy bunches at short intervals all over the plant. Fruit smooth and of fine quality, medium in size and perfectly round. The color is bright scarlet and produces almost no seed. We question if any other variety would carry so heavy a crop; for this reason it is very valuable for market purposes. Pkt., 25c; ¼-oz., \$1.25; ½-oz., \$2.00; oz., \$3.50.

Tomato-Market King

Avon Early—Extra early scarlet fruited variety. Produces good sized fruits, round or slightly flattened, deep scarlet in color, smooth, free from cracks and of fine quality. Very productive; as early as Earliana and bearing for a longer time. Avon Early is a decided improvement over Earliana. 90 days. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.15; lb., \$3.25.

Tomato—Spark's Earliana

## Tomato

#### Small Fruited Varieties

(For Pickling, Preserving and Garnishing)

Red Pear Red Peach Red Plum Red Cherry Red Currant

Pkt., 10c; ½-oz., 35c; oz., 60c; ½ -lb., \$1.80.

Winter Cherry, or Purple Husk Tomato — Makes fine sauce. Pkt., 10c; ½-oz., 40c; oz., 75c; ¼-lb.,

Yellow Cherry Yellow Plum Yellow Peach Yellow Pear

Pkt., 10c; ½-oz., 35c; oz., 60c; ¼-lb., \$1.80.

Ground Cherry, Strawberry, or Yellow Husk Tomato-The small yellow fruits are each inclosed in a husk. Of very sweet flavor; for preserving or making pies. Pkt., 10c; ½-oz., 40c; oz., 75c; ½-lb., \$2.50.

### Table Turnip

Scand.—Turnips. Ger.—Steckruebe. (1 oz. will sow 150 ft. of drill; 2 lbs. to an acre)

Culture — For early use, sow as soon as the ground can be worked in Spring, in drills 15 inches apart, and thin to 8 inches apart as soon as plants are large enough to handle. The sowing should be made just before rain, if possible, a rapid growth being important.

For feeding stock in Fall and Winter there is nothing superior to Turnips and Rutabagas, as they are liked by all kinds of stock and serve to keep them in good condition. We cannot too earnestly recommend farmers to increase their sowings largely for we are sure the crop will prove remunerative.

## White Varieties

White Milan—Extra Early—Very small top, upright and compact; the clear white roots are very smooth, symmetrical and beautiful; there is no better Turnip for early bunching; fine grained, tender and sweet. 45 days. Pkt., 5c; oz., 15c; ½-lb., 35c; lb., 85c.

Purple Top Milan—Extra Early—Very similar to the White Milan except that the roots are a little more flat, and the top of the root is purple. 45 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 85c.

Early Snowball—A medium globe-shaped variety of pure white. Very solid and of the finest quality for table use. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 85c.

Turnip Purple Top White Globe

purple on the upper portion. oz., 15c; ¼-lb., 25c; lb., 65c.

Purple Top White Globe-The most variety popular Round, grown. globe - shaped, about six inches in diameter, with smooth, white skin; flesh pure white, firm and crisp, and of quick growth. A good keeper and fine for market.
70 days. Pkt., 5c;
oz., 15c; ¼-lb.,
25c; lb., 65c.

Purple Top Strap Leaf — A very popular variety. It is a quick grower, the flesh is pure white, very fine grained and sweet fla-vored. The roots are flat, marked with reddish 55 days. Pkt., 5c;

Early White Egg — An old favorite, egg-shaped, perfectly smooth, firm and mild. 50 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 65c.

Golden Ball—A rapid grower; yellow-fleshed; of medium size; firm, hard and of superior flavor. Valued highly as a table variety. 70 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., 75c.

### Rutabaga---Winter Turnip

These require a longer season in which to grow than do other Turnips; the seed should be sown about the first to the middle of June.

Bangholm—The seed of this variety of Rutabaga is grown in Denmark and has been awarded a first class certificate on several occasions by the Danish government for the best cropping Rutabagas. An oblong, globular-shaped root with small neck, yellow flesh, very dark purple top and is superior to all other varieties. 95 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb., 75c.

Large White or Sweet Russian—This variety is most excellent either for table or stock. It grows to a large size; flesh white, solid, firm texture, sweet and rich; keeps well. 90 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; 1p., egc.

> Stim-U-planT An all the year fertilizer for garden and house plants. See p. 125.

Large White or **Sweet Russian** 

## Carco

Vegetable Spray Controls Maggots, Etc. See Page 129

American Purple Top— This strain is of American origin and is a purple top yellow variety. Excellent for table use and also for stock feeding. A most desirable variety. 95 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; lb.,

#### Turnip Sauerkraut

The farmer who used to put down a barrel of cabbage sauerkraut each Fall may add another product to his list.
Turnip sauerkraut is a new appetizing food suggested by the United

Rutabaga—American Purple Top

States Department of Agriculture. The department finds that a good sauerkraut can be made from medium-sized, purple-top Turnips. They should be firm, sweet, and juicy in order to allow proper fermentation and flavor. The fleshy part of the root is ground or shredded and mixed with salt at the rate of 4 ounces of salt to 10 pounds of Turnips. The mixture is then packed in stone jars, weighted down, and allowed to ferment.

Turnip sauerkraut may be stored at a low temsome time, has a sharp flavor, closely resembling good cab-bage sauerkraut. Most of the Turnip flavor is lost when the kraut ferments.

#### RAPID SERVICE

During the Spring months we receive hundreds of orders every day and usually every order is shipped the same day as received. The demand for State Nursery & Seed Co's. Peerless Seeds continues to increase every year. Our sales exceeded all previous years and now we offer the highest quality seeds obtainable at

LOWER PRICES because of the increasing volume of State Nursery & Seed Co's. Peerless Seeds, and economy in handling.

Rutabagas are highly nutritious as a table vegetable and profitable as food for stock and fowls.

SWISS CHARD—(See Page 80)

## S. N. & S. Co's. Rocky Mountain Lawn Grass

The chief desire of almost every home owner, whether a town or rural dweller, is to possess a good lawn, and nothing adds to the appearance of a residence as much as a good lawn of thick growth and velvety appearance. A nicely kept sward, neatly trimmed, adds materially in beautifying any building or residence, and often, too, becomes one of the chief selling features.

(One quart will sow 200 square feet or 10x20;10 lbs. for 2,000 square feet, or 40x50; 60 to 100

lbs. per acre or 43,560 square feet.)

View of Campus of St. Vincent Academy, Helena Boarding School for Young Women

Kentucky Blue Grass — (Super Grade)—
Once in about 5 years there is an extra
fine quality of Blue Grass produced.
This makes it possible to secure seed weighing 26 lbs. per measured bushel, fine plump bright seed. Ordinary seasons 21 to 23 lbs. seed is good weight. Buy Super Seed for your lawn this season.

1 lb., 40c; 5 lbs., \$1.60; 10 lbs., \$3.00; 25 lbs., \$7.00.

KENTUCKY BLUE GRASS

("Peerless" Grade)
We wish to call particular attention to the cleanliness of our Peerless Blue Grass;

it's the cream of the market.

1 lb., 30c; 5 lbs., \$1.20; 10 lbs., \$2.30; 25 lbs., \$5.20.

> KENTUCKY BLUE GRASS ("Placer" Grade)

Used extensively for lawns, parks, street parkings and large lawns for public buildings. Also used in meadow mixtures of grasses for pasture or hay.

1 lb., 25c; 5 lbs., \$1.10; 10 lbs., \$2.15; 25 lbs., \$5.00.

#### SAINT VINCENT ACADEMY Helena, Montana

December 5, 1932

The lawn in the foreground was planted early in June, 1932. Within a few weeks a carpet of young green grass made a garden spot of a hitherto barren plot of ground. By Fall the lawn, thick, smooth, and free from weeds appeared one of many years' growth, and added greatly to the beauty of our grounds.

We are, indeed, pleased with the results obtained from the seed purchased from the State Nursery and Seed Company.

SISTERS OF CHARITY.

#### ROCKY MOUNTAIN LAWN GRASS MIXTURE WITH DUTCH CLOVER

As there are many people who like white clover in a lawn, we put up this special mixture, which has gained us many friends and is increasing in popularity.

Pint, 20c; quart, 30c; 5 lbs., \$1.25; 10 lbs., \$2.40; 25 lbs., \$5.25.

#### ROCKY MOUNTAIN LAWN GRASS MIXTURE

Same as the above Rocky Mountain Mixture but without White Dutch Clover.

Pint, 20c; quart, 30c; 5 lbs., \$1.25; 10 lbs., \$2.40; 25 lbs., \$5.25.

#### SHADY PLACE LAWN GRASS MIXTURE

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places. For sowing in such places we recommend the use of this special mixture. The grasses used in making this mixture are those that are well adapted for growing in shade.

Pint, 25c; quart, 35c; 5 lbs., \$1.20; 10 lbs., \$2.55; 25 lbs., \$5.50.

#### WHITE DUTCH CLOVER—("Peerless")

This is frequently sown to cut green for chicks and fowls; also used largely in making lawns for which this variety is especially adapted.

½-lb., 30c; 1 lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.25.

#### MIXTURES FOR GOLF LINKS

While there are on the market numerous ready prepared golf mixtures of more or less value, we have found that the best results are obtained by giving individual attention to each customer and making a special mixture to suit his needs. Write us a description of your links, telling what the nature of the soil, how drained, how much it has the sun and ask for prices. the sun, and ask for prices.

#### INTERMOUNTAIN UNION COLLEGE Helena, Montana

Wendell B. Brooks, Ph.D., President C. H. Cruttenden, Business Manager

November 17, 1932.

State Nursery and Seed Co., Helena, Montana. Gentlemen:

We accomplished such a fine result from your grass seed in making a piece of new lawn upon our College campus, that I want to thank you for giving the College this particular attention as well as for your services for the further improvement of our grounds.

Very truly yours,

WENDELL S. BROOKS. President.

WSB: SIG

#### FOR A BEAUTIFUL LAWN

To have a thick, velvety-green lawn, regular feeding is essential. Feeding your lawn with Vigoro in Spring, Summer, and Fall will produce and maintain a strong, vigorous turf that will choke out weeds and prevent new ones from getting a foothold. It will produce deep, extensive roots which will withstand drought and Winter-killing; help resist disease, and add humus to the soil. See page 129.

#### CREEPING BENT GRASS (West Coast Registered Seed)

Is particularly valuable for lawns that are to be used for croquet grounds or tennis courts on account of its compact creeping rooting stems; of rapid growth and spreading the best formula to the state of the stat ing habit, forming a strong, durable turf, because it is benefited more than hurt by tramping and by its bright color adds to the beauty of the lawn.

1 lb., \$1.25; 5 lbs., \$5.75.

## FIELD SEEDS

Prices on practically all field seeds are much lower this season than for the past several years. However, the price of grass, clover and other field seeds is not the most important factor that governs the purchase. Nothing is more important to the farmer than that the seed he sows should be also and of high purity and governotion had be clean and of high purity and germination, heavy, plump and matured, so as to insure a good crop. Our Peerless Seed, while costing a little more in the beginning, is really much cheaper the ending and at leaven prices. than grades sold at lower prices. Heavy, plump seed germinates better and will produce a greater number of strong plants. With our many years of experience in and knowledge of the seed business, also our up-to-date cleaning machinery, we are in a position to furnish you seeds that will satisfy every requirement at a reasonable price. If you are planning to seed a large acreage, write us and we will gladly quote you a quantity price. Samples will also be sent on request.

The surest way of building up your land and assuring yourself of a good profit is to plant alfalfa, clovers and grasses, and raise livestock. Also produce your own vegetables and flowers by planting a home garden.

Our Warehouse and Seed Cleaning Plant

#### OUR BRANDS

Peerless is our best brand and only the best seed obtainable is so branded. It is always 99% pure and usually higher, no noxious weeds, and of the highest germination. We recommend this

Placer grade is equal to, and in many cases has a higher purity and germination than other so-called "best" brands. Tests 98% or better.

Quartz—Although lower in purity and germination than our other two grades, our Quartz grade is good seed, 97% or better pure.

#### BUY YOUR SEEDS EARLY

You will gain a distinct advantage by arranging for your seed supply, as orders must be filled carefully.

#### **IMPORTANT**

Owing to fluctuations in market prices, it may be necessary to change some of the prices quoted herein during the season. Should prices change and orders be received at prices named, seeds will be sent equivalent to the money received, figuring the order at current prices.

#### HOW TO SHIP

Always state how you want heavy seed shipped, by freight, parcel post or express, and if your station is a prepay point, don't forget to add enough money to take care of the charges. Should you not receive the goods you ordered within a reasonable time, write us regarding the matter and we will gladly put a tracer after your shipment.

ALL FIELD SEED PRICES ARE F. O. B. HELENA UNLESS OTHERWISE STATED

We Deliver Free by parcel post or express, all Vegetable and Flower Seed by the packet, ounce and half pound and up to and including ten pounds unless otherwise stated. All other items are F. O. B. Helena, and postage, freight or express charges, if your station is a prepay station, must be added.

## A Short Story of Grimm Alfalfa Seed

The original source of perhaps 95% of all the Registered Grimm in the state can be traced back to our house. We were the first to introduce and distribute this seed in quantity and without ego we can justly claim to be the foster father of a great industry within the state. Records and history substantiate this claim and we are still endeavoring to serve and distribute to our customers a first class quality of pedigreed stock in any quantity and at any time desired. To register fields for seed production in Montana the seed must be Montana grown.

#### PEDIGREED GRIMM

True Grimm Alfalfa has in every respect proved itself a most wonderful variety and its reputation has been so well established that the registered and sealed seed always commands a top price. Our stock is the best that can be produced; fully registered; inspected; tested and sealed under regulation of Montana Seed Growers' Association.

#### PEDIGREED COSSACK

Introduced by Professor Hansen in 1906. Many farmers have found by their own experience that Cossack is the heaviest and best seeder of any Alfalfa Seed they have tested. The past dry seasons have demonstrated the value of Cossack.

#### VARIEGATED ALFALFA SUPERIOR

In tests which have extended from 1919 to the present time, variegated Alfalfas, such as Cossack and Grimm, have shown definite superiority in yield and Winter hardiness over common Alfalfas, says F. S. Wilkins, head of research in forage crops at Iowa State College.

Montana common varieties, however, have been definitely superior in yield and Winter hardiness to other common Alfalfas.

## Montana Grown PEDIGREED COSSACK ALFALFA SEED Classified and Sold in Three Grades

Blue Tag "Fancy"—Sound, plump seed, purity at least 99.25, no sweet clover or dodder.

Red Tag "Choice" — Sound seed, purity at least 98.50, no sweet clover or dodder.

Yellow Tag—Certified as to variety only. No dodder. May have sweet clover in amount shown on tag. Purity as indicated on tag.

## Montana Grown PEDIGREED GRIMM ALFALFA SEED Classified and Sold in Three Grades

Blue Tag "Fancy"—Sound, plump seed, purity at least 99.25, ho sweet clover or dodder.

Red Tag "Choice" — Sound seed, purity at least 98.50, no sweet clover or dodder.

Yellow Tag—Certified as to variety only. No dodder. May have sweet clover in amount shown on tag. Purity as indicated on tag.

TOTAL CONTRACTOR OF THE

### Unregistered Grimm or Cossack

We have to offer a quantity of each of the unregistered Grimm and unregistered Cossack. This seed was from originally registered seed on unregistered fields; unregistered because registration was not applied for.

While this quantity lasts it will afford the hay producer an opportunity to plant Grimm or Cossack at a seed cost considerably under the registered seed price.

Write for samples and quotations, stating the quantity you desire

## Montana Hardy "Selected" Alfalfa **OUR SPECIALTY**

INOCULATE THIS SEED WITH **FARMOGERM** 

Some Facts Worthy of Your Attention

StimUplanT

Montana Alfalfa Seed is now recognized everywhere as being the hardiest of all Alfalfa and therefore the most consistent high yielder in hay tonnage.

Results of an eight-year test at the Michigan Agricultural Experiment Station show that Montana seed leads in hay production in competition with seed from the country's leading Alfalfa producing states.

Every prospective purchaser of Alfalfa Seed should bear in mind that Montana Alfalfa Seed is now in demand in every state and country where poor yields and Winter killing are important factors.

Can you afford to plant other seed when the Montana seed is available?

When it is available we have it and are pleased to submit our closest quotations on any quantity or grade desired.

## The "Peerless Brand" on Our Seeds Means-Quality

We consistently prepare our seeds to represent the best that the crop affords. Bags are all tagged and comply with the requirements of your State Pure Seed Laws. Uniform throughout the season.

## Extra No. 1 or Peerless Grade Hardy Montana Alfalfa

Is heavy, uniformly plump and bright as is characteristic of healthy seed carrying a strong germ and high productive qualities. Peerless grade is always at least 99% pure and usually above 99.50%.

## Placer Grade Hardy Montana Alfalfa

Placer is our No. 1 grade. Not as uniform in color or quite as high in purity, although this is consistently around 99% pure and carries practically no weeds, noxious or otherwise.

Equal to most Alfalfa Seed offered under fancy grade.

## Quartz Grade Hardy Montana Alfalfa

Quartz is our No. 2 grade, therefore more variable in color and purity than either of the other two grades. However, for those who want hardy Montana Seed at a low price, this Seed very often fills the bill. The demand and repeat orders on this grade are convincing evidence that it has a place in our list.

The purity and germination on this grade often runs as high or higher than that of our Placer grade and even though from a producing standpoint this Seed is perfectly good, it has to be separated into a lower grade at a lower price principally because of color alone.

Look through our catalogue—you will find Alfalfas, Clovers and Grasses listed and described. If you have any questions write us and we will be glad to give you any information that we can.

Our Alfalfa Seed is raised in the high mountain valleys and is dry land seed. These strains have proven the hardiest and will withstand the severe Winters of our surrounding country. lots are tested for purity and each sack is tagged showing the purity and germination.

INOCULATE THIS SEED WITH STIMUGERM

## CLOVERS

INOCULATE THIS SEED WITH **STIMUGERM** 

Alsike Clover

Cultural and Soil Conditions—Alsike prefers localities with plenty of moisture in soil and air. The most suitable soil is moist clay loam or clay with good lime content. It can be grown to advantage where soil is too wet for Red Clover, and with poor drainage, where Red Clover is a failure, Alsike will flourish. It has a rather shallow root system.

Uses—When grown for hay it is usually best mixed with Timothy or Red Top, thus producing finer quality. A popular mixture for Montana is about 80 per cent Timothy and 20 per cent Alsike. Is best cut for hay when in full bloom or a trifle

It produces usually one crop of hay a season but the tonnage is very heavy.

It is much esteemed for pasture because of its high feeding value. When sown alone, use about eight pounds to an acre.

#### CLOVER-Medium Red

Cultural Conditions—Being a resident of the temperate zone, Red Clover succeeds best where Summers are not too hot nor the Winters too severe. Most parts of Montana, probably with the exception of the northeastern part of the state, are pretty well adapted to Red Clover production. Selection of Northern grown, preferably Montana grown, seed for hardiness is the best insurance.

Soil Requirements-Red Clover can be grown on many kinds of soil, the most suitable being clay loams with a certain amount of lime and plenty of organic matter. Sandy loams give good returns, especially on limestone foundation. Red Clover, however, generally prefers the heavier soils.

#### CLOVER-Mammoth Red

Botanical Description-Mammoth is a large variety of the Red and for the most part is a perennial. Stems are long, coarse and more spreading. Mammoth Red is later than Medium Red, blooming about 10 days after. It grows more slowly than Medium Red and can generally be cut only once in a season. Cultural and other conditions same as Medium Red.

WHITE SWEET CLOVER

When young it is succulent and quite palatable for hay and pasture. When old and woody it loses much of its palatability. For hay purposes in Montana it might better be considered an insurance crop than a competitor of Alfalfa. It is sure to make a good crop of hay or roughage under conditions which might cause an Alfalfa crop failure.

It is quite popular for pasture purposes both for cattle and sheep.

For fertilizing value it can hardly be excelled. It furnishes economical, quick and abundant nitrogen to the soil

gen to the soil.

**Sweet Clover** 

#### YELLOW SWEET CLOVER

Yellow Sweet Clover is not far different from White except, as the name signifies, it has a yellow flower.

Generally speaking, the plant does not grow as rank as White, has more of a spreading growth habit and somewhat finer texture, thus making it a consistent gainer in popularity over the White for pasture purposes.

We know of and can offer proof of an instance where 30 acres of Yellow blossom offered abundant pasture for 700 ewes and lambs, continuing for three months.

## WHITE BLOSSOM "ARCTIC" or GRUNDY BIENNIAL

This is a white blossom biennial Sweet Clover that grows from 31/2 to 4 feet high; matures an abundance of seed that ripens three weeks ahead of common white biennial. The oustanding advantage of this Clover is that it grows to a good height for harvesting, but does not require clipping, thus getting away from the hazard of killing the Clover by clipping improperly. It ripens early ahead of weeds and is ready to thresh and hull before small grain. It is very hardy and will withstand dry Summers and hard Winters. The seed is usually a little higher in price than the other varieties, but well worth all you pay for it. Fine for hay.

Cultural and Soil Conditions—Grows readily in nearly any soil or climate.

#### White Dutch Clover

## Kentucky Blue Grass

Botanical Description—Kentucky Blue Grass is a perennial with a widely creeping rootstock. This produces runners and leafy shoots. The runners are underground stems carrying colorless scales instead of green leaves. They creep under the ground surface and produce upright stems from their ends. The upright leafy stems arise in bunches from their base. The stems are from onehalf to three feet high and perfectly smooth. The stem leaves are comparatively short.

Cultural and Soil Requirements—It grows practically everywhere that agriculture is of importance—on dry hills and in wet marshes. For proper development, however, it requires pretty good soil. It does best on bottom lands where soil is loose and rich in humus with a good lime content. It is regarded as the king of all pasture

Uses—If grown for hay, it should be cut when in flower. Its feeding value is best at that time. It cannot always be relied on for a second crop of hay.

#### MEADOW FESCUE

Botanical Description-Meadow Fescue is a perennial with long, strong roots. It has short root-stocks and is therefore tufted but not so much as Orchard Grass.

Stems are from 18 to 36 inches high, smooth and slender. Leaves are long, broad and slight in texture. Brome and other grasses have panicles similar to that of Meadow Fescue.

Cultural and Soil Conditions—It does best in a soil rich in organic matter. It is well adapted to clay soil, although not quite so well as Orchard Grass. It can also be grown successfully on sandy land if sufficient moisture is available and the soil is not too shallow. It is better fitted for medium wet soil than Orchard Grass, especially in pasture, and stands tramping better. On the other hand, its deep root system makes it fairly drought resistant. It stands the cold exceptionally well resistant. It stands the cold exceptionally well.

Uses—Hay from Meadow Fescue is nearly equal to that from Orchard Grass. Its nutritive value is higher and it should be cut at flowering time.

#### **CLOVERS—Continued**

#### ALTASWEDE CLOVER

Altaswede is a product of artificial and natural selection from the late Swedish Red Clover which was introduced from Sweden in 1914 by the Dominion Seed Branch, Ottawa.

In the Spring of 1917 steps were taken to make an exhaustive study of the merits of this Clover. Seed was collected regularly until 1920.

From the data derived from the University of Edmonton and elsewhere in the province of Alberta, Altaswede has amply demonstrated its Winter hardiness and superior merits for fodder and seed production.

#### WHITE OR DUTCH CLOVER

White Dutch Clover—Is a perennial. The stems are creeping and root at the joints. A single plant may thus spread over a wide area. From the stems, trailing along the ground surface, are developed upright leaves and flower heads, both provided with long stalks.

The heads of White Clover develop from the lower parts of the stem.

White Clover was first developed in Holland; therefore the name Dutch Clover.

Cultural and Soil Conditions—White Dutch Clover grows naturally in meadows and pastures, does well in valleys and on mountains. It will grow in a great variety of soils from sand and gravel to rich loam and clay. It does best, however, on moist, well drained loams which contain lime and humus and is especially adapted to the moist medium warm climate. When other conditions are favorable, however, it will endure severe cold without injury and will stand drought providing the subsoil is somewhat moist, because while most of the roots are rather superficial, the main taproot penetrates to a considerable depth.

Uses—Because of its low growth it is not used to any great extent as a hay plant. Its chief value is for pasture, and in pasture and lawn grass mixtures.

It covers the ground quickly, has high nutritive value and stands tramping and close grazing exceptionally well.

Meadow Fescue

Red Top

#### RED TOP

Botanical Description—There are several varieties of Red Top, varying in height from two to four feet. The only ones of importance to agriculture are the taller varieties. Red Top has a creeping rootstock and runners. It does not grow in tufts but forms a dense sod as a result of its joint rooting habit. The leaves vary in size and number. The flowers are arranged in panicles with numerous branches.

Cultural and Soil Conditions — Red Top grows naturally in most localities. However, it is best adapted to light, wet soils where its roots can develop freely. Wet bottom land not suited for other grasses is often the ideal place for growing Red Top.

Uses - Red Top makes good growth the same year it is sown and continues growth late in the Fall. It makes a very fair quality of hay and especially has a place in grass mixtures for hay purposes.

It is very palatable and is relished by livestock in hay or pasture form.

#### PERENNIAL OR ENGLISH RYE GRASS

Botanical Description—This grass is a perennial with a creeping rootstock which develops bunches of leafy stems and shoots. The plant grows in spreading tufts. The stems are upright, more or less elbow bent ascending and are smooth and slender, growing from one to two feet high. The leaves are dark green and folded together when in the bud. The flowers are arranged in a spikelike inflorence composed of flattened spikelets in two rows. They turn their parrows side toward two rows. They turn their narrow side toward the main stem, differing from Western Rye, which turns its broad side toward the stem.

Cultural and Soil Conditions—It prefers moist, rich clay loams. It can be successfully grown on marshy land or any good well drained soil. Although it is quite drought resistant, it is not recommended for districts where the Summers are too hot and dry. It reaches its best yield at the second year but continues to give good yields for several years.

Uses-It is one of the oldest forage plants. It is very useful for hay and pasture purposes and sometimes is used in lawn mixture. Its greatest nutritive value is immediately before flowering.

#### BROME GRASS (Bromus Inermis)

Brome is a (top) grass. Persistent. Withstands drought that kills all other grasses, is not sensitive to cold and dry weather and in regard to this

is unexcelled. It does best on rich, fresh, humus-holding soils, loamy sand and sandy loam.

Habits of Growth—Produces a close sod, a single cutting the year of sowing; two cuttings the second year. It becomes useful the second year and lasts twelve to fifteen years; second cutting almost equals first most equals first.

Seed and Seeding—Good seed should test 88 per cent to 90 per cent purity and the same for germination. To sow an acre requires from 15 to

Uses—Develops a good sod, makes excellent pasture grass and fair hay. For hay it should be cut just before flowering for nutritive value.

TALL MEADOW OAT GRASS

This grass is particularly adapted to warm, dry climates, where Timothy will not grow. It is quite productive, stands pasturing well and remains green until quite late. It forms a very valuable mixture with Orchard Grass and Red Clover. It may be sown in the Spring at the rate of two to two and a half bushels per acre or where sown two and a half bushels per acre, or where sown with Orchard Grass and Red Clover blended, proportionately.

#### SLENDER WHEAT OR WESTERN RYE GRASS

Botanical Description-Western Rye Grass is a perennial with a short rootstock, not creeping. The stems and shoots are rather crowded and the The stems and shoots are rather crowded and the plant grows in dense tufts. Stems and shoots are upright, the stems being from two to four feet high. The foliage is somewhat variable. The spikelets are always strongly appressed to the main stem, making the whole inflorence narrow and slender—hence the name slender wheat grass. Cultural and Soil Conditions—It grows naturally in dry soil and thrives best where water supply is limited. It does fairly well even on alkali ground, and the root being deep and strong, it is drought

and the root being deep and strong, it is drought resistant and resistant to extreme cold. It is easy to grow, establishes itself the first year and gives its heaviest crop the third year.

Uses-It is one of the most valuable of western native hay grasses.

Perennial Rye Grass

Timothy-Most Important Hay Crop (1)

#### SUDAN GRASS

The Greatest of All Forage, Grain and Hay Crops for Silo

Sudan may be planted in cultivated rows, or close drills, or sown broadcast, but we recommend the last-named, using 25 to 30 lbs. of seed to the acre.

It is an annual and requires replanting each year; has no root stalks (as Johnson Grass) and dies with the first frosts in the Fall; is closely related to the Sorghums (Milo Maize, Kaffir Corn, etc.), but yields far more abundantly than any of these and the hay has more fattening properties. THERE IS NO OTHER FORAGE CROP KNOWN THAT WILL RESIST DROUGHT LIKE SUDAN and it is therefore particularly adapted to semi-arid regions, yet it yields immense crops under irrigation and in rainy climates. In brief, Sudan irrigation and in rainy climates. In brief, Sudan solves the hay and pasturage problem for a very large section of the United States.

#### REED CANARY GRASS

Is one perennial grass that will thrive in marshy places, stand under water for weeks without injury, yield enormous tonnage of hay with a feed value equal to wheat bran. Until seed is more plentiful we suggest to seed alone after the land has been worked and weeds killed off, using four to six pounds per acre, any time before June 20th. Make your low land grow profitable crops.

#### ORCHARD GRASS

Orchard Grass is a top grass with thick, bushy, little spreading tufts. Reaches full development in the second or third year and lasts a number of years. It has quick and plentiful second growth and can be cut several times, the first cut before the bloom. When heavily gooded with other crosses. the bloom. When heavily seeded with other grasses gives good pasture and sends its roots deep into the soil. Grows quickly in the Spring and is especially adapted for alternate system of farming.

### Most Important Hay Crop TIMOTHY

Timothy is a top grass, persistent. Especially adapted to mountainous regions and does best on humus loams and clays, also on well drained swamp lands; does not do well on soil poor in lime or sour soil. It is a rough hay, nutritious

and tender when young, liked by all stock.

Cultural Conditions—Quite hardy, not sensitive to climate, roots penetrate deep, making it withstand drought fairly well. It is especially useful for how and pasture purposes and should be seeded. for hay and pasture purposes and should be seeded from 8 to 12 lbs. per acre.

#### ALSIKE CLOVER AND TIMOTHY MIXED

Where Alsike Clover and Timothy are grown together and the seed is saved therefrom, it is impossible in cleaning to make a complete separation of the two. For this reason we can sell it for less money than would be the case if a perfect separation could be made. Those desiring to sow Alsike and Timothy together can save considerable money by buying the seed of these two varieties together as originally harvested. This makes a splendid mixture for hay or pasture, with just enough Alsike Clover to make splendid hay for horses or dairy cows, carrying about 20 per cent of Clover.

#### CRESTED WHEAT GRASS

From its character and adaptation it is the most promising grass now available for pasture in the dry sections of our state and when cut at the proper stage the hay is of excellent quality. Like other crops, best yields are usually obtained on the fertile black soils, although it does well on sandy areas in the Northwest. We anticipate the seed will be much lower in price in a few years, as it is a heavy seed producer. Try it out on your soil in a limited way, seeding 10 to 15 lbs. per acre, seeded in rows 6 inches apart with grain drill.

#### Write for Free Pamphlet on This Grass

Orchard Grass

(The Most Profitable Crop Grown)

In proper proportions of adaptable grasses and clovers are becoming more and more important all over Montana and the Northwest.

They may be a selection of individually selected mixtures or they may be recommended mixtures (as suggested below) which have been consistently used and proven the best for many conditions.

In either case we can furnish the mixtures or the varieties for home mixing by the purchaser or if he has any special soil or climatic condition to combat we will, upon receiving proper information from him, offer advice and suggestions.

### Peerless Pasture Mixture

(Seed at the rate of 24 lbs. per acre)

A Mixture Which Has Given Wonderful Results

4 lbs. Brome Grass

3 dbs. Perennial Rye

4 lbs. Orchard Grass

Grass 3 lbs. Medium Red

3 lbs. Timothy

Clover 2 lbs. Alsike Clover

Grass

3 lbs. Kentucky Blue 2 lbs. Tall Meadow Oat Grass

## The Huntley Mixture

Recommended by the Federal Experiment Station at Huntley, Montana.

20% Brome Grass 20% Kentucky Blue 20% Meadow Fescue 10% Alsike Clover 10% White Dutch

Grass 20% Orchard Grass

Clover Can be seeded at the rate of 16 to 24 lbs. per acre. For the most part the heavy seeding is the

more practical. (Ask Us for Suggestions to Improve Your Native Pasture Lands)

#### Field Peas

(60 to 75 lbs. per acre in drills; 75 to 120 lbs. broadcast)

Peas are second only to Clover in their soil-enriching properties and can be grown under any conditions of soil or climate. There is always a ready market for Peas, or they can be profitably ground and fed to stock. The vines make rich, nutritious hay. If fed to milch cows, when in a green state, pods, vines and all, the flow of milk will be almost doubled. Peas are a paying crop and can be profitably planted in many ways and can be profitably planted in many ways.

They can be grown alone for fodder purposes and green manure but for a dairy feed it is far more profitable to mix them with oats, rye or barley. The best time to cut for hay is just when the grain is heading out. This hay is of the highest quality and extremely nutritious. Cattle, horses and sheep thrive on it and it will surprise you how much of it will be produced on a small acreage.

White Marrowfat-These large handsome Peas are equally as profitable to grow as a field crop and on account of their size are saleable at all times at the top of the market, as well as providing the table with extra good Peas during Summer. Very heavy yielder, producing from 30 to 40 bushels per acre; these Peas being softer than the Canada Pea, are preferred by hogs or stock.

Mixed Peas—Suitable for a crop for either hogging or sheeping off. An economical way to harvest this crop and a profitable one. There are usually two or more varieties in the mixture, too, near enough alike in size or shape to separate but just as good as the best stock from a feeding value standpoint.

Canada Peas-We recommend that oats or rye be sown with these as an aid in harvesting.

Austrian Winter Peas — These Peas, like Winter Vetches, must be sown in the early Spring in states where severe cold weather prevails or the crop will be lost. The crop is mainly used for forage either as hay or silage, although for some time a seed crop would be quite profitable. Seeding a combination crop of Oats and Peas, using 40 pounds of Oats and 70 pounds of Peas, gives a maximum yield for forage when drilled in. If the crop is saved for seed, cut when about 90% of the pods are ripe; if for fodder, cut earlier and cure rapidly. Try these out in a small way this season.

Spring Vetch

## Vetches

Like all leguminous crops, Vetch gathers nitrogen out of the air and deposits it in the tubercles on its roots. In order to carry out this process it is necessary that the seed be inoculated or the young plants will not grow as healthy and vigor. ous as otherwise. Although many of our customers report they are able to grow without inoculating, it seems that one is taking chances when inoculating can be done so easily with Stimugerm.

Winter Vetch—Known also as Sand or Hairy Vetch. Although called Winter this variety must be sown in Spring in Montana as it will not withstand our Winters; its advantage is that usually it produces a heavier tonnage per acre than the Spring Vetch. This variety requires a good soil, is frequently sown with oats or barley, with which it makes excellent feed.

Spring Vetch—This is a very valuable forage plant and is rapidly becoming popular each year as the farmers are learning more of its great value for forage and fertilizing purposes. It succeeds well on nearly all soils and thrives surprisingly on poor light land. It improves the soil, being a nitrogen gatherer. It belongs to the pea family, but the vines are much longer and the foliage is more abundant. May be sown with about half bushel of rye or oats for support. It grows rapidly and is particularly valuable in sections where clover does not thrive.

BAYER-SEMESAN CO'S. SEED DISINFECTANTS These Seed Disinfectants are the most efficient antiseptics for the control of seed, plant and soil diseases or fungus growths that science has yet developed and provide a safe and effective treatment for practically all common agricultural needs.

Ceresan for Cereals-Semesan Bel for Potatoes-Semesan Jr. for Seed Corn-Semesan for Vegetable Seed — Semesan for Flower Seed — Semesan for Brown Patch.

## Millets

- White Wonder—The most striking feature of White Wonder Millet is the size of the heads. The heads will run from eight up to eighteen inches and a single head will have as many as 15,000
- Golden or German—In the North, Millet is sown almost altogether for hay and for that purpose Southern grown seed is much the best. It grows taller than does that from Northern seed, and that means more hay. It is finer than that from the Northern seed, and that means better hay.
- Siberian or Kursk Millet—This variety was first introduced into the United States from Kursk, Russia, in 1898. Extensive experiments were conducted at both the South Dakota trial stations which domains the state of the superiority of this tions, which demonstrated the superiority of this new variety. As both a hay and seed producer it ranks very high. In dry seasons the weight and quality of the hay has been far ahead of Golden or Hungarian Millet.
- Hungarian—(Dark Seed)—Often called Hungarian Grass. Many regard this as being better even than Golden Millet as it is about one week earlier. and requires less moisture. The hay is fine and of excellent feeding value.
- Japanese—"Billion Dollar Grass" Entirely distinct from all other Millets. It grows from 6 to 9 feet high, stands up remarkably and yields enormous crops. When cured it makes good hay and in quality is superior to corn fodder. It is relished by all kinds of stock. Sow 10 lbs. in drills; 15 lbs. broadcast, to the acre.

### Proso Type Millets

- Tamboff or Turghai Proso We are exceedingly glad to be able to offer this very excellent variety of Proso. We believe it to be the heaviest yielder of any Proso, the earliest, and a tall growing, non-lodging variety as well. The seed is a rich, dark reddish brown in color, and of very beautiful appearance.
- Early Fortune or Red Proso—This red form of the Proso or Hog Millet type is in especial favor for mixture in poultry foods and many tons are imported every year for that purpose. One of the surest crops in the Northwest, and especially valuable as a grain crop for late planting.
- Hog or Broom Corn—This is grown for the same purpose for which other Millets are sown, but makes inferior hay unless cut very young. It yields enormously of seed, even 60 to 70 bushels to the acre, and this seed is very advantageously used for fattening swine and other stock, and is of special value for this purpose in sections where corn cannot be safely or cheaply grown.

## Field Beans

- Great Northern Navy-This variety seems to be especially adapted to Montana soil and climate, and is being grown in increasing quantity each season. In our opinion it leads all other varieties of Navy Beans—when the real test comes—at the table. Its flavor and tenderness as a baked Bean are par-excellence. Sow 16 to 24 lbs. to the acre.
- Small White Navy—The popular Bean a few years ago, which now seems to be coming back to its own, being of small size. Use only 10 to 12 lbs. per acre. Splendid cooker and yielder.
- Mexican Red or Chili A heavy yielder, hardy, drought resistant, and an excellent baking Bean. The seed is similar to the Great Northern in shape, but is red in color. Originally obtained from one of the Ft. Berthold tribes.
- Bush Lima—It is sometimes called Potato Bush Lima. The plants are vigorous and erect, bearing well above the ground. The pods, which are produced in large clusters, are medium green, about four and three-fourths inches long and about four and three-fourths inches long and each contains three to five large Beans of exceptionally fine quality. It is much more productive than Kumerle and matures earlier. Seed large, irregularly oval in shape, very thick, white with greenish tinge. This sort is popular for home and market use.

Succeed best in dry, sandy soil. A leguminous annual, the seeds of which are valuable for pigeons and are used largely for soups. The leafy stalks make good forage.

## Soy or Soja Beans

Valuable for silage, hay, for hogging off and as a soil improver. They resemble the Navy Bean in appearance but grow considerably taller. When planted with corn for silage the total yield per acre is increased and the feeding value of the silage improved. For hay they are valuable as an emergency leguminous crop where clover has been Winter killed: equal to clover in feeding value and Winter killed; equal to clover in feeding value and one of the best annual clover substitutes. clover they gather nitrogen from the air.

For hay, plant 60 to 90 lbs. per acre in rows 20 to 36 inches apart. Harvest when pods are well filled and leaves commence to fall.

- Wisconsin or Early Black Soy Beans-Be sure to get the genuine extra early variety. They grow from 18-30 inches high and mature in 65 to 70 days. They are one of the best yielders of Beans and best suited for hogging down.
- The Manchu—Is a good yielder and hence is popular with the farmers. The yield runs around 20 bushels to the acre and the oil content is from 18 to 24 per cent. In habit of growth the Manchu is low branching.
- Illini-A variety which has proven itself to be adapted to Montana soil and climate. Fields of large acreage sown in widely separated districts have given quite satisfactory returns.

### Sorghum or Sugar Cane

Sorghum-Minnesota Amber Cane-This is the type best suited for syrup. The early Amber is the most common variety of Cane grown. There are two ways of planting it: one is by broadcasting, sowing from one to two bushels per acre; the other is to drill with a corn planter and cultivate the same as you would corn.

Southern Amber Cane for Forage and Pasture— The Cane plant produces from three to eight tons per acre of cured forage and it will withstand drought and other unfavorable conditions that would mean death to any other crop.

#### The second of th Feterita

(3 to 4 lbs. per acre in drills)

Feterita—A wonderful grain which has attracted considerable attention in Kansas, Missouri and Oklahoma. It belongs to the Sorghum family.

## Root Crops for Stock Feeding

Klein's Wanzlebener Sugar Beet

See

Mangel Wurzel

Giant Half Sugar Beet

Stock Carrot

Ruta Baga

### Buckwheat

(35 to 40 lbs. to the acre)

Buckwheat, because of its rapid growth, is used in many places as a weed preventive and while more commonly grown for milling purposes it finds quite a common use in the Northwest as an added variety to grain mixtures for poultry feeding.

Kaffir Corn

Kaffir Corn—White Seeded — An excellent fodder plant, yielding two crops of fodder during the season. It grows 4 to 5 feet high, making a straight upright growth. The stem or stalk bears enormous wide leaves. The stalks are brittle and juicy, not hardening like other varieties of Sorghum. It makes excellent fodder, either green or dry, which is highly relished by cattle and all kinds of stock. The seed crop is also heavy, sometimes 50 to 60 bushels to the acre. For grain, sow in rows 3 feet apart, 3 to 5 lbs. to the acre. For fodder, sow 40 to 50 lbs. either broadcast or in drills.

#### Flax

Bison—The most outstanding wilt and rust resistant Flax ever developed. Never has a new variety met with such instant and widespread acceptance and popularity. A large kerneled variety developed by Professor Bolley from a sample of commercial Flax received from Ghent, Belgium, in 1910. This sample was planted in trial rows and single head selections were continued until the type became thoroughly fixed. By process of elimination the final strain selected produces unusually sturdy plants with stiff straw and generous root system able to withstand adverse weather conditions as well as attacks of insects and disease.

Reserve—This Flax has proven itself to be the best yielder of any straight variety at the Bozeman Experiment Station, giving an average yield over three years of 27.8 bushels per acre on irrigated land against the eight trials. Good results and yields are produced on irrigated land when sown with Spring Wheat or if sown alone on non-irrigated land following Sweet Clover, or a cultivated crop such as Corn, Beets, Potatoes.

Russian—The standard variety used in the North-west. It requires machinery to clean seed from any grain and this is especially true of Flax. Cleaning Flax so as to make it right for seed is a somewhat expensive operation and involves a very considerable waste. But write for sample, use the magnifying glass and compare it with Flax from the farm or elevator and judge for yourself if our seed is worth all it costs. Treat your Flax with Semesan before seeding and use clean, plump, healthy seed.

### Sunflower

(10 lbs. to the acre)

Sunflower is often used as a fodder crop but more particularly for silage. For those who feed ensilage or have silos, Sunflower is perhaps the most practical crop to grow where quick growth, early maturity, and large tonnage are factors.

Sunflower ensilage is practically equal to corn ensilage in food value, and the tonnage per acre is invariably much greater. Sow Sunflower seed at the rate of about 10 lbs. per acre, and in rows to permit frequent cultivation until plants are nearly 2 feet high. Mammoth Russian is the variety most in demand for feeding purposes.

#### Rape

(Sow 2 to 3 lbs. to the acre in drill; 5 lbs. broadcast)

Use of Dwarf Essex Rape—Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slough lands are excellent. This plant may be grown successfully in the following ways, viz.:

1. In the early Spring to provide pasture. 2. In June or July, on well prepared land, to provide pasture. 3. Along with grain, using 2 lbs. of seed an acre, to provide pasture for sheep after harvest.

4. Along with peas, oats, clover seed, to provide pasture and to get a catch of clover. 5. As a cover in the orchard for Winter protection to avoid root-killing. 6. In corn, sowing the seed with the last cultivation; the succulent feed produced may save the loss of cattle by cornstalk disease. Prevention is better than medicine in regard to this fatal disease. 7. Along with rye, sown in August, in sheep pasture. 8. On early plowed fields to shade the land and so that the soil will not bleach, wash or drift. 9. To plow under as a green crop, adding humus to the soil, an element needed in grain-growing sections. When rape is sown broadcast 5 lbs. of seed an acre will suffice. When sown in rows, say thirty inches apart and cultivated, from 2 to 3 lbs. per acre will be enough.

Shelby, Mont., Aug. 25, 1932.

State Nursery & Seed Co., Helena, Mont. Gentlemen:

I have had many comments on my Creeping Bent Lawn Grass which I planted last May. It has sure done fine. I have given it one feeding of good commercial fertilizer.

Yours very truly,
J. J. KRAUT.

Inspecting Our Fields of Grain Being Grown for Registered Stocks

## Registered Seed Grains

A real necessity under present conditions as quality in ordinary grain stocks has been lowered on account of low prices.

The varieties listed and described below are offered primarily for their following merits: Increased yields, early maturing, trueness to type, name and variety.

Pure foundation stocks to occasionally replace your old and perhaps degenerated or mixed stocks has the same importance in your grain production as does a good registered bull to the herd in your beef production.

The cost of seed stocks cannot and should not be based on the price per hundred pounds of seed but on price per acre. The average increase in yield per acre of good pure adapted seed has proven that the purchase even at premium prices is economical. The value of early maturity speaks for itself and under our varying freet free periods. for itself and under our varying frost-free periods in most sections of the state it is mighty good business to give that point its proper emphasis when selecting your seed.

## "Registered" Trebi Barley

A bearded six-rowed hulled variety which has proven to be the highest yielder under irrigated conditions. At Bozeman this Barley has consistently produced more feed grain per acre than any other variety or kind of crop grown. It is rapidly displacing all other Barley varieties in the irrigated all other Barley varieties in the irrigated sections of Montana and Idaho. It is a good performer under dry land conditions in the more favorable seasons. This Barley is a pedigreed selection made by the Minnesota station from stocks originating in Turkey.

## "Registered" Horn Barley

An outstanding bearded two-rowed hulled An outstanding bearded two-rowed nulled variety which has proven to be the best yielder under dry farmed conditions in Montana. At the Judith Basin Branch Station, Horn Barley has outyielded the best sixrowed variety by about 5 bushels per acre. It is the leading variety at the Havre station. This variety is a pedigreed selection made by the Minnesota Experiment Station from stocks of Austrian origin. It is taller than other varieties of the two-rowed class. than other varieties of the two-rowed class.

## "Registered" Victory Oats

This variety of Oats is the best for gen-This variety of Oats is the best for general conditions prevailing in Montana. It is outstanding in quality, having won World's Sweepstakes for seven consecutive years at the International Show. At the Bozeman Station it has outyielded the Swedish Select by 6 bushels per acre. Victory Oats were developed from a single plant of the Probstir variety by the Svalof (Sweden) Station.

## "Registered" Marquis Wheat (Wheeler 10B Strain)

Through careful tests and observations made by the Agronomy Department of the Montana Experiment Station, the 10B strain developed by the famous Canadian Wheat Breeder, Seager Wheeler, was selected as the outstanding strain. This strain is remarkably free from bearded mixtures which are so evident in the original stocks of Marquis. It can be expected to outyield the ordinary Marquis by two to four bushels per acre under average Montana conditions. under average Montana conditions.

Prevent Disease Losses by Using Du Bay

## Ceresan—for Seed Grazing

Why lose part of your grain crops through smuts and other diseases? Prevent them and protect your profits by treating all seed grains with Ceresan before sowing. Effective in controlling stinking smut and seed-borne flag smut of wheat; seedling blight of cereals caused by seed-borne scab; smuts of oats; covered smut and stripe of barley; kernel smuts of sorghums and millets; and seed-borne stem smut of rye. Seed may be treated in spare time. Ceresan is harmless to seed treated in spare time. Ceresan is harmless to seed and does not injure grain drills. Only 2 ounces needed per bushel of seed wheat, rye, sorghums or millets and 3 ounces for oats and barley. See Page 126 for price.

## Standard Seed Grains

Oats

The Sturdy, Robust, Heavy Yielding, Biggest Oat—"Corriente"

Novelty—"Corriente" Oats—A Big White Oat—Big "Corriente" Oats do not lodge under excess moisture conditions and can withstand drought and heat better than other types. Sow early for best results. They grow 3 to 4 feet high and have large heads frequently containing 75 to 110 kernels, all well filled. The large plump grains are nearly twice the size of Victory, Swedish Select or any of the standard varieties now grown. They are a Burbank production selected and improved from stock originally brought from Peru to America.

Victory—This variety is very highly recommended by the Montana Experiment Station because of its consistent high yield performance on both dry and irrigated land. It is the best dual adapted Oat, in respect to either dry or irrigated conditions, known.

Swedish Select—These originated in Sweden and for years have been one of the dependable standard varieties over the entire Northwest. Our stocks are selected from the best and purest obtainable, are of exceptional quality, thoroughly recleaned and graded.

Montana White

Montana White—A large, plump, early maturing, very good yielding, White Oats of splendid appearance and grade. A sample will convince you of their quality.

Markton—The dry land farmer's friend. This Oat is a distinct improvement on the old 60-day Oat of a dozen years ago, being heavier, a better yielder and producing more straw. First time for years we have a good tonnage to offer of Markton Oats weighing 43 lbs. per bushel. They were grown from registered stock too

were grown from registered stock, too.

Gopher—The wonder Oat. Sounds like a fish story when we say our grower, Mr. Huhnerkoch, produced one thousand twenty-three bushels weighing 43 lbs. per bushel on eleven acres or 93 bushels per acre on good Summer fallowed bottom land without irrigation. It makes a very stiff straw 2½ to 3 feet and a good, compact head of heavy grain. Very early and at the same time very heavy yielding. A product of the Minnesota Experiment Station.

#### PREPARE NOW FOR SPRING

The demand for good seeds is insistent. The Department of Agriculture, Washington, and State Experiment Stations, are of constant benefit to farmers. Watch them—they will advise well. They consistently advocate good seeds of known origin. Our business is to supply the best. WE DO. The accumulated endeavor of years, as represented in our business, is at your service. Thousands of customers year in and year out can testify to our high grade seeds and to our service.

#### Spring Wheat

We want to especially call your attention to the fact that the Spring Wheat varieties offered below are something superior to the ordinary standard varieties commonly offered.

Marquis—Our Marquis seed offered is grown from the pure 10B strain which has proven itself to be the highest yielding, earliest maturing strain of Marquis for Montana Hard Spring Wheat sections. Chief characteristics are that it is beardless, good straw, fine milling qualities and highest yielding and earlier maturing than ordinary Marquis. Our seed was grown from pedigreed stock.

Federation—In sections of the Northwest where White Spring Wheat is used we strongly recommend Federation. It has a medium short strong straw, is a good stooler and beardless. H. L. Cram, our grower, who has produced Federation seed for several years and was formerly a producer of Club Wheat, says that it averages ten days earlier than Club Wheat, yields as heavily and requires less water.

soft Spring Wheat—Strong straw and heavy yielding variety, particularly well adapted to most of the irrigated districts of the Northwest. Absolutely pure Soft Spring is practically impossible to obtain but our stock has an exceptionally low percentage of other wheat.

Dicklow Wheat—The heaviest yielding variety of all Soft Spring Wheats under irrigation. It is a selection by Richard Low from other Club Wheat varieties in Utah. Because of its quality and yields it attracted much attention and there was soon a large demand for Dick Low's Wheat. Our seed stock was grown in the Helena Valley and yielded nearly 70 bushels per acre.

#### Winter Wheat

Before seeding time write us for recommendations on new adapted varieties, treatment recommendations, and prices.

#### NEW IMPROVED CERESAN FOR WHEAT

Because of the low cost of application and its effectiveness, this new product will meet the farmers' demands for reduced cost of seed treatment in a dust disinfectant for wheat. A single pound of NEW IMPROVED Ceresan will treat 32 bushels of wheat or 4 times more than the old product. Think of it—just ½-oz. to a bushel of seed and a cost of only 1% to 2½ cents a bushel, less even than the low cost of dusts at present on the market. The ease of application also has been improved as this new product may be applied by the shovel method.

A Price, 1 lb., 75c; 5 lbs., \$3.00. Postage extra.

USE THE EASY CERESAN DUST TREATMENT

Disinfection of Seeds—Before planting, to combat many destructive seed-borne fungi and protect against certain harmful soilborne organisms, has become the standard practice of progressive farmers throughout the country.

The Grain Farmer, however, has in the past been handicapped in his efforts to control many of the important grain diseases because the treatments available to him have been far from adequate for the purpose.

For Wheat—Ceresan is very effective in the control of bunt of stinking smut and is recommended for the control of seed-borne flag smut. Ceresan is a very fine, gray dust, the chemical constituents of which do not cause corrosion of metals. Therefore Ceresan should not clog the drill nor cause injury to its metal parts as is the tendency of some dust disinfectants.

on Oats—Excellent control of loose and covered smuts may generally be obtained by seed treatment with Ceresan. Ceresan is much easier to apply than the old liquid treatments and has no injurious effect.

#### Small Grains

Barley-Faust's Blue Hulless and Beardless

#### Spring Rye

PROLIFIC — This outstanding variety of Spring Rye is very appealing on account of its attractive appearance and size of the kernel. Our crop averaged 40 bushels per acre in the rather unfavorable season of 1931, which we consider was excellent.

If your seed is running out or you wish to get a new start try Prolific; it's worth while.

spring Rye—True stock. Spring Rye makes an excellent crop where Winter grain has been killed out, or for sowing where a Fall crop has not been planted. For the dry farmer needing a sure crop of hay, Rye can be depended on to produce a good tonnage of excellent hay. Does not grow quite so large straw as Winter Rye, but usually yields well and grain is of fine quality. We call particular attention to the fact that we offer genuine Spring Rye.

#### Fall Rye for Spring Use

Fall Rye planted in the Spring on either dry or irrigated land for pasture purposes gives surpris-ingly satisfactory results. The stooling charac-teristics emphasized by the Spring conditions makes an early abundant pasture.

FALL RYE—Amber—Winter Rye is much hardier than wheat and can be grown in a greater variety of soils. It will thrive in dry seasons and on light sandy loam. It is grown for grain fodder, soiling purposes and green manure. Sow Aug. 20th to Sept. 15th—1¼ bu. per acre if for grain, and 1½ to 2 bu. per acre for Fall pasture. If drilled 2 to 2¼ in deep there will be less danger of Winter killing. Our seed is selected, graded, and thoroughly cleaned. graded, and thoroughly cleaned.

FALL RYE—Rosen—Rye cross-breeds like corn. In this respect it differs from wheat, which will not cross-fertilize if two or more kinds are grown together for years. To keep a Rye pure, it should be grown away from a common crop, like you must grow yellow corn distant from white corn.

Farmers who have grown Rye know that 15 to 20 bushels per acre is about what they can expect. Such farmers, who changed to the Rosen Rye, are now getting 25 to 30 bushels, and 40 to 50 bushel yields are not very uncommon.

#### SAMPLES

We are always ready and willing to send samples of all grass and field seeds for your inspection. Don't hesitate to write and request samples in these lines at any time. We want you to know just what our seeds are before you buy and we will ship exactly the quality we furnish as sample. 

### Seed Barley

WHITE HULLESS OR BALD

BEARDLESS—A very early, sixrow Barley without beards and which threshes out of the straw like wheat. Very useful for hogging off, due to the lack of beards. Under favorable conditions White Hulless will do well on dry land and will produce a feed practically equal to corn.

FAUST'S BLUE HULLESS AND BEARDLESS BARLEY - Is the latest improved strain of the Blue Hulless varieties. Besides the added characteristic of being beardless it has proven itself to be far the highest yielding of all Hulless types. The feed value of this variety is the highest of all Barleys and 35 to 40 bushel yields are very common.

#### Bearded Barleys ARE NOW MUCH SOUGHT FOR

TREBI-A 6-row introduction especially suited for irrigated lands. Bozeman reports their average for the two past seasons as 95 bush-els per acre. Trebi requires less

time to mature than Chevalier.

The straw is of medium height, and fairly stiff, so that it is less likely to lodge than other varieties. Recommended principally for irrigated land.

HORN BARLEY - An outstanding bearded tworowed Hulled variety which has proven to be the best yielder under dry farmed conditions in Montana. At the Judith Basin Branch Station, Horn Barley has outyielded the best six-rowed variety by about 5 bushels per acre. This variety is a pedigreed selection made by the Minnesota Experiment Station from stocks of Austrian origin. It is taller than other varieties of the two-rowed class the two-rowed class.

HANNCHEN-Two Row, has for years been known as one of the best and most consistent yielders of the two-row type. It is generally so well known that no detailed review of its performance or characteristics is needed. It ranks high as a dry land crop.

#### Seed Speltz

SPRING SPELTZ OR EMMER is very similar to Barley in appearance and growth, and is especially adapted to the semi-arid districts of the cially adapted to the semi-arid districts of the Northwest and can be relied upon to produce a fair crop even under the most adverse conditions. It produces heavy yields of grain, and straw which is equal in value to oat straw. Its extreme hardiness and drought resisting qualities, together with yielding qualities that surpass any other cereal, make it a grain of the utmost importance to the farmers in the North and Northwest and Northwest.

Our seed stock has been bred up from the most hardy, high yielding strains, and has been carefully recleaned and graded and we believe that we are in a position to furnish you with the best that can be produced, and we know that it will prove to be the cheapest and best feed which you have ever grown upon your farm.

Grains of Hulless and Beardless Barley

## State Nursery and Seed Company's Seed Corn

HIGHLY YIELDING—DEPENDABLE SELECTED—HARDY ADAPTED STRAINS

NONE BETTER

GOOD GERMINATION 90% OR BETTER

We have taken special care and have spared neither time nor effort in the selection of our Seed Corn stocks. Our representative makes personal inspection and investigations and obtains the cooperation of the county agent for recommendations and history of approved Secd Corn stocks.

We pay particular attention to selecting the earliest strains of each variety offered. Especial emphasis is given to type, yield and germination.

We thus reduce your risk, increase your yields and for ourselves obtain a booster and a customer for years to follow. The benefit becomes mutual.

#### Dent Corn

NORTHWESTERN DENT—Northwestern Dent is generally conceded to be the most popular variety in the semi-dent class. It is not only early maturing but is an excellent yielder in grain production or from a silage standpoint in tonnage per acre; under average conditions it will mature in from 85 to 100 days.

MINNESOTA 23—Minnesota 23 is a white capped yellow dent. Our stocks have been produced from the popular certified Coleman early and Typy strain. It is one of the very earliest of the semi-dent group, maturing in from 85 to 95 days. It is not show that the contract of the semi-dent group, maturing agree at a convenient height for the hering, carries ears at a convenient height for the harvesting and is a good yielder. Fast gaining over the other semi-dents in popularity.

PIONEER WHITE DENT, or RUSTLERS WHITE DENT—This is now recognized under the general name of Pioneer White Dent and is the earliest of the true dent varieties, maturing in from 85 to 95 days under average Montana conditions. It is not only a dependable grain producer but also a fair silage producer if desired for that purpose.

MINNESOTA 13-Minnesota 13 has rightfully earned its high rank as a Montana Corn. It yields well and matures early, although not quite as early as the other dents or semi-dents mentioned, its average being from 90 to 105 days, which makes it safe as a Montana Corn under anything like normal years. The strain we offer has been a remarkable yielder and for the past seven years has matured at an altitude over 3,400 feet.

FALCONER — Every year this wonderful semi-dent proves more and more its very great value to the Northwest. Acclimated by nearly forty years of growing, and carefully selected, it improves each year. It is earlier than any of the dents, and heavier, being a descendant from the original native Indian Corn, and it has consistently outyielded all other sorts year in and year out with us. The color is a somewhat uneven yellow, rows eight to twelve, and ears very large. It grows tall enough on the stalk to be handled with a corn binder.

GEHU—The best known of our native early flints; might well be called the Universal Corn. It has been carefully bred by us for nearly forty years and shows the effect of this breeding. Its feeding qualities are the highest of any variety of Corn; it is leafy and produces a tremendous amount of excellent fodder, since there is no heavy stalk and every part of the plant is utilized. It is drought, frost and hail resistant to a wonderful extent in addition to its great earliness. In good soil and under favorable conditions it may be cut with a corn binder.

NORTH DAKOTA WHITE FLINT-North Dakota White Flint is one of the earliest of the standard from 4 to 5 feet and matures in about 80 days. is especially adapted to early hogging down as the ears grow close to the ground.

THE ORIGINAL DAKOTA SQUAW OR RAINBOW FLINT-This is a mixed form of the early flint and is the first variety listed by us after our business was started. It has retained its popularity through all the years since, on account of its extreme earliness and its unusual hardiness. It is very resistant to both drought and frost and fully as heavy a yielder as any variety of early flint. It is a flint Corn of mixed colors, yellow, white, blue and red predominating; ears long and slender, mostly eight

SEMESAN JR. — This modified form of the patent product, Semesan, is exclusively a dust disinfectant used principally for the ear, root and stalk rots of field and sweet Corn but also for the treatment of cereal infections. Under Government-conducted field tests, Semesan Jr. increased the crop yields from diseased field Corn seeds by approximately twenty bushels to the acre and from similarly diseased Sweet Corn by as much as 47.7% with an average of pracitcally 12%.

## SEED POTATOES

Potato Novelty-White Gold

## Early White Gold

Outstanding feature is its earliness. Here is a Potato of good size and appearance. A good yielder and ten days earlier than Cobbler, Early Ohio or Triumph. At the State Fair and numerous County Fairs this new variety carried off highest honors. It is an ideal Potato for the home and ranch garden. See illustration. As our supply of this new den. See illustration. As our supply of this new variety is limited, place orders early with part remittance if convenient, balance when you desire shipment made.

### Leggerini's Early Italian

From a half dozen Seed Potatoes brought from Italy, our grower, Mr. Leggerini, in the past five years has produced and increased his acreage until this year we have a limited amount of this exceptional early Potato to offer.

The Leggerini Early Italian in type is similar to the Early Ohio, although varying slightly in some characteristics. In the five years produced here it has proven itself to be exceptionally early, is light in color and the meat white throughout. For the past four years we have had an opportunity to study this Potato and from the standpoint of early maturity, yield and keeping qualities, we know of no early Potato that it is equal.

### Early Triumph

#### THE MOST POPULAR EXTRA EARLY

The Early Triumph is a roundish, red Potato, somewhat earlier than the Early Ohio and a very good yielder on good soil with fair moisture con-

ditions. It is a great favorite at the present time, and many carloads of seed from our state are shipped south where they are used to produce the early crop for the large markets.

## Early Ohio

The Early Ohio Potato is so generally known that it requires no extended description. It is more popular than any other early variety, as shown by the greater number of sales for seed stock.

#### Irish Cobbler

An excellent early variety of a roundish type with a creamy white skin. A fine yielder and a sturdy, vigorous grower.

Extra fine quality for family use in Fall and early Winter and in our estimation the best main crop, round white variety grown.

#### Netted Gem

Sometimes called the Russet Burbank. A splendid main crop late Potato with brownish russet skin, flesh with yellow eyes, rather long shape. Netted Gem is an excellent yielder, very regular in size, and is unsurpassed as a baking Potato. The tubers present an excellent appearance and are splendid shippers ance, and are splendid shippers.

SHIPPING NOTICE—Owing to the uncertainty and danger of freezing when shipping by parcel post, we request that shipments be ordered by express or freight when possible. Otherwise for our customers' protection we may be forced to delay delivery for favorable weather.

## New Katahdin Potato

This is a new Potato of merit originated by the United States Department of Agriculture. It is a white Potato, not quite as early as the Cobbler and much smoother, having fewer eyes than most other Potatoes, giving it an exceptional character from the paring standpoint. This variety has been a feature at many horticultural exhibits throughout the country.

Note the great improvement in stand and vigor of growth of the Semesan Belitreated plants at left.

Ask for pamphlet on New Improved Dubay Semesan Bel Potato Treatment. treats 70 to 80 bushels of Potatoes.

Early Italian Type

## State Nursery & Seed Company's Peerless Poultry and Dairy Foods Contain Concentrates and Minerals

Roy Millegan Telling His Flock They Have Ended Depression for Him

#### PEERLESS HEN SCRATCH FEED

A combination of seven varieties of grain in the proper proportions to make a well balanced ration. A scratch food is most necessary to encourage exercise but to enable the hen to make the best and most economical use of her scratch it should be accompanied by a good laying mash such as Peerless.

## PEERLESS DEVELOPER SCRATCH For Chicks from 8 Weeks to Maturity

A combination of the best grade of carefully cleaned grains prepared for growing birds from about eight weeks old to maturity. It is always advisable to feed a mash with a scratch food and we recommend either Peerless or Pratt's Growing Mash.

## PEERLESS GROWING RATION SCRATCH FEED

#### For Chicks from 3 to 7 Weeks Old

Similar to little chick scratch but a size larger. As a chick develops in size the size of the scratch requirements naturally increases.

## PEERLESS LITTLE CHICK SCRATCH FEED

For Chicks from 1 to 3 Weeks Old

A good clean wholesome ration of finely milled grains, attractive and appetizing, the necessary factors to stimulate and encourage exercise. We recommend starting baby chicks on Peerless Buttermilk Baby Chick Mash and after one week of age adding the little chick scratch to the daily ration.

#### PEERLESS CHICK STARTING MASH

Peerless Chick Starter is a trouble preventer; not a trouble shooter. It will not cure them after they are sick but will keep them from getting sick.

Liquid milk causes more trouble than any other one feed, yet they must have mlik. The dishes must be scalded every day. The milk must be the same temperature, the same quality. If it is fed sweet it must be kept sweet. If it is fed sour it must be the same all the time. Any variation will cause bowel trouble. Avoid all this trouble by feeding the milk dry in a mash.

Peerless Chick Starter contains enough milk for the chicks without feeding any in liquid form.

Peerless Chick Starter contains all the essential feeds necessary for the chick, when fed with a good grade of chick scratch. It contains all the vitamins, proteins, carbohydrates and fat needed. It is low in fibre.

#### PEERLESS GROWING MASH

We recommend the tapering off from chick mash to growing mash at the age of six weeks. Probably the most safe and satisfactory way is to increase the growing mash and decrease the chick mash about 10% per day until the change is completed. Peerless Growing Mash is made to build muscle, bone and feathers. Every ingredient is included in the right proportion and is pure, clean and wholesome.

#### PEERLESS FATTENING MASH

A good fattening food contains a high percentage of nitrogen—free extract (the starches and sugar in feed) which is the real fattening material.

In preparing our Peerless Fattening Mash we have taken special care to use only the ingredients that are palatable and easily digested.

dients that are palatable and easily digested.

For quick results it is necessary that the fowls eat and digest the largest quantity of the proper food.

#### PEERLESS EGG MASH

Properly balanced for egg production and containing the proper amount of cod liver oil. We guarantee its satisfaction and comparative food value with any mash on the market. The value of our mash rests in its highly concentrated food value. Being relatively rich in proteins compared with other forms of feed, it supplies those elements entering into the manufacture of eggs and the building of bone, flesh, feathers and nerves. These last are, of course, all vital to economical production. The results of our increasing sales tell the story of satisfied customers.

## USE MONTANA MADE FEEDS—THERE ARE NONE BETTER

Peerless Feeds are made of the finest and cleanest ingredients obtainable. Our feeds contain no screenings; we use only ingredients that come up to a high standard in all scratch and mashes sold.

With the price of eggs higher this Winter, be sure and keep your pullets on Peerless Growing Mash, adding Peerless Laying Mash when they start laying for maximum profits.

Our dairy feeds are properly balanced, made of recleaned ground grains, molasses, linseed meal, cottonseed meal, gluten and minerals. This feed is a real milk producer, also keeps your cows in good condition.

Our feed department is ready at all times to help you with your poultry and dairy problems.

#### WRITE FOR OUR POULTRY FEED AND SUPPLY CATALOG

This publication is issued by us several times during the year and your name on our mailing list will place each issue in your hands. Do not delay; write in and get your name on this special list today.

Home grown feeds need the addition of concentrates and minerals for satisfactory results. We use Montana ingredients wherever possible.

## Pratts POULTRY AND ANIMAL REMEDIES

We Recommend Them as the Best that Money Can Buy. Try Them.

#### PRATT'S POULTRY REGULATOR

A perfect, natural food for laying hens. Makes more eggs from the same feed and keeps layers in the pink of condition through even the heavy production strain. Its mineral and vegetable tonic content is not found in foods, not they are necessary. in feeds, yet they are necessary for heaviest egg production. Contains all the necessary elements in accurate and scientific proportions that hens need for egg making. Builds vitality and stimulates egg production. Used by the most successful poultry as

by the most successful poultry raisers everywhere. Perfectly pure and free from harmful substance.

Price, 4 lbs., 60c, postpaid, 75c; 12-lb. sack, \$1.75, postpaid, \$2.06. By express or freight, 25-lb. sack, \$3.00; 100-lb. sack, \$10.50.

#### PRATT'S N-K CAPSULES (Poultry Worm Capsules)

Pratt's N-K Capsules (Nicotine and Kamala) can't fail to get the worms. Each tablet consists of the proper dose of nicotine and kamala encased in a special airtight coating. Authorities are agreed that these ingredients are the most effective known and will give positive results.

There is no simpler, safer, surer or more practical way to treat a bird for worms than by the use of Pratt's N-K Capsules. The advantages of individual treatment of poultry for worms lie in the fact that this method permits giving each fowl a definite, positive and proper dose. The results are sure and prompt.

Adult size, 50 capsules, \$1.00, postpaid, \$1.05; 100 capsules, \$1.75, postpaid, \$1.84; 500 capsules, \$7.00,

Chick size, 50 capsules, 65c, postpaid, 68c; 100 capsules, \$1.00, postpaid, \$1.05; 500 capsules, \$4.50, postpaid, \$4.69; 1,000 capsules, \$8.00, postpaid, \$8.31.

### PRATT'S S-H (Sodium Hypochlorite Solution)

(Not a Poison) (13)

Stops the spread of infectious poultry diseases such as Bacillary White Diarrhea, Coccidiosis, Roup, Fowl Cholera and others. Pratt's S-H (So-dium Hypochlorite Solution) is instant death to disease germs.

Give it to the flock in their drinking water. Use it to disinfect eggs to be hatched, brooders, incubators, etc. Valuable in treating many diseases. Full instructions with every package.

S-H also has many uses on dairy farms, commercial plants making dairy products, institutions, household, and fox and rabbit farms.

Prices—10-oz. bottle, 50c, postpaid, 63c; quart, 90c, postpaid, \$1.07; by express or freight, gal., \$2.00; 5 gals., \$8.50.

#### PRATT'S DISINFECTANT

A standard coal-tar solution four times stronger than carbolic acid as a germ killer. A quick, effective germicide, insecticide, and deodorant. Effective in stables, barns, poultry houses and yards and for pets. Its pleasing, clean odor makes it admirable for household use. Considered the best disinfectant on the market today. Price, quart, 65c, postpaid, 82c; ½-gal., \$1.00; gal., \$1.75. By express or freight.

PRATT'S BAG OINTMENT

The New Improved Bag Ointment - Relieves milking trouble due to caked bag, sore teats, bunches and inflammation. Penetrating, soothing. Large can, 60c, postpaid, 71c.

#### PRATT'S R-P TABLETS (Formerly Called Roup Tablets)

A wonderful remedy used in every civilized country because it cures. For fowls that sneeze, gasp and wheeze, also for those having a watery discharge from the nostrils and eyes. Prevents colds. Excellent for turkeys.

In powder or tablet form. State which.

Price, 30c, postpaid, 33c; medium size, 60c, postpaid, 66c; large size, \$1.20, postpaid, \$1.30.

### PRATT'S CHICK TABLETS

#### (Formerly Called Diarrhea Tablets)

"The Baby Chick Life Saver." Pratt's Chick Tablets in the drinking water kills the specific organism which causes white diarrhea and saves the hatch. Use as a preventive when hens are laying, because it will prevent this deadly organism from developing in the egg. Price, 30c, postpaid, 32c; large size, 60c, postpaid, 63c.

## PRATT'S FLY CHASER

Why let your animals suffer needless torment from flies? Food energy used to fight flies is wasted as far as milk production is concerned. Horses, too, will do more work when relieved from fighting flies. Fly Chaser does not injure hair or animal when used as directed. Fly Chaser should be used in every stable, and every barn.

#### PRATT'S POULTRY WORM POWDER

This is the product to use for worming an entire flock at one Pratt's Poultry Powder gets Round Worms, Tape Worms, and other Intestinal Worms of poultry and turkeys. One chicken saved will pay for sufficient powder to treat a large flock. Powerful, efficient, easy to use. Blackhead is usually caused from worms.

Price, 2-lb. pkg., 60c, postpaid, 73c; 4½ lbs., \$1.20, postpaid, \$1.37; 12-lb. sack, \$2.20, postpaid, \$2.51; by express or freight, 25-lb. sack, \$3.85; 100-lb. sack, \$12.25 \$13.25.

#### PRATT'S LICE KILLER POWDER

The world's champion lice killer for poultry, hogs, cattle, rabbits and pets.

1.

Price-14-oz., 30c. postpaid, 41c; 2 lbs., 60c, postpaid, 73c.

### PRATT'S CALF MEAL

#### IT MAKES THEM GROW—SAVES MILK SAVES MONEY

No dairyman will dispute the value of skim milk as a feed for calves, but in separating the milk you take out some most vital elements that nature intended the calf should have. The milk is robbed of life and health-giving vitamins that are very necessary to the healthful and profitable development of the calf.

Pratt's Calf Meal is a scientific preparation that supplies these necessary food properties at a very reasonable cost, enabling you to sell your milk or cream and still have vigorous, rapidly-maturing calves that later make profitable producers. It supplies bone, muscle and tissue-building elements.

It is mighty important for the calf raiser to develop his calves just as economically as possible. Every dollar saved in raising them is a dollar earned. Therefore, you will readily see that it pays to feed Pratt's Calf Meal because you can use it at less than half the cost of using milk. Pratt's is a milk substitute of highest quality, which calf-raisers have used for years. It raises

real calves at a real money saving.

If used according to directions, Pratt's Buttermilk Calf Meal will be found to be the best milk substitute you can procure for your calves. Feed-

ing directions in every sack.
25 lbs., \$1.15; 100 lbs., \$4.20—F. O. B. Helena.

#### PRATT'S CHICK SCRATCH FEED "For Chicks 4 Weeks Old to 6 Weeks"

Pronounced by authorities everywhere to be the finest, cleanest, purest, most economical and highest quality chick scratch ever offered to the pub-

with the mash feed.

## Conkeys Y-0

#### Dry Powder Form of Yeast with Cod Liver Oil (Rich in Vitains A, B and D)

There is nothing finer than Conkey's Y-O to mix in with poultry mashes. Its use at every stage of growth is urged because of the great benefit. 1% in baby chick mashes serves as a prevention of leg weakness. Absolutely indispensable in raising chicks in backward season with little or no sunshine, as it is rich in Vitamins A and D (the "sunlight vitamins"). In addition, the B vitamin in Y-O insures complete, rapid development, giving birds capacity and stamina for future progiving birds capacity and stamina for future progiving birds capacity and stamina for future production. Wonderful for growing stock. Absolutely necessary for continued heavy egg production as it replaces the vitamins used up in forming rich egg yolks. Hens won't break down as layers if given 2%-3% of Y-O with mash feed. For breeding stock it's wonderful, as it improves quality of the eggs, fertility and hatchability. Stop low hatches and high chick mortality by mixing Y-O with the mash feed

#### NEW LOW PRICES

Due to the increasing volume of Y-O business and economy in manufacturing you get this saving.

Price—1 lb., 55c, postpaid, 66c; 2 lbs., \$1.00, postpaid, \$1.13; 5 lbs., \$1.85, postpaid, \$2.05.

By express or freight, 25 lbs., \$7.50; 50 lbs., \$14.00; 100 lbs., \$22.50.

#### LEE'S GERMOZONE

A tonic; a bowel regulator; a system builder. The best preventive and cure for Roup, Cholera, Bowel Complaint and most poultry diseases. In more general use today than any other poultry remedy. Given twice a week in the drinking water to all fowls. It keeps them in prime condition. No poultryman should be without Germozone. Put up in tablets. Price, 25c, postpaid, 27c; large gize up in tablets. Price, 25c, postpaid, 27c; large size, 75c, postpaid, 78c.

#### NOPCO COD LIVER OIL

#### Famous Poultry Farms and Hatcheries Use and Recommend Nopco Cod Liver Oil

The antirachitic element is extracted from pure cod liver oil. Then the extracted concentrate is biologically tested and is used to increase the Vitamin D potency of other lots of pure cod liver oil. The resultant products—Nopco X or Nopco XX—are then tested and proved in the laboratory, first on white rats for Vitamins A and D and then on chicks for Vitamin D. Per gal., \$3.60.

## Black Leaf 40 Kills Poultry Lice

Individual handling of the birds, as is necessary when using powders, ointments, or dips, requires tedious labor and usually interferes with egg production. The "Black Leaf 40" method does away with all handling of the birds and does not interfere with egg production. "IT WORKS WHILE THEY SLEEP."

When chickens perch upon roosts that have been "painted" with "Black Leaf 40" the heat from their bodies causes a slow release of fumes which penetrate the feathers and kill the lice, with no discomfort. to the birds. The process goes on during the night, as the birds are sleeping, and furnishes the most desirable form of poultry lice control ever known. Bergins of the second of the latest

Disinfects and Paints at the Same Time—Saving Labor and Money

A white paint and disinfectant in dry powder form. Use instead of whitewash. Put on with a brush or sprayer. A snow-white cold water paint that will not blister, flake or peel off; 20 times stronger than carbolic acid; not poisonous. For use in chicken coops, dairies, hog pens, creameries, cellars, outbuildings, etc. Carbola can be applied to wood, brick, stone, cement, plaster, board, tar paper, etc. Has a greater fire resistance than asbestos. Several coatings of Carbola will act as an efficient fire retardant.

A gallon (a pound of powder) covers 200 square feet.

For use out of doors add a pound of cheap glue dissolved in hot water for every 10 pounds of Carbola.

Carbola is used and endorsed by thousands of poultrymen, dairymen and breeders, and by agricultural colleges and experiment stations. Give Carbola a trial—you never will regret it. Full directions on every package.

- 5. Testicle-removing forceps.

Full directions with every set. Per set, \$2.95, postpaid, \$3.05.

## POULTRY SUPPLIES

#### LITTLE PUTNAM STOVE

The Little Putnam Stove is used under the drinking fountains to keep the water from freezing.

The oil tank holds three pints of oil and burns three to four weeks without refilling. The wick never needs trimming. This Stove is absolutely fireproof and non-explosive.

It is absolutely essential that a con-

frozen water be accessible to the fowls at all times to keep them at the top notch of health and productiveness.

This Stove really costs nothing because the increased production of eggs during the first month's use will pay for the Stove. Full directions, etc., with every Stove.

Price, \$1.90, postpaid, \$2.00.

Price of parts of Putnam Stove: Wick holder, 10c each; wicks, 20c dozen; tank, \$1.00; burner, 60c; top, 60c, postpaid.

#### PUTNAM BROODER-HEATER

This Heater is so constructed that it carries the foul air out and draws the fresh air in, thus providing perfect ventilation. Heat is radiated onto the backs of chicks,

giving the natural effect of the hen, without the lice. Every Brooder Heater is accompanied by directions for building the home - made Brooder. At no price, high or low, can a Brooder be bought so economical and easy to operate. Consumes less than a

This fire-safe Putnam gallon of oil a month. Brooder-Heater requires tending only once a week and can be relied upon to deliver a regular supply of heat.

This Brooder will accommodate from 30 to 50 chicks.

Brooder-Heater price, \$4.65 complete, postpaid,

Price of parts of Putnam Brooder-Heater: Top, \$2.50; tank, \$1.50; burner, \$1.25; wick holder, 20c; wicks, 40c per dozen, postpaid.

#### AUTOMATIC CHICK GREASER Every Chick His Own Doctor

It is the large lice which collect on the heads of young chickens them to which cause droop and die. Formerly, the only way to get rid of these lice was to catch each chick and rub grease on its head, but this slow and teal-

ous process is not necessary since the invention of the Automatic Chick Greaser.

The wick around the upper part of the Greaser is saturated with oil (a mixture of two-thirds lard and one-third kerosene or black oil) and every chick which eats out of the pan will get its head thoroughly greased in a very few minutes. This apparatus saves much time and trouble and adds considerable to the profits. Price, \$1.50, postpaid, \$1.60.

## EGG TESTER

To test the fertility of eggs during the period of incubation. Used with an ordinary lamp in a dark room.

It will illuminate the interior of the egg and show if the chick is alive, and also show the size of air cell in the egg.

Price, 25c, postpaid, 35c.

ROGERS' POULTRY PUNCH

It is strongly made and is absolutely guaranteed to give satisfaction or your money refunded.

Price, 40c, postpaid, 42c.

#### S. N. & S. CO'S. POULTRY PUNCH

One of the most convenient Punches made. It is small and easy to operate, cutting a clean hole every time. Nickel plated.

Price, 25c, postpaid, 27c.

#### CHINA NEST EGGS

They induce the hen to lay where she should. With these there is no danger of getting stale eggs mixed with the fresh ones, or the hens acquiring the habit of egg eating. They are extra heavy and will not easily break.

for 20c, postpaid, 29c; 12 for 35c, postpaid, 46c.

#### LIME NEST EGGS Strong—Durable—Cheap

The Lime Nest Egg has been used by poultry raisers for many years to aid in keeping the nests in a clean and healthy condition. This egg has a smooth appearance; color, size and shape are almost an exact duplicate of a real chicken eg

break. 6 for 30c, postpaid, 39c; 12 for 50c, postpaid, 61c.

## RELIABLE EGG GRADING SCALE

Reliable Egg Grading Scale is less expensive than the Mascot. The beam is graduated and embossed with large size figures that are easy to read, covering all grades from 16% to 32% per dozen. The scale is mounted on a wooden base made to fit across the top of an open egg case. Price, \$1.90, postpaid, \$2.00.

Parcel Post charges where named are for shipment up to and including the third zone; for other zones, please add additional postage.

## SEED DISINFECTANTS

Increase Farm Products by Lowering Production Costs

#### Ceresan for Seed Grains

Lower your grain production costs per acre enlarge your profits—by increasing your yield with Ceresan. Treat all seed grain with Ceresan prevent stinking smut and seed-borne flag smut of wheat; seedling blight of ce-reals caused by seedborne scab; smuts of oats; covered smut and stripe of barley; kernel smuts of sorghums and millets; seed-borne stem smut of rye. Typical of increased yields are those recorded by the Illinois Experiment Station. Ceresan increased oat yields on an average 12.1 bushels per acre

over untreated seed, wheat yields an average of 9 bushels per acre over untreated seed. Ceresan is harmless to seed and does not injure grain drills. Only 2 ounces needed per bushel of seed wheat, rye, sorghums, or millets and 3 ounces for oats and barley.

#### Semesan Jr. for Field and Sweet Corn

Three bushels more corn can reasonably be expected by any farmer who treats seed corn before planting, Illinois Experiment Station tests show. Field or sweet seed corn dusted with Semesan Jr. is protected from the destructive root rots carried by the seed and from rotting in cold west roil by the seed and from rotting in cold, wet soil, consequently better germination and yields of improved quality are obtained. Treatment with Semesan Jr. costs less than 3c per acre. Easily and quickly applied as a dust at the rate of 2 ounces per bushel of seed.

#### NEW IMPROVED CERESAN FOR WHEAT ONLY—(See Page 112)

CERESAN

Dust Disinfectant Jor Seeds of

Vheat, Oats, Barley Grains and Cotton

Fig.1 Place of Copyrige . . . 1 by

Only 0.4 of a bushel of the average yield increase of 35.4 bushels reported above was required to pay for the IMPROVED Semesan Bel, leaving a return on money invested of 9830%

#### Semesan Bel for Seed Potatoes

Seed potato treatment will bring you more profit than ever before. New Improved Semesan Bel — the quick treatment — has treating costs to 1½c to 3c per bushel of seed and gives equal or better control of seedborne Rhizoctonia and scab than the old soak treatments. It protects seed pieces against rotting, insuring maximum stands; gives more consistent increases in yield and consequently larger profits. New Im-proved Semesan Bel costs less in time and labor than the old treatments. It is easily and

quickly applied. Just mix one pound of Improved Semesan Bel with 7½ gallons of water, dip your seed potatoes, drain; and plant. One pound of New Improved Semesan Bel treats 60-80 bushels of seed potatoes.

#### Semesan for Vegetable and Flower Seeds

Prevent the many damaging diseases of flowers and vegetables that are carried on the seed, by disinfection of the seed with Semesan. It destroys disinfection of the seed with Semesan. It destroys the destructive diseases on the seed and protects them from the rots in the soil, which results in increased stands of more vigorous, healthy plants that yield larger, quality crops. Sprinkling of the seedling beds with Semesan solution effectively prevents damping-off. Recommended especially for seeds, bulbs, gladiolus corms, dahlia tubers, and rose bushes. Easily applied as a liquid or dust. One ounce treats 15 to 30 pounds of seed. Directions in every can. Directions in every can.

## Germāco Hotkaps

#### BIGGER CROPS 3 WEEKS EARLIER!

Germaco Hotkaps guard plants against frost, wind, rain, insects, etc., by completely covering them. They maintain a perfect mulch around each plant. Crops give a 10 to 25% greater yield and mature 2 to 3 weeks earlier—for higher prices.

Hotkaps are patented wax paper cones-placed over plants or seeds at time of planting. Inexpensive, easy to use. One man can set over 2,500 per day.

You can add to your next year's profit with Hotkaps. They cost but a fraction over a penny each. They not only bring you higher prices, but are a method of crop insurance—against the danger of the elements.

Write for interesting pamphlet free.

Write for special prices on 5 and 10 thousand lots.

#### LAWN SPRINKLERS

THE SQUARE FOUNTAIN SPRINKLER - The lower holes throw a wide spreading square, from the crown is emitted a volume of smoky mist that is unsurpassed for beauty. It gives an even distribution seldom equaled. It will sprinkle the side of your house, along the walk and reach the edges without throwing water over the passerby. Made of heavy brass. Price, 65c, postpaid, 75c.

JUSTRITE SPRAY NOZZLE—The brass nozzle for hand use; will throw a straight stream, also fine or coarse spray, and the shut-off is positive, without the possibility of leakage; recommended by all. Price, 50c, postpaid, 59c.

Champion Nozzle

CHAMPION NOZZLE — Two in one combination nozzle and sprinkler; the water volume is as great with spray as with solid stream. There is no shut-off and, therefore, no back pressure on the hose. Spray is graduated by the revolving sprayer plate. Price, 45c, postpaid, 55c.

TWIN" SPRINKLER-Made of zinc metal and cannot rust. Will cover the lawn evenly for 16 feet radius. Price, 45c, Very popular. postpaid, 54c.

"ROSE" or "BOSTON" SPRIN-KLER—A good serviceable, low priced Sprinkler, throwing the well known rose spray. Works well on either high or low pressure. Made of brass with a heavy cast brass base. Price, 80c, postpaid, 90c.

CRESCENT SPRAYER—A Sprinkler that throws all the water to the front and sides, leaving the sidewalk dry. Price, 90c, postpaid, \$1.00.

"HANDY" FOUN-TAIN SPRINKLER -Not very big, costs very little; but it sprinkles as much ground as the big ones. It throws all the water away from the hose end, givbeautiful ing a fountain spray. No tipping over; just

walk up to it and adjust it after the water is turned on. When held in the hand is splendid for sprinkling flowers. Made of heavy brass. Price, 50c, postpaid, 55c.

SPRINKLER 8 - Made of No. zinc metal and shaped so that it will water a bed on one side only. A most convenient Sprayer. Price, 35c, postpaid, 41c.

C. B. G.

C. B. G. SPRINKLER-"Cheap but Good"-Is deservedly very popular on account of low price. Price, 35c, postpaid, 46c.

Flaring Rose

Wilgus No. 1

FLARING ROSE SPRINKLER—Especially adapted for flowers and delicate foliage. It throws a fine spray that can be placed exactly where you want it without waste of water. Price, 60c, post-

"WILGUS" NO. 1-The original Wilgus Sprinkler; one of the leaders of the type, and one of the best. Works well on all pressures. Price, 60c, postpaid, 70c.

Wilgus No. 21

"WILGUS" NO. 21-This Sprinkler is mounted on a heavy cast iron base, japanned. Will not turn over, no matter what pressure, and can be moved on the sod like runners. Water is delivered in a very fine spray even on a light water pressure. Price, \$1.55, postpaid, \$1.65.

Zenith

Busy

ZENITH SPRINKLER — Adapted for general use and is very popular. Height 5 inches. A very useful Sprinkler. Price, \$1.35, postpaid, \$1.50.

THE BUSY-One of the best distributors of water on the market. Covers a circle of about 30 feet in diameter, very uniformly. The Busy is a very popular Sprayer. Price, \$1.05, postpaid, \$1.20.

THE ANACONDA-Same as the Zenith, except the heighth, which is 11 inches. Price, \$1.75, postpaid, \$1.90.

RING SPRINKLER-Made of heavy sheet brass. The Ring throws a fine mist, covers a large circle, and can be conveniently moved about without shutting off the water. Price, 95c, postpaid, \$1.06.

For stationary sprinkling over a small concentrated or large area. Price, \$2.50, postpaid, \$2.65.

#### SPRAY NOZZLES FOR PUMPS

BORDEAUX SPRAY NOZZLE—It is a general purpose spray nozzle. Throws a solid stream, coarse or fine mist, or it may be cut off. Excellent nozzle also for whitewashing, disinfecting, etc. Price, \$1.00, postpaid, \$1.10.

EUREKA SPRAYING NOZZLE — Throws conical-shaped spray. Disgorges by pushing against fence or tree. Price, 70c, postpaid, 75c.

LAWN SPRINKLERS—(See Page 131)

#### VICTOR GARDEN SET

An all-metal Fork, Trowel and Weeder.

Their brilliant green color commands attention. Made of genuine normalized steel, they are exceptionally strong and efficient. Durable enamel finish prevents rust and makes them easy to clean. "They coax beauty from the soil." Sold in sets only. Per set, 60c, postpaid, 70c.

#### TROWELS

THE KINGSBURY one-piece Trowel is a favorite because it is so easy to use. The handle is shaped to give a firm grip, has no rough edges. Built of unbreakable, unbendable sheet steel, whose sharpened blade is coated with rust preventive. Shaped to fit the hand. Price, 50c, postpaid, 60c.

NO. 211—The blade and shank are made of one piece of steel. The blade is finely polished. The rear part and shank are enameled a nice blue. Polished hardwood handle. Heavy steel ferrule. Price—6-inch blade, 85c, postpaid, 95c.

No. 213—Made of cold rolled steel, bright blades, malleable iron shanks firmly riveted. Price—6-inch blade, 25c, postpaid, 35c.

NO. 216—Ladies' Flower Trowel. Riveted by new method. Price—6-inch blade, 20c, postpaid, 28c.

NO. 217 — Transplanting Trowel. The blade and shank are made of one piece of heavy sheet steel. Excellent for lifting and setting out plants and seedlings. Price—6-inch blade, 25c, postpaid, 33c.

## WEEDERS

LANG'S HAND WEEDER — One of the handiest tools yet devised for weeding and thinning out. Each, 20c, postpaid, 25c.

EXCELSIOR WEEDER — A very useful tool for weeding seed beds. For stirring the ground, etc., no one should be without one. Each, 20c, postpaid, 25c.

MAGIC WEEDER — A very handy tool for use among flowers and small vegetables. Destroys the weeds and leaves the earth about the roots themselves. Price, 55c, postpaid, 62c.

MAGIC WEEDER NO. BB—A tool light enough and long enough; 36-inch handle for use with one hand without stooping; very handy for weeding flowers and small vegetables. Price, each, 45c, postpaid, 55c.

SUPERIOR WEEDING HOE—3-in. cut, 11-in. handle. Very useful article for the garden. Each, 80c, postpaid, 85c.

#### WEEDING FORKS

GARDEN WEEDING FORK NO. 300—3-tine, very strong, useful tool. Each, 50c, postpaid, 55c.

GARDEN WEEDING FORK NO. 400—4-tine, short handled, very strong, useful tool. Each, 35c, postpaid, 47c.

ASPARAGUS KNIFE — This Asparagus Knife is made of the best steel, cutting edges are hardened and tempered to stand rough usage. Used also as digger and weeder for long tap-rooted weeds such as dandelions. Each, 45c, postpaid, 53c.

### PRUNING KNIVES

Good grip wooden handles with three-inch blade. No. 5C-3 4-inch blade. Each, postpaid .....\$2.00

No. 2C-4-inch blade. Each, postpaid ...... 2.25

#### WATER'S TREE PRUNERS

The best Pruner on the market. Cuts limbs up to 34-inch in diameter. The spring on the handle resets the cutting blade.

#### BARKER WEEDER, MULCHER AND CULTIVATOR

"Makes Gardening 10 Times Easier"

This is a practical up-to-date hand Cultivator, doing better work than many others; it has small pointed shoes or hoes. Made like a lawn mower, the revolving blades working up the surface of the ground, cut-ting weeds and separating them from the soil, so they are easily destroyed. More effective, as no weeds can be missed and a fine mulch is left over the surface

which prevents the evaporation of the moisture. Each machine is fitted with leaf guards and tooth attachments. The 9-inch is for ordinary use.

No. 9 D-Complete, all attachments, 9-in....\$ 9.50 No. 10 D-Complete, all attachments, 10-in.... 10.60 No. 11 D-Complete, all attachments, 11-in.... 11.75

#### VIGORO SPREADERS

These Seeders and Spreaders were especially designed for small lawns. The Junior holds 25 lbs. Set the slide and run it over the lawn, so simple, so easy, a child can run it. Spreads 14 inches wide and has a quick-acting slide adjustment; spreads accurately and uniformly in any quantity desired of all grass seeds, plant food, etc. No seeds or fertilizer wasted, leaves no ridges or bare spots on the lawn. It sows close to the ground spots on the lawn. It sows close to the ground and avoids the loss by wind.

Use the Vigoro Spreaders in Spring, Summer and Fall. Then use it in Winter also for spreading sand or salt on icy walks and drives. Saves time, labor; seed and plant fertilizer. Prices—The Junior Spreader, \$7.00; the Little Spreader, \$2.35—F. O. B. Helens Helena.

#### PEERLESS BARREL PUMP

The "Peerless" has become a very popular sprayer. It ranks first among the medium priced thoroughly tested. Its rigidity dur-ing operation by anchor in bottom of barrel is a most desirable feature. It is a boon to the average farmer who is not engaged extensively in fruit growing. The "Peerless" is very compact, durable and efficient.

The "Peerless" barrel sprayer has one 12½-foot section of ½-inch hose, coup-lings, agitator and disk strainer, also Simplex nozzle.

No. 1721—Price complete, \$14.65.

· Peerless No. 1721

#### GRASS SHEARS

HARTFORD GRASS SHEARS—Tool steel, the best that money can buy. Pair, 75c, postpaid, 85c.

#### PRUNING SHEARS

snap cut pruner—Is new and different. It easily cuts ¾-inch green wood with perfectly clean cut; absolutely non-pinching handles and beautiful rust-proof finish. The finger guard holds the hand in natural position; can be carried in the pocket without danger to clothing or person. Price, \$2.00, postpaid, \$2.20.

HARTFORD PRUNING SHEAR — Polished steel blades. Double brass flat springs. The best for vineyard and other pruning. Very strong; 9-inch. Price, \$2.10, postpaid, \$2.22.

SUPERIOR PRUNING SHEAR — Malleable iron handle, polished steel blade with blued steel volute spring; 9-inch. Price, \$1.00, postpaid, \$1.15.

Extra Springs for Superior Pruning Shears—Price, 20c, postpaid.

#### PEERLESS HAND PRUNER

A good and powerful Pruner. Blades are forged from best quality tool steel and finely tempered, correctly shaped for clean and rapid cutting. Seamless steel ferrules, heavy ash handles. Length, 30 inches. Price, \$3.35, postpaid, \$3.55.

#### HEDGE SHEARS

HEDGE SHEARS—ZENITH—For trimming hedges, shrubs, small bushes and trees; also preferred by many for edging lawns and beds. Blades are polished solid cast steel.

No. 485L—6-inch blade, per pair, \$2.00, postpaid, \$2.15.

No. 485M—8-inch blade, per pair, \$2.75, postpaid, \$2.95.

## Paper Flower Pots

#### BIRD'S NEPONSET WATERPROOF PAPER POTS

For transplanting young plants of all kinds; light, strong, waterproof and inexpensive. Try them if you raise your own tomato and other vegetable plants.

These Pots are used to start young plants and seed and the Pot is later inserted in the soil with the plant.

# BOOKS that tell you how_____

to plan your garden, to select flowers and plants, to design gardens and home grounds, to raise vegetables, to control pests, to feed plants, to care for trees.

EVERGREEN

By L. B. Banky

GARDENER

#### WESTERN AMERICAN ALPINES, by I. N. Gabrielson

This book fills the gap in the garden knowledge of the alpine plants of the Pacific Northwest. Only true alpines, rock and desert species, and woodlanders dwarf enough to be valuable in rock gardens, are discussed. There are a generous number of illustrations. 123 illustrations; 271 pages; 5½ x 8½ inches—\$3.50.

#### SPRAYING, DUSTING, AND FUMIGATING OF PLANTS, by A. F. Mason

Tells what pests to expect and how to identify and control them, how to choose the right spray materials, how to select spraying and dusting machinery, and every other detail for the successful pest control of fruits, vegetables, and dooryard garden plants. 237 illustrations: 570 pages: 51/ x 8 inches. \$2.00 tions; 570 pages; 5½ x 8 inches-\$3.00.

#### DAHLIAS, by F. F. Rockwell

Learn to know the different types of Dahlias and their uses in your garden, how to plant and grow them, what fertilizers to use, how to control pests, how to harvest and store the tubers, grow for exhibition, and how to propagate and hybridize. Brief and practical. illustrations; 80 pages-\$1.00.

EVERGREENS FOR THE SMALL PLACE, by F. F. Rockwell All the information you need to make the best use of Evergreens is in this handy book, written by one who is himself a home owner and a garden maker. It tells the uses, characteristics, and types of small or dwarf Evergreens, and details of their planting, transplanting, and general care. 67 illustrations; 84 pages—\$1.00.

#### GARDEN POOLS: LARGE AND SMALL, by Ramsey and Lawrence

Nothing else can add so much to your garden as a pool, even if it is only a transformed wash tub in the tiniest garden space. How to have one is fully explained in this new book. Its text is so complete and its illustrations are so numerous and practical that you can easily find the type of pool that fits in your garden and learn all about designing, planting and caring for it. 41 illustrations; 122 pages—\$2.50.

#### THE GARDENER, by L. H. Bailey

Beginning with A and running through to Z, this book lists and tells how to plant and care for all the common flowers, vegetables, and fruits from the time they are planted through to maturity. Entries are cross-referenced and the book is unusually easy to use. 116 illustrations; 260 pages-\$2.00.

#### GLADIOLUS, by F. F. Rockwell

Recommended as "the best brief guide on Gladiolus growing." It tells how to plant, fertilize, and cultivate; how to grow from seed or bulblets; how to harvest and cure; how to handle for cut flowers; and every other detail needed for success with this popular flower. illustrations; 79 pages—\$1.00.

HOME FLOWER GROWING, by E. C. Volz A real flower garden encyclopedia! It will teach you how to propagate and cultivate your plants, how to care for, fertilize, and maintain them. It tells how and when and where to grow flowers; what different kinds look like; how to plan indoor, outdoor, rock, and water gardens; how to prepare exhibits for a flower show; how to organize a garden club. 151 illustrations; 364 pages—\$3.50.

#### LANDSCAPING THE HOME GROUNDS, by L. W. Ramsey

Step by step, with photographs and plans that make each point clear, this new book shows just how to develop your home grounds for greatest beauty. Each of the 175 illustrations tells a story or teaches an important lesson at a glance. 175 illustrations; 170 pages—

#### SHRUBS, by F. F. Rockwell

Here is a brief but complete and usable information on the best ways to improve the beauty and value of your home with Shrubs. Tells what to select for different combinations and effects, and how to plant, water, mulch, prune, and care for Shrubs. 49 illustrations; 76 pages-

#### PERENNIAL GARDENS, by H. S. Ortloff

Following the simple directions in this book insures a perennial garden crowded with bloom, in which the colors make a perfectly blended picture. First come plans, showing how to locate and lay out the garden; then clear directions for preparing the soil, fertilizing, planting, cultivating, transplanting and propagation. 18 illustrations; 90 pages—\$1.25.

#### ROCK GARDENS, by F. F. Rockwell

Brief, clear descriptions and numerous drawings show just how you can build a rock garden yourself, on a large or small scale and at small cost. The book describes the types of rock gardens, tells what soils, climates, and locations are best, how to construct, and what to plant. 31 illustrations; 86 pages—\$1.00.

#### ALL BOOKS ARE SENT POSTPAID

## SEED SOWING CALENDAR

UARIUMS	

Common Goldfish

1½-Gal. Aquarium

#### FISH AND TURTLE FOOD

Natural Fish Food-1-oz. box, 15c each; 4-oz. box, 35c.

Spratt's Zeke — (For turtles), 15c a package.

Dobelman's Fish Parasiticidal Remedy (antidiscrassicum), per bottle, 15c. Fish and Turtle Food prepaid.

#### FISH MOSS

Fish Moss — Generates oxygen in the waret, acts as a food for the fish and adds a natural beauty to the bowl or tank. Per bunch, 25c, postpaid, 30c.

All items from Castle Ornaments down to Aquariums postpaid.

GOLDFISH AND AQUARIUMS

Shipments are made throughout the year with the exception of the hot Summer months.

#### ALL FISH, AQUARIUMS AND SUPPLIES ARE SHIPPED BY EXPRESS, CHARGES COLLECT

Goldfish should never be changed suddenly from water of one temperature to that of another. Feed lightly about twice a week. We recommend our Natural Fish Food.

PRICES OF DIFFERENT SPECIES OF FISH Common Goldfish, 2 to 4 inches long, each 25c and 50c. Japanese Fantails, 75c to \$2.00 (ask for special prices on 1, 2 and 3-year-old fish of this species).

Chinese Moors (black with telescope eyes), \$1.00, \$1.50 and \$2.00 each.

Chinese Telescope (gold and silver), \$1.00, \$1.50 and \$2.00. Shubunkins (fancy scaleless fish of variegated colors originat-

ing in Japan), \$1.00 and \$1.50 each. Write for prices and description of other fancy and improved Japanese fish such as Ruikin, Oranda Lionheads, Calico, and Telescope Fantails (Demekin), etc.

#### SCAVENGERS

Scavengers are important in taking care of the wastage of the aquarium.

Tad Poles—(Giant Gray), 15c Snails—15c each. each. Geographical Turtles—35c

Water Lizards-35c each. each. All above items shipped express collect ..

#### SHIPPING CONTAINER AT COST-30c EXTRA

Castle Ornaments-Assorted sizes from 25c to 75c each. Aquarium Balls—Another aquarium ornament brilliantly colored with small opening in which sprays of moss may be inserted. Small, 15c; large, 25c.

Mermaids and Bathing Girls-Unique aquarium ornaments, 25c, 50c, 75c, \$1.50.

Fisher Boys—An interesting decoration for square aquariums; cannot be used on bowls. Small, 35c; large, 60c. Aquarium Cement-60c per pound. Dipnet-For removing and transferring fish from aquariums;

30c each.

Sea Shells-Brilliant and fast colors; 20c per box.

Pearl Chips-Natural colors; 20c a box. White Silica Sand—Per box, 25c.

10½ inches

Rubber Siphons-For emptying aquariums; complete with attachments, \$1.50.

Artificial Water Hyacinths-15c.

18 inches
